Comments /notes on tonight's mission and this interpretation:

I started my interpretation with the 08/09/2018 IR fire perimeter. New growth - 27 acres.

Yellow is 8/09/2018's IR perimeter. Red line is current IR heat perimeter.

Only minor exterior perimeter growth. The poly in the middle closed in more tonight.

INFRARED INTERPRETER'S DAILY LOG

There is scattered and isolated heat throughout the interior of the fire. Patches of intense heat on the NE and SW side of fire.
