Date and Time Products Delivered to Incident: 0500 PDT 8/15/2018			
Comments /notes on tonight's mission and this interpretation: Started interpreting tonight with the perimeter provided to me via email from the incident. Intense heat in the southwest part of the fire: some spots west of Lockwood Point and south of Lockwood point into section 30, the headwaters of Fall Creek. Scattered heat throughout much of the south west corner, and only a few isolated heat sources located in the rest of the perimeter.
