

FINANCE MESSAGE

Finance Email: 2024.pioneer.finance@firenet.gov

Finance Phones: *Equipment (208) 891-6877 & TIME (208) 891-8036*

This incident requires electronic documentation. Please email your time to the address above. Scanned PDF's please, no.jpeg's. Feel free to call finance for help if needed. Scanners are also available at ICP.

Required Documents

Overhead, Agency Crews & Cooperators	Contract Resources
Finance docs needed: Resource Order, Manifest, Cooperative Agreement, Casual Hire Form w/ECI# (as applicable)	Finance docs needed: Resource Order, Manifest, Full Contract/Agreement, Certifications (<i>if required</i>) Pre-Inspection
Daily: CTRs, Shift Tickets	Daily: CTRs, Shift Tickets, receipts (claims, etc.) NOTE: Document travel times and odometer readings
Demob: Signed OF-288; Signed OF-286	Demob: Contractor Evaluations, Shift Tickets, receipt(s) for Addition/Deductions, Post-Inspection, Signed OF-286
Additional Incident Information:  Cooperators and AD's... PLEASE email us your agreements!	Please call finance regarding issues with your time: O-15 James, Matthew O-49 Zemke, Jeremy O-16 Gregory, Spencer O-67 Lathrop, Adam O-24 Cronk, Charlie C-2 Wenatchee River

Incident Name: **Pioneer**
 Incident Number: **WA-SES-000173**
 Financial codes:
 WA DNR – **221-LDW**
 DOI – **RZ79**
 USDA – **PNRZ79 (1522)**

Please make sure you check in using QR code on the front of the IAP and then email your time daily.
THANK YOU!!

CHECK-IN	DEMOB
Please complete the virtual check-in process via the QR code on the front cover. You are not checked in until you provide the following: <ul style="list-style-type: none"> • Red Cards • Roster/Manifest Please email documents to: 2024.pioneer.demob@firenet.gov	Fliers complete the “Air Travel Request” via the QR code on the front cover 72 hours prior to flight date. <ul style="list-style-type: none"> • Return supplies to the Cache • Return radios, antennas, etc., to Communications • Contact Finance about closing out your paperwork Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.

If you have any questions about Check-In or DEMOB please email demob at 2024.pioneer.demob@firenet.gov or call 509-661-5372. Please include your request number in the subject line when emailing.

INCIDENT OBJECTIVES	1. Incident Name Pioneer	2. Date June 15, 2024	3. Time 2000
4. Operational Period: 06/16 0600-2200			
5. General Objectives: Implement suppression strategies and objectives for short/long-term planning. <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard identification and application of a shared risk management process. • Coordinate public information to provide timely updates to agency partners, cooperators, and the public. • Coordinate suppression activities with READs to identify current and future impacts on the landscape. • Effectively manage and track costs with daily IAP reporting. • Coordinate with agency leadership/administrators to ensure effective and efficient management of firefighting resources. • Identify best course of action for firefighter support, both logistically and operationally. Operational objectives: <ul style="list-style-type: none"> • Implement a point protection strategy to protect private and federal infrastructure. • Triage additional infrastructure within fire planning area to minimize the potential impact to these sites. • Communicate with local law enforcement officials to ensure current and potential evacuations is coordinated. • Evaluate current fire conditions, identify/utilize features that could lead to fire growth, and validate strategic indirect (new/historical) control lines. • Utilize appropriate tactics for current/future fire environment and the predominantly wilderness landscape . • Develop a long-term strategic plan for suppression of the incident. 			
5a. Incident Requirements <ul style="list-style-type: none"> • Provide Agency Administrator updates and briefings on incident status. • Firefighting operations will implement tactics that offer the highest probability of success to minimize impacts to the landscape and minimize unnecessary exposure to firefighters. • Incident values are firefighter and public safety, critical infrastructure, private land and natural resources. 			
5b. Leaders Intent <ul style="list-style-type: none"> • Safety: Firefighter, public, boat and aviation safety will be addressed through DRA process. • ISAP: Engage agencies with strategic alignment process, for shared values at risk. • Communication: Keep Agency Administrators and firefighters informed of strategic actions, accomplishments, and challenges. • Operations: Make informed strategic/tactical decisions suppressing the fire in the right geographic locations with the appropriate resources and highest probability of success. • Stakeholders: Collaborate with local partners, officials, and landowners to provide situational updates pertinent to the fire. • Logistics: Provide support ensuring food, water, and shelter for incident responders. • Human Resources: Ensure that all incident personnel are treated with dignity and respect, while having zero tolerance for harassment, alcohol, or illegal drug use. • Public Information: Provide timely and accurate information through media outlets, briefings, and social platforms as needed. • Finance: Monitor and communicate incident cost associated with meeting incident objectives. • Planning: Provide incident documentation, resource tracking, and meeting management.

Fire Weather Forecast

FORECAST NO: 04
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Sunday 6/16/2024

INCIDENT: Pioneer Fire

SIGNED: Trent Smith *Trent P. Smith*

TIME AND DATE ISSUED: 6/15/2024 1800 hrs

Incident Meteorologist (IMET)

Discussion:

A second low pressure system will be moving through the region today causing a band of precipitation to move southward out of British Columbia. The Sawtooth Ridge is anticipated to cause some downsloping effects, limiting the amount of precipitation that reaches the fire. Temperatures will be similar to yesterday with slightly higher humidity. The winds will continue to be out of the northwest, but will not be as strong as the past couple of days.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Mostly clear becoming mostly cloudy in the afternoon. 40% chance of rain in the afternoon.

Max Temperature: 56 to 61.

Min RH: 37 to 42 percent.

20 ft WINDS:

Lower Valleys: Northwest 5 to 10 mph.

Mid-slopes and Ridges: Northwest 5 to 10 mph gusts to 20 mph.

HAINES INDEX: 2 Very Low.

TRANSPORT WINDS: NW 12 mph.

INVERSION: 1500 ft inversion lifting to 6000 ft by afternoon.

TONIGHT:

SKY/WEATHER: Mostly cloudy becoming partly cloudy after midnight. 20% chance of rain in the evening.

Min Temperature: Lower elevation 48 to 53 and midslope/ridges 39 to 44.

Max RH: 65 to 70 percent.

20 ft Wind:

Valleys/Lower Slopes: Northwest 5 to 10 mph decreasing to around 5 mph after midnight.

Mid-Slopes and Ridges: Northwest 5 to 10 mph with gusts to 20 mph.

INVERSION: Developing after 2000 hrs near 1500 ft.

MONDAY:

SKY/WEATHER: Partly cloudy. 20% chance of rain showers in the afternoon.

Max Temperature: High 62 to 67.

Min RH: 33 to 38 percent.

20 ft WINDS:

Lower Valleys: Northwest 5 to 10 mph. Gusts to 20 mph in the afternoon.

Mid-slopes and Ridges: Northwest 5 to 10 mph gusts to 25 mph.

HAINES INDEX: 3 Very Low.

TRANSPORT WINDS: NW 15 mph.

Yesterdays observations thru 1700	Min Temp	Max RH	Max Temp	Min RH	Peak Wind	Precipitation
Stehekin RAWS (1230')	54	59%	61	31%	24 mph	0.00
Lake Chelan Airport (1260')	55	44%	64	24%	37 mph	0.00
Entiat RAWS (2825')	49	52%	57	33%	44 mph	0.00
Camp 4 RAWS (3156')	46	65%	60	32%	22 mph	0.00

Weather observations can be texted to 406-360-6330 or emailed to trent.smith@noaa.gov

Fire Behavior Forecast # 5

Name of Incident: Pioneer Fire WA-SES-000173	Administrative Unit: SE Region DNR / Okanagan-Wenatchee NF
Date & Time Issued: 1900 – 6/15/2024	Operational Period: Day 6/16/2024
FBAN: Dean Warner	Signed: 

Weather Summary - See attached Pioneer Fire Weather Forecast.
Cool, chance of rain, gusty NW winds.

Fire Behavior Summary

General – <u>Spotting potential:</u> 0.25 + mi. <u>Probability of Ignition:</u> 60% <u>Haines Index:</u> 3 (low) <u>LAL:</u> 1 <u>ERC – Y:</u> 39 (72 percentile)	FUEL MODEL	Maximum ROS	Backing ROS	Maximum Flame length	Backing Flame length
	GR2 - Moderate load grass shrub	13 ch/hr	3 ch/hr	1 feet	1 feet
	SH2 - Moderate load shrub	7 ch/hr	3 ch/hr	2 feet	1 feet
	TU5 – Very high load timber shrub	16 ch/hr	6 ch/hr	7 feet	2 feet
	TL8 – Long needle timber litter	12 ch/hr	4 ch/hr	3 feet	1 feet

GENERAL

Today's conditions will support active fire spread. Fire is now established in Meadow Creek on the north side of the fire and Rattlesnake Creek on the south side of the fire. To the east, the fire continues to make progress to the ridge line of Skookum Puss Mountain. Spotting has been observed up to one quarter mile and could exceed that today.

Topography: This fire lies on the north slopes of Lake Chelan on a dry southwest aspect. Steep rugged terrain dominates the fire environment. Rolling material and short upslope fire runs will pose a safety risk. Several natural barriers in the form of rock outcrops and scree slopes are present in the fire area. Expect slope reversals to be more dramatic than usual as this type of fire movement will present in severe contrast from downhill backing rate of spread. Rolling debris will enhance backing rates of spread.

Fuels: The fire is burning in the old Rex Creek burn scar from 2001. This 23 year old fire scar has left behind a mosaic of fuels including a moderate load of heavy fuel, which is dry enough to sustain fire spread. Rock outcrops can disrupt the fuel continuity but dry grass and sparse dead and downed material in rocky areas can still maintain fire progression.

ERC: Due to the time of year, Energy Release Component values remain below the 90th percentile. The dry aspect, lake winds, and steep slopes offer ample opportunity for this fire to outperform typical fire indices.

SPECIFIC

North Side: Expect the fire in Meadow Creek to burn up to the north into a no-name drainage but fire progression through the Round Lake saddle will be hampered with steady NW winds.

South Side: Expect fire to establish in the Prince Creek valley. Prince Creek is flowing strong this time of year so spotting represents the best chance for the fire to cross the creek. Watch for spotting on the lower slopes where the ridge to valley difference is the least.

Ridgetop: Fire will continue to advance to the top of Skookum Puss Mountain and associated ridgeline that defines the west side of Prince Creek.

Air Ops/Smoke Dispersion

Smoke from active fire may impact visibility for air operations.

Safety

Short intense fire runs and spotting in excess of one quarter mile is possible today. Make sure you know where your safety zones are located and the time it takes to get there.

DIVISION ASSIGNMENT LIST			1. Branch I		2. Division A	
3. Incident Name Pioneer			4. Operational Period Date: 06/16/2024 Time: 0600-2200

		Meal count	90			
7. Control Operations: Task: Contain fire spread to the northwest where terrain and fuels allow for highest probability of success. Assess fire perimeter progression to the north and east at higher elevations. Implement point protection efforts on federal & private infrastructure. Purpose: To slow fire progression, provide time for suppression tactics, and prep around critical values. End state: Minimize fire impacts to critical values including private inholdings and Forest Service infrastructure.						
8. Special Instructions: In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary. Minimize ground disturbance on the Moore Point and Meadow Creek alluvial fans in order to protect sensitive resources. 24, 48, 72 hour planning/logistical support will be paramount to our success.						
9. Division/Group Communication Summary

7. Control Operations: Task: Evaluate and assess structures from Flick Creek to the community of Stehekin. Look for opportunities to contain fire spread in and around Flick Creek area where terrain and fuels allow for high probability of success. Purpose: Minimize fire impacts to critical values including private inholdings, the town of Stehekin, and Forest Service infrastructure. End state: Critical values including private inholdings, the town of Stehekin, and Forest Service infrastructure are not impacted by the Pioneer fire, while minimizing fire impacts and acres burned utilizing historic wildfire control features and natural barriers.							
8. Special Instructions: In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. OKANOGAN-WENATCHEE NATIONAL FOREST

Resource Guidelines for Uplake Fire Suppression

Fire: Pioneer

Location: Pioneer Creek, North shore of Lake Chelan

Date: 6/11/2024

Resource Advisors

Lead READ: Brigitte Ranne 509-663-6118, brigitte.ranne@usda.gov

REAF trainee: Hector Rodriguez

HUMAN SAFETY IS THE HIGHEST PRIORITY FOR EVERY EMERGENCY RESPONSE ACTION

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.

Cultural Resources

- If cultural resources are discovered during suppression activities, leave on site and notify READ.

Crupina Seed

Location of common crupina infestations (north shore of Lake Chelan only). The infestation shown at Lucerne is knapweed.

LOGISTICS HOURS

Shower: 0500 - 1200 & 1400 - 2200

Supply: 0600 - 2200

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (*if different*): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
