

FINANCE MESSAGE

Finance Email: 2024.pioneer.finance@firenet.gov

Finance Phones: Equipment (208) 891-6877 & TIME (208) 891-8036

This incident requires electronic documentation. Please email your time to the Finance email address daily.
Finance documents required upon check in are:

Required Documents

Overhead, Agency Crews & Cooperators	Contract Resources
Check-in docs needed: Resource Order, Manifest, Cooperative Agreement, Casual Hire Form w/ECI# (as applicable)	Check-in docs needed: Resource Order, Manifest, Full Contract/Agreement, Certifications <i>(If required)</i> Pre-Inspection
Daily: CTRs, Shift Tickets	Daily: CTRs, Shift Tickets, receipts (claims, etc.)
Demob: Signed OF-288; Signed OF-286	Demob: Contractor Evaluations, Shift Tickets, receipt(s) for Addition/Deductions, Post-Inspection, Signed OF-286

Additional Incident Information (to be added to your Shift Ticket or CTR)

Incident Name: **Pioneer**

Incident Number: **WA-SES-000173**

Financial codes:

WA DNR – **221-LDW**

DOI – **RZ79**

USDA – **PNRZ79 (1522)**

**Please make sure you check in using QR code on the front of the IAP and then email your time daily.
THANK YOU!!**

CHECK-IN

Please complete the virtual check-in process via the QR code on the front cover.

You are not checked in until you provide the following:

- Red Cards
- Roster/Manifest

Please email documents to:

2024.pioneer.demob@firenet.gov

DEMOB

Fliers complete the “Air Travel Request” via the QR code on the front cover 72 hours prior to flight date.

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork

Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.

If you have any questions about Check-In or DEMOB please email demob at 2024.pioneer.demob@firenet.gov.
Please include your request number in the subject line when emailing.

INCIDENT OBJECTIVES	1. Incident Name Pioneer	2. Date June 12, 2024	3. Time 2000
4. Operational Period: 06/13 0600-2200			
5. General Objectives: Implement suppression strategies/objectives for short-term and long-term incident planning. <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard identification and application of a shared risk management process. • Coordinate public information to provide timely updates to agency partners, cooperators, and the public. • Coordinate suppression activities with READs to identify impacts on the landscape. • Effectively manage and track costs with daily IAP reporting. • Coordinate with agency leadership/administrators to ensure effective and efficient management of firefighting resources. Operational objectives: <ul style="list-style-type: none"> • Implement a point protection strategy for current infrastructure on private lands and triage additional infrastructure within fire planning area. • Minimize fire impact on private lands. • Evaluate current fire conditions, identify/utilize features that could lead to fire growth, and validate strategic indirect (new/historical) control lines. • Develop a long-term strategic plan for suppression of the incident. • Utilize appropriate tactics for current/future fire environment and predominantly wilderness landscape. 			
5a. Incident Requirements <ul style="list-style-type: none"> • Provide Agency Administrator updates and briefings on incident status. • Firefighting operations will implement tactics that offer the highest probability of success to minimize impacts to the landscape and minimize unnecessary exposure to firefighters. • Incident values are firefighter and public safety, critical infrastructure, private land and natural resources. 			
5b. Leaders Intent <ul style="list-style-type: none"> • Safety: Firefighter, public, boat and aviation safety will be addressed through DRA process. • ISAP: Engage agencies with strategic alignment process, for shared values at risk. • Communication: Keep Agency Administrators and firefighters informed of strategic actions, accomplishments, and challenges. • Operations: Make informed strategic/tactical decisions suppressing the fire in the right geographic locations with the appropriate resources and highest probability of success. • Stakeholders: Collaborate with local partners, officials, and landowners to provide situational updates pertinent to the fire. • Logistics: Provide support ensuring food, water, and shelter for incident responders. • Human Resources: Ensure that all incident personnel are treated with dignity and respect, while having zero tolerance for harassment, alcohol, or illegal drug use. • Public Information: Provide timely and accurate information through media outlets, briefings, and social platforms as needed. • Finance: Monitor and communicate incident cost associated with meeting incident objectives. • Planning: Provide incident documentation, resource tracking, and meeting management.

Fire Weather Forecast

FORECAST NO: 01
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Thursday 6/13/2024
TIME AND DATE ISSUED: 6/12/2024 1900 hrs

INCIDENT: Pioneer Fire
SIGNED: Trent Smith *Trent A. Smith*
Incident Meteorologist (IMET)

Discussion:

A ridge of high pressure will be over the fire today allowing for some warming and drying. A cold front will be moving through the fire location late this evening causing a shift and increase in the winds. Temperatures will be cooler on Friday with slightly higher humidity readings, but the winds will remain gusty throughout the day.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Partly cloudy becoming mostly cloudy in the afternoon.

Max Temperature: Lower Elevation 78 to 83 and 74 to 79 mid-slopes.

Min RH: 17 to 22 percent.

20 ft WINDS:

Lower Valleys: Terrain driven winds 3 to 8 mph becoming west 5 to 10 mph gusts to 15 mph in the afternoon.

Mid-slopes and Ridges: Terrain driven winds 3 to 8 mph becoming South 5 to 10 mph gusts to 15 mph in the afternoon.

HAINES INDEX: 4 Low.

TRANSPORT WINDS: S 10 mph.

INVERSION: 500 ft inversion lifting to 6000 ft by afternoon.

TONIGHT:

SKY/WEATHER: Mostly cloudy becoming mostly clear after midnight

Min Temperature: 49 to 54.

Max RH: 43 to 48 percent, except 50 to 60 percent lower elevations.

20 ft Wind

Valleys/Lower Slopes: West 5 to 10 mph.

Mid-Slopes and Ridges: South 5 to 10 mph becoming west 8 to 13 mph with gusts to 20 mph after midnight.

INVERSION: Developing after 2000 hrs near 1500 ft.

FRIDAY:

SKY/WEATHER: Partly cloudy becoming mostly cloudy in the afternoon.

Max Temperature: High 68 to 73 lower elevations and 68 to 73 upper slopes/ridges.

Min RH: 24 to 29 percent.

20 ft WINDS:

Lower Valleys: West 5 to 10 mph. Gusts to 25 mph in the afternoon.

Mid-slopes and Ridges: West 10 to 15 mph gusts to 25 mph.

HAINES INDEX: 3 Very Low.

TRANSPORT WINDS: W 21 mph.

Weather observations can be texted to 406-360-6330 or emailed to trent.smith@noaa.gov

Fire Behavior Forecast # 2

Name of Incident: Pioneer Fire WA-SES-000173	Administrative Unit: SE Region DNR / Okanagan-Wenatchee NF
Date & Time Issued: 1900 – 6/12/2024	Operational Period: Day 6/13/2024

FBAN: Dean Warner	Signed:
-----------------------------	----------------

Weather Summary - See attached Spot Weather Forecast.
 Sunny and dry with seasonal average temperatures, evening clouds.

Fire Behavior Summary

	FUEL MODEL	Maximum ROS	Backing ROS	Maximum Flame length	Backing Flame length
General – Max. spot distance: 0.25 mi. Probability of Ignition: 50% Haines Index: 4 (low) LAL: 1 ERC – Y: 43 (78 percentile)	GR2 - Moderate load grass shrub	3 ch/hr	½ ch/hr	1 feet	1 feet
	SH2 - Moderate load shrub	2 ch/hr	½ ch/hr	2 feet	1 feet
	TU5 – Very high load timber shrub	8 ch/hr	½ ch/hr	7 feet	2 feet
	TL8 – Long needle timber litter	6 ch/hr	½ ch/hr	3 feet	1 feet

General: The fire will remain active today. Expect fire to move up lake, down lake, and uphill on the north side of the lake. Down lake, fire has established in Rex Creek and will continue to move SE but impacts to Rattlesnake Creek are not expected during this shift. Up lake, the fire will back down into Cascade Creek creating potential for a slope reversal during today’s shift. Fire will move uphill to the NE and lose energy around mid-slope where fuels tend to be green and sparse. Spotting has been observed up to one quarter mile down range.

Fuels: The fire is burning in the old Rex Creek burn scar from 2001. This 23 year old fire scar has left behind a mosaic of fuels including a moderate load of heavy fuel, which is dry enough to sustain fire spread. Timber stringers in valleys and draws tend to contain concentrations of available fuel. Rock outcrops can sever the fuel continuity but dry grass and sparse dead and downed material in rocky areas can still maintain fire movement.

Topography: This fire lies on the north slopes of the lake providing a very dry southwest aspect. Steep rugged terrain dominates the fire environment. Rolling material and short upslope runs will pose a significant safety risk. Several natural barriers in the form of rock outcrops and scree slopes are present in the fire area. Evaluate natural barriers for absolute lack of fuel prior to utilizing as a containment feature. Expect slope reversals to be more dramatic than usual as this type of fire movement will present in severe contrast from backing ROS.

ERC: Due to the time of year, Energy Release Component values remain below the 90th percentile. The dry aspect, lake winds, and steep slopes offer ample opportunity for this fire to remain active.

Air Ops/Smoke Dispersion

Smoke from active fire may impact visibility for air operations; otherwise no impacts are expected.

Safety

Standard Order Number 2 is emphasized today: **Know what your fire is doing at all times.** Pay attention to radio traffic, reports from other Divisions, and Air Resources. Observe the situation personally, or use scouts. The threat for active fire movement is real and remains high.

DIVISION ASSIGNMENT LIST			1. Branch I		2. Division A

Resource Guidelines for Uplake Fire Suppression

Fire: Pioneer

Location: Pioneer Creek, North shore of Lake Chelan

Date: 6/11/2024

Resource Advisors

Lead READ: Brigitte Ranne 509-663-6118, brigitte.ranne@usda.gov

REAF trainee: Hector Rodriguez

HUMAN SAFETY IS THE HIGHEST PRIORITY FOR EVERY EMERGENCY RESPONSE ACTION

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.

Cultural Resources

- If cultural resources are discovered during suppression activities, leave on site and notify READ.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
