

GOLDEN EAGLE

Habitat: Tundra, prairie, rangeland, or desert

Scientific Name: *Aquila chrysaetos*

Photo: Federal
Highway Administration

PACIFIC NORTHWEST
FIRE ADAPTED COMMUNITIES

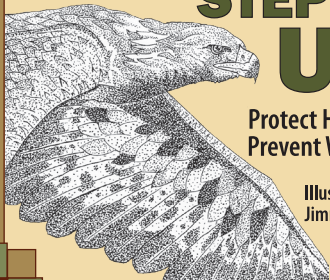

www.pnwfac.org

Fun Fact: Eagles have terrific eye sight, with binocular vision that allows them to see depth and judge distances accurately.

Fire Prevention Tip: From a firetower, a lookout scans the area for smoke, and calls firefighters if there is a fire. If you see a wildfire, tell an adult, call 911 and leave the area.
