RE: U.S. Forest Service, RFI Solicitation No. SN-2012-12

Dear Ms. Draper,

Data Transfer Solutions (DTS) is pleased to present our response to Solicitation No. SN-2012-12. Given our previous experience with wildland fire Computer Aided Dispatch (CAD) and enterprise incident management systems we are excited about the opportunity to leverage our knowledge and experience to enhance U.S. Forest Service and state partner initiatives.

We sincerely believe our work with federal, state and local fire management agencies across the Nation helps provide decision makers with better, more accurate information. Ultimately, we believe this saves lives and homes from devastating wildfires.

We feel the combination of our previous experience, knowledge, and particularly our **FiResponse™** product is ideally suited for successfully meeting the objectives of this project.

We appreciate the opportunity to respond to this RFI and look forward to the opportunity to demonstrate our product to the U.S. Forest Service in future.

Please refer to Section 1, Offerer Information in our attached RFI response for complete contact and reference information as requested. I will be the primary point of contact for DTS for this solicitation. Please feel free to contact me at the phone number or email below if you require any further information. Thank you for your consideration.

Sincerely,

David Buckley
Vice-President, GIS Solutions
