**Comments /notes on tonight's mission and this interpretation:**

Started interpretation with the last IR heat perimeter on 08/24.

There was some small growth in a couple of places on the east side of the fire. Also a couple of isolated heat sources outside the main heat perimeter and a couple small heat polygons outside the main heat perimeter in the middle of the east side just west of Beaver Creek in the northwest of section 31.

Areas of growth outside last fire perimeter:
