<b>Comments /notes on tonight's mission and this interpretation:</b>  Last IR flight was night of 7-31/8-1.  Started interpreting tonight using perimeter provided by incident, found here: /incident_specific_data/n_rookies/2018_fires/2018_RattlesnakeCreek/Data/20180805/20180805_1330_RattlesnakeCreek_IDNCF00362_Event_ArcMap_10_5.gdb.zip This perimeter was 4318 acres.  A couple main areas of intense heat, along the western side and at the southern part of the fire.  There is much less heat along the highway to the eastern part of the perimeter.  Scattered heat throughout much of the interior of the perimeter.
