Comments /notes on tonight's mission and this interpretation:

I started my interpretation from IR heat perimeter dated 08/19/2018 – 2,067 acres. IR interpreted acres for 08/21/2018 is 2,067 – No growth. Fire had some level of clouds from light to heavy over the entire heat perimeter area. There was only a few isolated heat sources detected within the heat perimeter.
