34. Life, Safety, and Health Threat Management:

Incident: GOLD CREEK

related fac	ctors that	may	cause	concern'	:
-------------	------------	-----	-------	----------	---

A dry cold front will move through tonight. Dry air with the front will result in poor relative humidity recoveries along the mid to upper

slopes and fair on the valley floor. The fire will be mostly sheltered from the strongest west winds, but breezy north to northwest winds

are expected by late Sunday morning through the afternoon with low relative

humidities. Winds will decrease overnight Sunday and become terrain

driven for Monday.

	Active?

P. Trail Closure	
Q. Area Closure	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: Continued to construct containment lines and reinforce where needed. Mop up around structures and continue to provide structure protection.

24 hours: Continue to construct containment lines and reinforce where needed. Mop up around structures and continue to provide structure protection.

48 hours: **same as above** 72 hours: **same as above** Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Fire remains in current footprint, with no further fire growth, mopped up, and threat to structures is eliminated.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: Primary threat to residences and recreational trail use. Commercial infastructure

24 hours: same as above

48 hours: same as above

72 hours: **same as above**Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: two type 2 IA crews, two type 5 engines, 1 type 3 tender with spray bar

Incident: GOLD CREEK

24 hours: same as above

48 hours: same as above

72 hours:

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

1) critical resource needs identified above,

2) the Incident Action Plan and management objectives and targets,

3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Drawdown on local resources due to fire activity in the area which is necessitating the team and additional resources from out of the area. Proximity to town of Carlton is a significant concern.

41. Planned Actions for Next Operational Period:

Continue to build and reinforce containment lines and mop up around structures.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): 150 Acres
- 43. Anticipated Incident Containment or Completion Date: 06/28/2024
- 44. Projected Significant Resource Demobilization Start Date: 06/26/2024
- 45. Estimated Incident Costs to Date: \$120,000.00
- 46. Projected Final Incident Cost Estimate: \$1,700,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
