0600-2000 Operational Period

WA-NES-000239

PN R09D (1522)

221-JNY

Incident Objectives	1. Incident Name Gold Creek	2. Date Prepared 6/25/2024	3. Time Prepared 1136
4. Operational Period (Date and Time) 6/26/2024 0600-2000			
5. General Control Objectives for the Incident (include Alternatives)			
<ul style="list-style-type: none"> • Provide for firefighter and public safety at all times. This includes the application of the "10 and 18", LCES, and the Risk Management Process. • Ensure structures and infrastructure are properly identified and mopped up around • Minimize acres burned. • Act professionally and in a manner that fosters good relationships with the public, private landowners, timber industry representatives, elected officials and other stakeholders. • Follow agency policies at all times and respect the policies of the host agency. • Maximize opportunities for cost savings without jeopardizing public or firefighter safety • Provide timely communications and accurate information as it becomes available. 			
6. Weather Forecast for Operational Period			
See attached weather forecast			
7. General Safety Message			
<ul style="list-style-type: none"> • Provide for firefighter and public safety at all times. • Monitor compliance of 10 and 18 by all incident personnel. • Adhere to 2:1 work/rest ratio for all fire line personnel. • Aviation safety is high priority. Assess the risk against the benefit of the mission. • Ensure all assigned personnel understand emergency medical reporting & transport procedures including locations of nearest emergency responders & facilities.

WA DNR Mop-Up/Suppression Repair expectations

These standards may be adjusted and modified as the incident progresses, but are intended to give the IMT direction for planning. A map and associated shape files will be produced prior to any transfer of command. This will detail all work completed and future work needed to meet objectives

Mop-Up Specifications

Always consider over-head hazards prior to putting fire fighters potentially in harm's way for mop up. Mitigate hazards and exposure as needed.

Achieve 100% mop-up along and inside the fire perimeter to a distance that is adequate to ensure the perimeter is secure to prevent the fire from escaping across existing containment lines.

To reduce hazards to firefighters during final mop-up, mitigate all snags that pose "imminent" danger along all open roads within the fire perimeter.

Known spot fires outside the control lines will be 100% mopped up where appropriate to do so, a route to them will be flagged, and the perimeter of spots mapped in GIS.

Mop-up of partially burned areas further inside the lines will be determined on a case-by-case basis.

For structures and sensitive resources within the interior of the fire line, mop-up to a level to ensure that there will be no future effects from the fire.

As mop-up specifications are met on the incident, Operations will develop a plan for resources and equipment to be staged if they may be required for future operations.

Mop-up will be verified by infrared equipment and/or gridded.

Notify Agency Representative if a cultural site is found during mop-up.

Suppression Repair Specifications

All Tractor and Hand Lines

- Place water bars on tractor and hand lines with the following spacing guidelines:
 - 6-9% slope - maximum of 300' apart
 - 10-15% slope - maximum of 200' apart
 - 15-25% slope – maximum of 100' apart
 - 25% to 45% slope – maximum of 50' apart
 - Greater than 45% slope – every 25-50'

**Spacing distances above should only be used as a guide. Use judgment in locating water bars to minimize soil erosion potential.

- Pull soil, litter, duff and debris removed from the fire line back onto the line to cover non fire perimeter hand lines.
- Flatten large berms on all fire lines.
- Leave all freshly fallen trees as they lay. Do not limb or buck.
- Fire lines through damp or wet areas/riparian zones need to be rehabbed by hand if possible, or by the lightest equipment possible, with the least number of stream crossings. If damage is minimal, consider the possibility of not doing additional work.
- Block road access to hand and dozer lines to discourage recreational use. Attempt to visually obscure junction of line and road and make travel on first section very inconvenient (i.e. it will be too much trouble to access the line to be worth it, especially for motorcycles).
- Disperse large concentrations of unburned fuels created during suppression efforts
- Primary Containment lines may be repaired only after mop up is completed and verified by infrared equipment and gridding operations have not found any smokes for 3 shifts.

General Rehabilitation Concerns

- Identify and inventory fences, signs, and other improvements damaged by the incident.
- Repair road damage incurred during incident suppression.
- Remove garbage, litter, etc, from control lines, roads, drop points, and staging areas and dispose off-site.
- Signs/flagging removal: All signs and flagging will be removed from fire lines, roads, drop points, staging areas, camps, and water chances.

. DISCUSSION.

A system on Wednesday will bring increasing shower and thunderstorm chances through the day. Rain amounts up to 0.2" is possible.

WEDNESDAY...

Sky/weather.....Mostly cloudy. Slight chance of thunderstorms in the morning. Showers likely through the day. Chance of thunderstorms in the afternoon.

CWR.....25 percent.

LAL.....3.

Max temperature.... Around 76.

Min humidity.....38 percent.

Wind (20 ft)North winds around 5 mph shifting to the south 5 to 8 mph with gusts near 15 in the afternoon. Gusty and erratic winds expected near thunderstorms.

Mixing height.....3000 ft AGL increasing to 5000 ft AGL in the afternoon.

Transport winds.... Southwest 9 to 11 mph.

Haines Index.....3 Very Low.

THURSDAY...

Sky/weather.....Partly sunny. Slight chance of rain showers through the day.

CWR.....0 percent.

LAL.....1.

Max temperature.... Around 67.

Min humidity.....36 percent.

Wind (20 ft)West winds 5 to 8 mph.

Mixing height.....7000 ft AGL increasing to 7500 ft AGL in the afternoon.

Transport winds.... West 15 to 18 mph.

Haines Index.....3 Very Low.

Briefing

0600 - Day Shift Briefing - Weber

Meal Times

Breakfast – 0530 - 0900

Dinner - 1800 - 2100

Showers

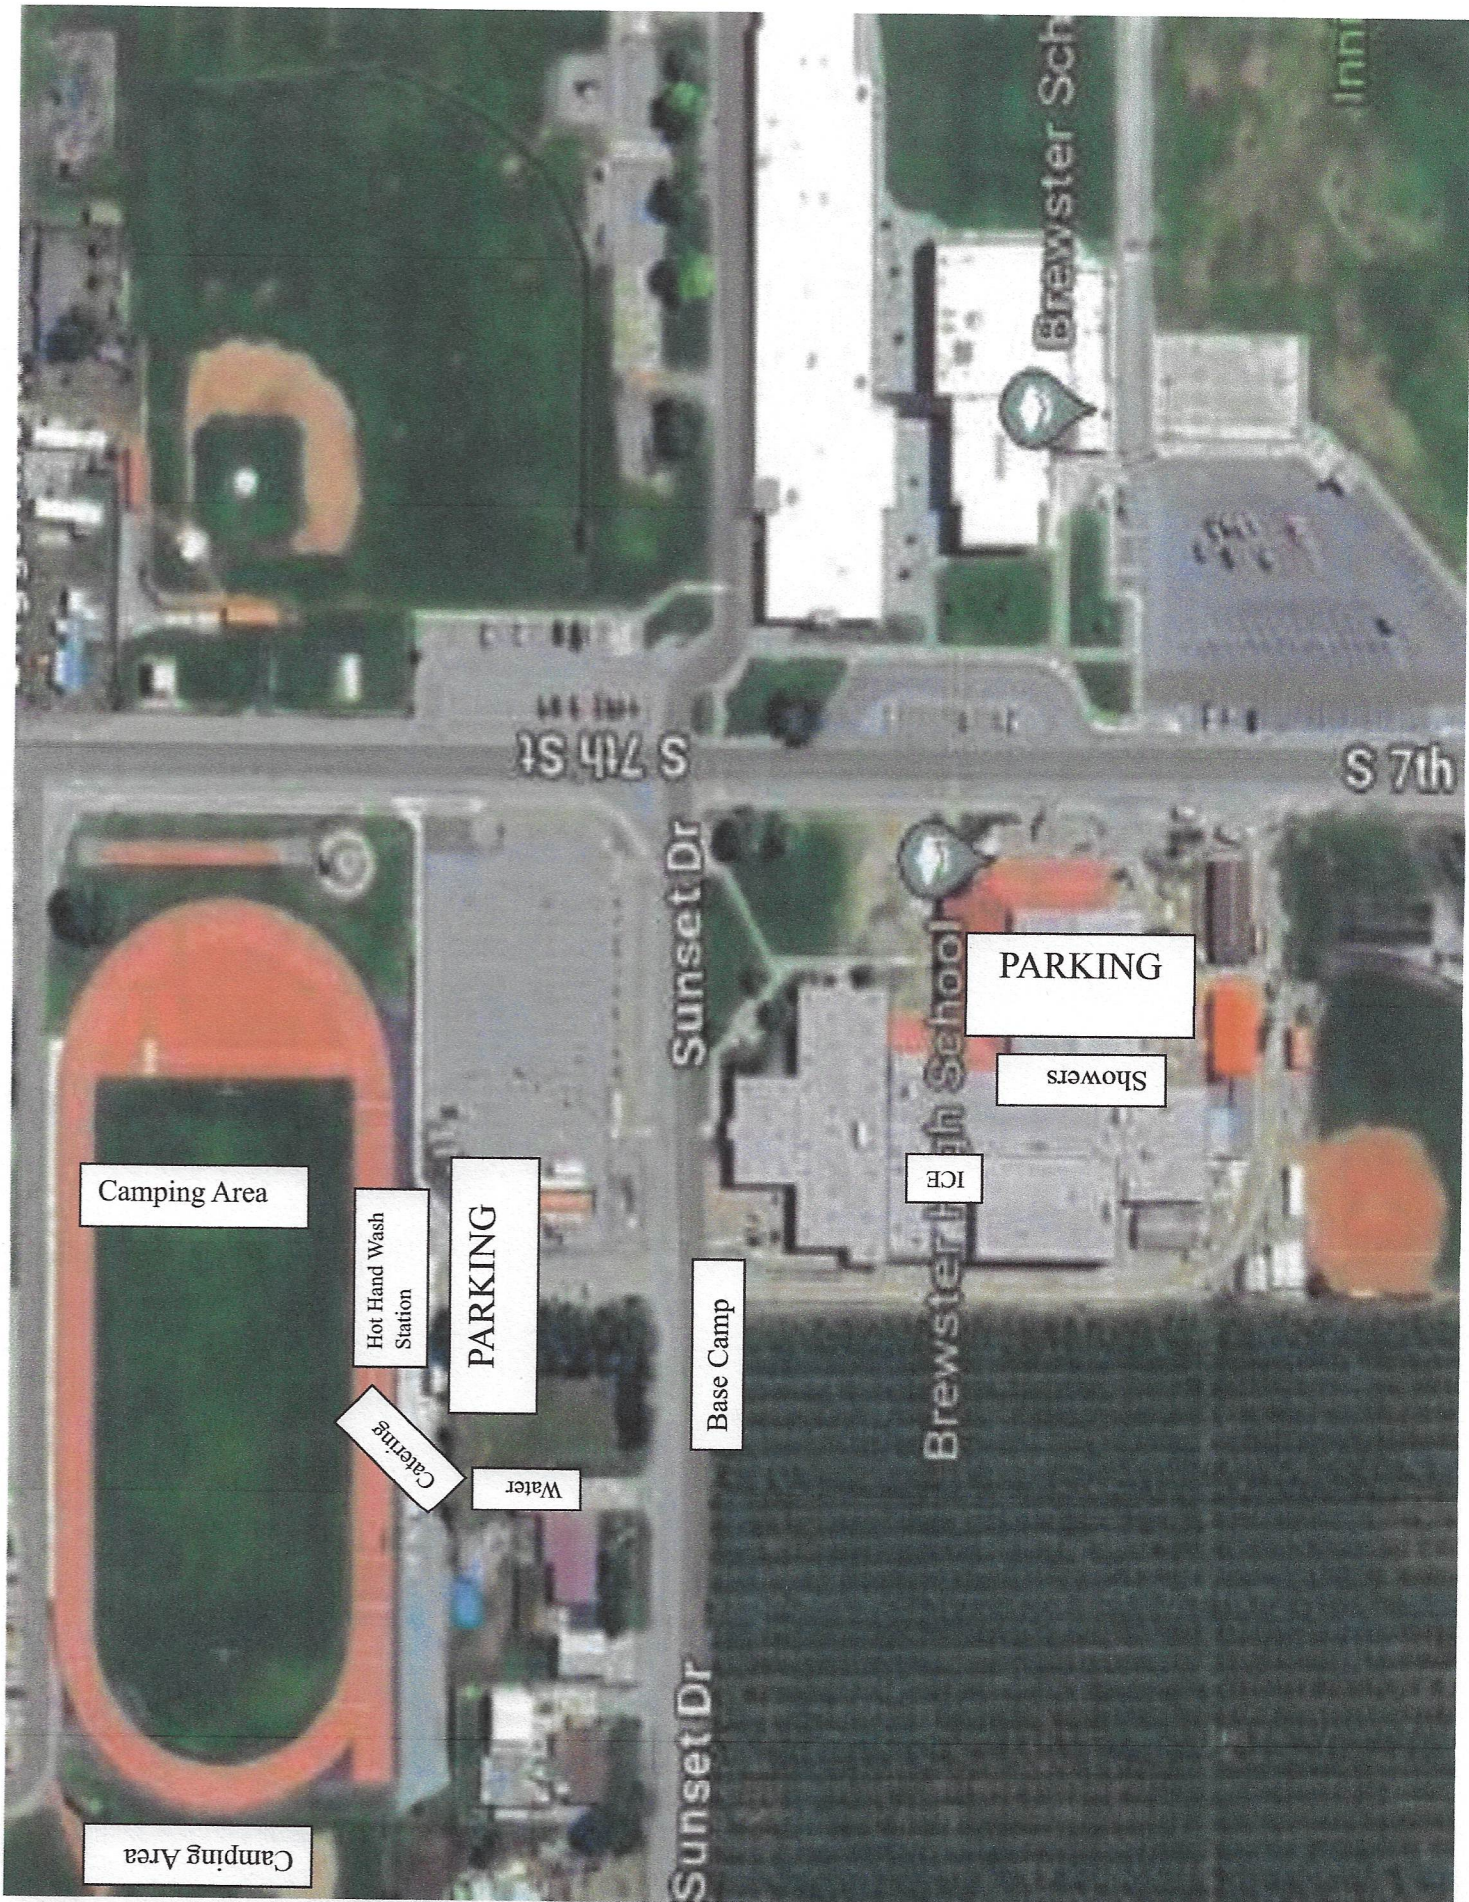

0500-1100

1400-2200

Please see the map for parking and other camp information. It can change daily.

General Messages: include contact with phone number, very detailed, and write clearly

No supply unit or ground support - See Logs for any needs

Safety Message

Incident:
Gold Creek

Date:
June 25, 2024

Time:
Day Shift

Major Hazard and Risk:

Snags! Snags! Snags!
Very Steep Rocky Terrain

Implement LCES prior to operational engagement.

Snags! Stay well clear of snags, including well downhill of them.

Heavy Equipment: Stay well clear, especially downhill.

Very Steep Terrain w/lots of rolling debris.

- Heavy Lifting: Lift with your legs, lighten the load and/or ask for help.
- Mop-up/Watch for stump holes.

Transportation: Drive defensively, headlights on, keep windshields clean, always use backers.

WATCH OUT FOR PUBLIC on Highway 153 (both driving & observing along the roadway)

Review the Medical Plan, BEFORE you need it.

Identify hazards and communicate them to others utilizing appropriate chain of command.

BE NICE, WORK HARD, HAVE FUN AND LIFE EACH OTHER UP!

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
