Health & Safety Message

Managing Change

Change occurs at every moment of every day. Transitions between work shifts, personnel, line assignments, fuels, weather, topography, and other variables are prime opportunities for accidents to occur. Recognizing change and managing it appropriately is every firefighter's responsibility.

Three Technics for Managing Change

- Anticipate Look for it:** Maintain your situational awareness throughout your shift and always anticipate change.
- Ask Questions:** Understand it: Get more information and ask questions. Remember to include all personnel, including subordinates, when information gathering.
- Take Action & Address it:** Take the time to mitigate all hazards and make them known. Stay flexible to adjust your tactics as necessary.

Communications is the best tool to begin understanding and addressing change appropriately. Include all personnel and means necessary to fully identify and communicate change.

Change is Here, Be Mindful and Act Appropriately

Incident Name: **Pioneer**
 Incident Number: **WA-SES-000173**
 Financial codes:
 WA DNR – **221-LDW**
 DOI – **RZ79**
 USDA – **PNRZ79 (1522)**

Please make sure you check in using QR code on the front of the IAP and then email your time daily.
THANK YOU!!

CHECK-IN

Please complete the virtual check-in process via the QR code on the front cover.

You are not checked in until you provide the following:

- Red Cards
- Roster/Manifest

Please email documents to:
2024.pioneer.demob@firenet.gov

DEMOB

Fliers complete the “Air Travel Request” via the QR code on the front cover 72 hours prior to flight date.

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork

Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.

If you have any questions about Check-In or DEMOB please email demob at 2024.pioneer.demob@firenet.gov or call 509-661-5372. Please include your request number in the subject line when emailing.

INCIDENT OBJECTIVES	1. Incident Name Pioneer	2. Date June 16, 2024	3. Time 2000
4. Operational Period: 06/17 0600-2200			
5. General Objectives: Implement suppression strategies and objectives for short/long-term planning. <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard identification and application of a shared risk management process. • Coordinate public information to provide timely updates to agency partners, cooperators, and the public. • Coordinate suppression activities with READs to identify current and future impacts on the landscape. • Effectively manage and track costs with daily IAP reporting. • Coordinate with agency leadership/administrators to ensure effective and efficient management of firefighting resources. • Identify best course of action for firefighter support, both logistically and operationally. Operational objectives: <ul style="list-style-type: none"> • Implement a point protection strategy to protect private and federal infrastructure. • Triage additional infrastructure within fire planning area to minimize the potential impact to these sites. • Communicate with local law enforcement officials to ensure current and potential evacuations is coordinated. • Evaluate current fire conditions, identify/utilize features that could lead to fire growth, and validate strategic indirect (new/historical) control lines. • Utilize appropriate tactics for current/future fire environment and the predominantly wilderness landscape . • Develop a long-term strategic plan for suppression of the incident. 			
5a. Incident Requirements <ul style="list-style-type: none"> • Provide Agency Administrator updates and briefings on incident status. • Firefighting operations will implement tactics that offer the highest probability of success to minimize impacts to the landscape and minimize unnecessary exposure to firefighters. • Incident values are firefighter and public safety, critical infrastructure, private land and natural resources. 			
5b. Leaders Intent <ul style="list-style-type: none"> • Safety: Firefighter, public, boat and aviation safety will be addressed through DRA process. • ISAP: Engage agencies with strategic alignment process, for shared values at risk. • Communication: Keep Agency Administrators and firefighters informed of strategic actions, accomplishments, and challenges. • Operations: Make informed strategic/tactical decisions suppressing the fire in the right geographic locations with the appropriate resources and highest probability of success. • Stakeholders: Collaborate with local partners, officials, and landowners to provide situational updates pertinent to the fire. • Logistics: Provide support ensuring food, water, and shelter for incident responders. • Human Resources: Ensure that all incident personnel are treated with dignity and respect, while having zero tolerance for harassment, alcohol, or illegal drug use. • Public Information: Provide timely and accurate information through media outlets, briefings, and social platforms as needed. • Finance: Monitor and communicate incident cost associated with meeting incident objectives. • Planning: Provide incident documentation, resource tracking, and meeting management.

Fire Weather Forecast

FORECAST NO: 05
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Monday 6/17/2024

INCIDENT: Pioneer Fire

SIGNED: Trent Smith *Trent P. Smith*

TIME AND DATE ISSUED: 6/16/2024 1800 hrs

Incident Meteorologist (IMET)

Discussion: A broad trough of low pressure will be over the region for the next couple of days. Temperatures will be warming slightly each day with lower humidity readings. The northwesterly winds will be gusty once again this afternoon and evening. The threat of showers and even thunderstorms exists during the afternoon.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Partly cloudy. 20% chance of rain showers in the afternoon. 5% chance of a thunderstorm in the afternoon.

MAX TEMPERATURE: 68 to 73.

MIN RH: 29 to 34 percent.

20 FT WINDS:

Lower Valleys: Northwest 5 to 10 mph. Gusts to 25 mph in the afternoon.

Mid-slopes and Ridges: Northwest 5 to 10 mph increasing 10 to 15 mph gusts to 35 mph in the afternoon.

HAINES INDEX: 3 Very Low.

TRANSPORT WINDS: NW 20 mph.

INVERSION: 1500 ft inversion lifting to 7000 ft by afternoon.

TONIGHT:

SKY/WEATHER: Partly cloudy. 15% chance of rain showers in the evening.

MIN TEMPERATURE: 46 to 51.

MAX RH: 60 to 65 percent.

20 FT WINDS:

Valleys/Lower Slopes: Northwest 5 to 10 mph decreasing to around 5 mph after midnight.

Mid-Slopes and Ridges: Northwest 8 to 12 mph with gusts to 25 mph decreasing 5 to 10 mph.

INVERSION: Developing after 2000 hrs near 1000 ft.

TUESDAY:

SKY/WEATHER: Partly cloudy. 20% chance of rain showers and a 10% chance of thunderstorms in the afternoon.

MAX TEMPERATURE: High 72 to 77.

MIN RH: 25 to 30 percent.

20 FT WINDS:

Lower Valleys: Northwest 5 to 10 mph.

Mid-slopes and Ridges: Northwest 5 to 10 mph. Gusts to 25 mph in the afternoon.

HAINES INDEX: 3 Very Low.

TRANSPORT WINDS: NW 12 mph.

Yesterdays observations thru 1700	Min Temp	Max RH	Max Temp	Min RH	Peak Wind	Precipitation
Stehekin RAWS (1230')	44	65%	67	24%	24 mph	0.00
Lake Chelan Airport (1260')	46	50%	66	17%	33 mph	0.00
Entiat RAWS (2825')	43	59%	61	24%	27 mph	0.00
Camp 4 RAWS (3156')	39	65%	65	22%	14 mph	0.00

Weather observations can be texted to 406-360-6330 or emailed to trent.smith@noaa.gov

Fire Behavior Forecast # 6

Name of Incident: Pioneer Fire WA-SES-000173	Administrative Unit: SE Region DNR / Okanagan-Wenatchee NF
Date & Time Issued: 1900 – 6/16/2024	Operational Period: Day 6/17/2024
FBAN: Dean Warner	Signed:

Weather Summary - See attached Pioneer Fire Weather Forecast.

Fire Behavior Summary

	FUEL MODEL	Maximum ROS	Backing ROS	Maximum Flame length	Backing Flame length
General – Spotting potential: 0.25 + mi. Probability of Ignition: 60% Haines Index: 3 (low) LAL: 1 ERC – Y: 39 (72 percentile)	GR2 - Moderate load grass shrub	13 ch/hr	3 ch/hr	1 feet	1 feet
	SH2 - Moderate load shrub	7 ch/hr	3 ch/hr	2 feet	1 feet
	TU5 – Very high load timber shrub	16 ch/hr	6 ch/hr	7 feet	2 feet
	TL8 – Long needle timber litter	12 ch/hr	4 ch/hr	3 feet	1 feet

GENERAL

Today's conditions will support active fire spread. Fire is now established in Meadow Creek on the north side of the fire and Rattlesnake Creek on the south side of the fire but has not crossed either at this time. To the east, the fire continues to make progress to the ridge line of Skookum Puss Mountain. Spotting has been observed up to one quarter mile.

Topography: This fire lies on the north slopes of Lake Chelan on a dry southwest aspect. Steep rugged terrain dominates the fire environment. Rolling material and short upslope fire runs will pose a safety risk. Several natural barriers in the form of rock outcrops and scree slopes are present in the fire area. Expect slope reversals to be more dramatic than usual as this type of fire progression will present in severe contrast from downhill backing rate of spread. Rolling debris will enhance backing rates of spread.

Fuels: The fire is burning in the old Rex Creek burn scar from 2001. This 23 year old fire scar has left behind a mosaic of fuels including a moderate load of heavy fuel, which is dry enough to sustain fire spread. Rock outcrops can disrupt the fuel continuity but dry grass and sparse dead and downed material in rocky areas can still maintain fire progression.

ERC: Due to the time of year, Energy Release Component values remain below the 90th percentile. The dry aspect, lake winds, and steep slopes offer ample opportunity for this fire to outperform typical fire indices.

SPECIFIC

Alpha: Fire may be hung up on Meadow Creek. If the fire were to establish on the north side of Meadow Creek expect the fire to burn north into a no-name drainage, while progression east will be hindered through the Round Lake saddle against steady NW winds.

Zulu: Expect fire to establish in the Prince Creek drainage. Prince Creek is flowing strong this time of year so spotting represents the best chance for the fire to cross the creek. Watch for spotting on the lower slopes where the ridge to valley difference is the least.

Ridgetop: Fire will continue to advance to the top of Skookum Puss Mountain and associated ridgeline that defines the west side of Prince Creek.

Air Ops/Smoke Dispersion

Smoke from active fire may impact visibility for air operations.

Safety

Today is a new day, update your expectations to fit current conditions. This fire is persistent in finding opportunity to grow where few elements remain consistent. This fire will continue to challenge our plans, progress, and accomplishments. Remain flexible for whatever turn this fire takes next. Prepare and plan for it with LCES always in place.

DIVISION ASSIGNMENT LIST			1. Branch I		2. Division A	
3. Incident Name Pioneer			4. Operational Period Date: 06/17/2024 Time: 0600-2200			
5. Operations Personnel						
Operations Chief		John Spencer Whitney Machado - t		Branch Director		Matt James
Safety Officer		Ray Hershey		Division Supervisor		Eric Thorp Chris Carr - t
6. Resources Assigned this Period

		Meal count	92			
7. Control Operations: Task: Contain fire spread to the northwest where terrain and fuels allow for highest probability of success. Assess fire perimeter progression to the north and east at higher elevations. Implement point protection efforts on federal & private infrastructure. Purpose: To slow fire progression, provide time for suppression tactics, and prep around critical values. End state: Minimize fire impacts to critical values including private inholdings and Forest Service infrastructure.						
8. Special Instructions: In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary. Minimize ground disturbance on the Moore Point and Meadow Creek alluvial fans in order to protect sensitive resources. Ensure hazard mitigations and IWI protocols are in place before taking action.						
9. Division/Group Communication Summary						
See Communications Plan

7. Control Operations: Task: Prepare 8200 Rd (Grade Creek Rd) to be utilized for mobilization of division S resources. Purpose: The 8200 roadbed and shoulders are clear of hazards. Provide a safer travel route for responders. End state: 8200 Rd is graded and brushed from Mitchell Creek to Safety Harbor Creek.						
8. Special Instructions: Ensure hazard mitigations and IWI protocols are in place before taking action.						
9. Division/Group Communication Summary See Communications Plan

7. Control Operations: Task: Complete a comprehensive inventory of critical values, proposed control line options to protect those values and the risk to responders associated with those actions in SA4. Purpose: To analyze the strategy as probability vs success. End state: A long term durable strategic plan for the Pioneer Fire.						
8. Special Instructions: In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary. Ensure hazard mitigations and IWI protocols are in place before taking action.

OKANOGAN-WENATCHEE NATIONAL FOREST

Resource Guidelines for Uplake Fire Suppression

Fire: Pioneer

Location: Pioneer Creek, North shore of Lake Chelan

Date: 6/11/2024

Resource Advisors

Lead READ: Brigitte Ranne 509-663-6118, brigitte.ranne@usda.gov

REAF trainee: Hector Rodriguez

HUMAN SAFETY IS THE HIGHEST PRIORITY FOR EVERY EMERGENCY RESPONSE ACTION

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.

Cultural Resources

- If cultural resources are discovered during suppression activities, leave on site and notify READ.

Crupina Seed

Location of common crupina infestations (north shore of Lake Chelan only). The infestation shown at Lucerne is knapweed.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
