GISS Message September 1, 20223

To zoom to the fire area in Field Maps . . .

1. Open the incident data collection map. For this incident, 2023_Wawawai_WAWFS1736_collection_map
2. Tap the ellipses - 3 dots - at the top right corner
3. Tap bookmarks. Wawawai 1 is an overview of the area; Wawawai 2 will take you to the fire

GIS Tip: Collect and attach a photo to a photo point!

The most common mistake I've encountered is failure to attach a photo to a photo point. Here's the procedure:

1. Click on the "+" to collect the photo point (just like you do to collect anything)
2. You'll have the option to take a photo or attach an existing photo from your gallery
 - a. Take the photo. In the comments field describe the photo, or
 - b. Click on Attach, find the existing photo and select it
3. **To actually attach the photo to the point, click to check mark at the top right** (submit- just like you do to collect anything)

When you think you're done, zoom in to the photo point, select it, and look for a thumbnail of the photo in the attributes. If it isn't there, try again!

To Delete a Feature

No field data collector has permissions to delete anything from the National Incident Feature Service (NIFS); that's what the GISS is for!

To remove a feature, select it, scroll down through the attribute fields until you get to **Delete this feature?**

Select an option: Yes – No Longer Needed or Yes – Editing Mistake

The GISS will delete or archive the feature
