

PYGMY RABBIT

Habitat: Sagebrush

Photo: H. Ulmschneider, (BLM) and R. Dixon (IDFG)

Scientific Name: *Brachylagus idahoensis*

PACIFIC NORTHWEST
FIRE ADAPTED COMMUNITIES

www.pnwfac.org

Fun Fact: The pygmy rabbit is the smallest rabbit species in North America. It fits easily in the palm of a hand. In the winter, it gets 99 percent of its food from sagebrush.

Fire Prevention Tip: A fire smaller than your hand can easily get out of control. Be a fire lookout—help watch for sparks on dry grass when adults are mowing.
