Incident: GOLD CREEK

across the Gold Creek Fire late Saturday afternoon between 1600 and 1900 PDT. This will result in a wind shift from east-southeast to out of the north. Clouds will thicken up on Saturday ahead of the front, but precipitation is not expected on the fire aside from a few sprinkles. Breezier north winds with a slight chance for showers and thunderstorms is expected by Sunday afternoon.

- 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:
- 12 hours: Continue grid 300 feet around structures and 100 feet of perimeter.
- 24 hours: Right size resources for the needs of the incident.
- 48 hours: Turn incident back to the local Unit.
- 72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Fire remains in current footprint, with no further fire growth expected, grid perimeter to minimize future growth outside of perimeter, and continue to grid around structures to eliminate the risk.

- 38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
- 12 hours: Primary threat to residences and recreational trail use.
- 24 hours: None
- 48 hours: None
- 72 hours: None

Anticipated after 72 hours:

- 39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
- 12 hours: Mini excavator for repair and rehab along a driveway.
- 24 hours: None
- 48 hours:
- 72 hours:

Incident: GOLD CREEK

#### Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Continue to secure perimeter to level a that the local unit will be capable of managing the incident. Right size of numbers and types of resources to allow for incidents objectives to be met.

41. Planned Actions for Next Operational Period:

Continue to reinforce containment lines and mop up around structures and secure perimeter. Complete rehab of containment lines and pick up all debris in the area.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): 278 Acres
- 43. Anticipated Incident Containment or Completion Date: 06/29/2024
- 44. Projected Significant Resource Demobilization Start Date: 06/28/2024
- 45. Estimated Incident Costs to Date: \$1,627,707.00
- 46. Projected Final Incident Cost Estimate: \$2,100,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
