Health & Safety Message

Safety Margin

Our operational fire environment is both complex and dynamic.

1. Complex environments are made up of countless conditions such as physical, fuels, weather, topography and the complexity of the fire itself.
2. Personal values, beliefs, biases, experience and emotional state.
3. Dynamic is constantly changing hourly, daily or long term.

Margins acknowledge the complexity and help envision the environment. It is a collective state of the environment and your position in it. Since the fire environment is dynamic, the margin is increasing or decreasing constantly.

Decreasing margins limit the room for error and potential for uncertainty. This limits your options and can reduce the point where unintended or undesired outcomes are inevitable. Increases risk.

Increasing the margin increases the room for errors and uncertainty. More options are available and reduce the chance of unintended outcomes. Limits risk.

You can control the margin by identifying the variables that are assessed within the confines of the margin. You can minimize margins and adverse outcomes by Risk management, LCEs, Fire Orders and Watch out situations.

Make it a Safe Day

FINANCE MESSAGE

Finance Email: 2024.pioneer.finance@firenet.gov

Finance Phones: *Equipment (208) 891-6877 & TIME (208) 891-8036*

This incident requires electronic documentation. Please email your time to the address above. Scanned PDF's please, no .JPG's. Feel free to call finance for help if needed. Scanners are also available at ICP.

Required Documents

Overhead, Agency Crews & Cooperators	Contract Resources
Finance docs needed: Resource Order, Manifest, Cooperative Agreement, Casual Hire Form w/ECI# (as applicable)	Finance docs needed: Resource Order, Manifest, Full Contract/Agreement, Certifications (<i>if required</i>) Pre-Inspection
Daily: CTRs, Shift Tickets	Daily: CTRs, Shift Tickets, receipts (claims, etc.) NOTE: Document travel times and odometer readings
Demob: Signed OF-288; Signed OF-286	Demob: Contractor Evaluations, Shift Tickets, receipt(s) for Addition/Deductions, Post-Inspection, Signed OF-286
<p>"H-Pay"- Entitlement to Hazardous Pay Differential (5 CFR 550.904) – Hazard pay MUST be supported by a justification. If justification is not provided, you chance losing your entitlement.</p>	<p>Please call finance regarding issues with your time:</p> <p>E-104 Havillah Logging E-105 Justin Pitts</p>

Incident Name: **Pioneer**
 Incident Number: **WA-SES-000173**
 Financial codes:
 WA DNR – **221-LDW**
 DOI – **RZ79**
 USDA – **PNRZ79 (1522)**

Please make sure you check in using QR code on the front of the IAP and then email your time daily.
THANK YOU!!

CHECK-IN	DEMOB
<p>Please complete the virtual check-in process via the QR code on the front cover.</p> <p>You are not checked in until you provide the following:</p> <ul style="list-style-type: none"> Red Cards Roster/Manifest <p>Please email documents to: 2024.pioneer.demob@firenet.gov</p>	<p>Fliers complete the "Air Travel Request" via the QR code on the front cover 72 hours prior to flight date.</p> <ul style="list-style-type: none"> Return supplies to the Cache Return radios, antennas, etc., to Communications Contact Finance about closing out your paperwork <p>Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.</p>

If you have any questions about Check-In or DEMOB please email demob at 2024.pioneer.demob@firenet.gov or call 509-661-5372. Please include your request number in the subject line when emailing.

INCIDENT OBJECTIVES	1. Incident Name Pioneer	2. Date June 23, 2024	3. Time 2000												
4. Operational Period: 06/24 0600-2200															
5. General Objectives: Implement suppression strategies and objectives for short/long-term planning. <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard identification and application of a shared risk management process. • Coordinate public information to provide timely updates to agency partners, cooperators, and the public. • Coordinate suppression activities with READs to identify current and future impacts on the landscape. • Effectively manage and track costs with daily IAP reporting. • Coordinate with agency leadership/administrators to ensure effective and efficient management of firefighting resources. • Identify best course of action for firefighter support, both logistically and operationally. Operational objectives: <ul style="list-style-type: none"> • Implement a point protection strategy to protect private and federal infrastructure. • Triage additional infrastructure within fire planning area to minimize the potential impact to these sites. • Communicate with local law enforcement officials to ensure current and potential evacuations is coordinated. • Evaluate current fire conditions, identify/utilize features that could lead to fire growth, and validate strategic indirect (new/historical) control lines. • Utilize appropriate tactics for current/future fire environment and the predominantly wilderness landscape . • Develop a long-term strategic plan for suppression of the incident. 															
5a. Incident Requirements <ul style="list-style-type: none"> • Provide Agency Administrator updates and briefings on incident status. • Firefighting operations will implement tactics that offer the highest probability of success to minimize impacts to the landscape and minimize unnecessary exposure to firefighters. • Incident values are firefighter and public safety, critical infrastructure, private land and natural resources. 															
5b. Leaders Intent <ul style="list-style-type: none"> • Safety: Firefighter, public, boat and aviation safety will be addressed through DRA process. • ISAP: Engage agencies with strategic alignment process, for shared values at risk. • Communication: Keep Agency Administrators and firefighters informed of strategic actions, accomplishments, and challenges. • Operations: Make informed strategic/tactical decisions suppressing the fire in the right geographic locations with the appropriate resources and highest probability of success. • Stakeholders: Collaborate with local partners, officials, and landowners to provide situational updates pertinent to the fire. • Logistics: Provide support ensuring food, water, and shelter for incident responders. • Human Resources: Ensure that all incident personnel are treated with dignity and respect, while having zero tolerance for harassment, alcohol, or illegal drug use. • Public Information: Provide timely and accurate information through media outlets, briefings, and social platforms as needed. • Finance: Monitor and communicate incident cost associated with meeting incident objectives. • Planning: Provide incident documentation, resource tracking, and meeting management.

Fire Weather Forecast

FORECAST NO: 12
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Monday 6/24/2024

INCIDENT: Pioneer Fire

SIGNED: Trent Smith *Trent P. Smith*

TIME AND DATE ISSUED: 6/23/2024 1800 hrs

Incident Meteorologist (IMET)

Discussion: Westerly flow aloft will be over the fire today causing warming and drying. The winds will remain out of the northwest, but significantly lighter compared to yesterday. A ridge builds over the region on Tuesday keeping the warming and drying with southeasterly winds.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Mostly Sunny.

MAX TEMPERATURE: 76 to 81.

MIN RH: 20 to 25 percent.

20 FT WINDS:

Lower Valleys: Northwest 5 to 10 mph gusts to 15 mph.

Mid-slopes and Ridges: Northwest 5 to 10 mph gusts to 15 mph.

HAINES INDEX: 3 Very Low: Stability-1 & Moisture-2 **TRANSPORT WINDS:** W 15 mph.

INVERSION: 700 ft inversion starting to lift at 1000 with a max of 4000 ft by 1600.

TONIGHT:

SKY/WEATHER: Mostly Clear.

MIN TEMPERATURE: 53 to 58.

MAX RH: Valley - 61 to 66 percent: Midslope - 50 to 55 percent.

20 FT WINDS:

Valleys/Lower Slopes: Northwest 5 to 10 mph becoming terrain driven 2 to 6 mph after midnight.

Mid-Slopes and Ridges: Northwest 5 to 10 mph becoming terrain driven 3 to 8 mph after midnight.

INVERSION: Developing after 2000 hrs near 500 ft.

TUESDAY:

SKY/WEATHER: Partly Cloudy.

MAX TEMPERATURE: High 82 to 87.

MIN RH: 17 to 22 percent.

20 FT WINDS:

Lower Valleys: Terrain driven 2 to 6 mph becoming southeast 5 to 10 mph in the afternoon.

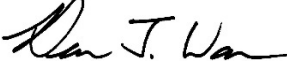

Mid-slopes and Ridges: Terrain driven 3 to 8 mph becoming southeast 5 to 10 mph in the afternoon.

HAINES INDEX: 3 Very Low. **TRANSPORT WINDS:** SE 10 mph.

Yesterdays observations thru 1700	Min Temp	Max RH	Max Temp	Min RH	Peak Wind	Precipitation
Stehekin RAWS (1230')	59	59%	74	25%	21 mph	0.00
Lake Chelan Airport (1260')	66	38%	73	20%	39 mph	N/A
Entiat RAWS (2825')	60	45%	68	28%	55 mph	0.00
Camp 4 RAWS (3156')	57	51%	71	28%	32 mph	0.00

Weather observations can be texted to 406-360-6330 or emailed to trent.smith@noaa.gov

Fire Behavior Forecast # 13

Name of Incident: Pioneer Fire WA-SES-000173	Administrative Unit: SE Region DNR / Okanagan-Wenatchee NF
Date & Time Issued: 1900 – 6/23/2024	Operational Period: Day 6/24/2024
FBAN: Dean Warner	Signed: 

Weather Summary - See attached Pioneer Fire Weather Forecast. Windy today.

Fire Behavior Summary

General – <u>Spotting potential:</u> 0.4 + mi. <u>Probability of Ignition:</u> 60% <u>Haines Index:</u> 3 (low) LAL: 1 <u>ERC – Y:</u> 44 (79 percentile)	FUEL MODEL	Maximum ROS	Backing ROS	Maximum Flame length	Backing Flame length
	GR2 - Moderate load grass shrub	3 ch/hr	1 ch/hr	1 feet	1 feet
	SH2 - Moderate load shrub	5 ch/hr	2 ch/hr	2 feet	1 feet
	TU5 – Very high load timber shrub	19 ch/hr	10 ch/hr	9 feet	2 feet
	TL8 – Long needle timber litter	19 ch/hr	6 ch/hr	5 feet	1 feet

GENERAL

Today's warm, dry, and windy conditions will support active fire behavior. A dry cold front will pass through today. Forecasted NW winds today will aid fire progression in the Cascade and upper Meadow Creek drainages. Fire is still pinned between Meadow Creek on the north end; and Prince Creek on the south. To the east, fire continues to make progress up the ridge line of Skookum Puss Mountain. Fire is spreading through backing and flanking aided with rollout and the ever-present Lake winds.

Topography: This fire lies on the north side of Lake Chelan on a dry southwest aspect. The Lake's influence on local winds dominate the fire environment. Natural barriers (rock outcrops and scree slopes) are present in the fire area. When slope reversals occur, a dramatic increase in fire spread will occur, more than you would normally expect. Rolling debris is likely to increase backing rates of spread.

Fuels: The fire is burning in the Rex Creek burn scar (2001). The 23 year old fire scar has left a mosaic of fuels including a moderate load of heavy fuels that are dry enough to sustain fire spread and retain heat. Rock outcrops provide breaks in fuel continuity. Cured dry grass and timber litter with downed dead material are the primary fuels promoting fire spread. There are snags and heavy fuel concentrations scattered throughout the fire area.

ERC: Due to the time of year, Energy Release Component values remain below the 90th percentile. The dry southwest aspect, Lake winds, and steep slopes offer ample opportunity for this fire to outperform typical fire indices.

SPECIFIC

Div A: If the fire crosses to the north side of Meadow Creek, expect a slope reversal that will produce rapid upslope spread with fingering runs in fine fuels. Round Lake saddle may provide localized channeled winds.

Div Z: Expect fire to continue flanking and backing south toward Prince Creek. Monitor for localized erratic winds at Lake Chelan. Winds will favor progression towards Prince Creek. Potential for spotting across Prince Creek is best in the lower reaches near or on the alluvial fan.

Div. H, S, D: Should not be impacted by fire activity today, monitor weather, smoke and radio closely.

Air Ops/Smoke Dispersion

Lake wind may be strong causing turbulence. Smoke from active fire may impact visibility for air operations.

Safety

Risks to fire line personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for incidents or injuries. Mitigate the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

7. Control Operations:		Meal count	67			
<p>Task: Begin construction of contingency lines around the community of Stehekin. Look for opportunities to contain fire spread in and around Flick Creek area where terrain and fuels allow for highest probability of success.</p> <p>Purpose: Minimize fire impacts to critical values including private inholdings, the community of Stehekin, and Forest Service infrastructure.</p> <p>End state: Critical values including private inholdings, the community of Stehekin, and Forest Service infrastructure are not impacted by the Pioneer fire, while minimizing fire impacts and acres burned utilizing historic wildfire control features and natural barriers.</p>						
8. Special Instructions:						
<ul style="list-style-type: none"> In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary. All operational personnel working on USFS lands will need to conduct a thorough inspection for invasive species seeds on boots including laces, clothing, and gear prior to entering NPS lands. Only fresh (direct from the cache) hose should be utilized on NPS lands to prevent the transport of invasive species seeds. Hose used on USFS lands should not be used on NPS lands and hose used on NPS lands should not be used on USFS lands to prevent the spread of invasives species seeds. Cargo loads being transported onto NPS lands should be inspected for invasive weed seed prior to flight. Ensure hazard mitigations and IWI protocols are in place before taking action. NPS Resource Avoidance Area Flagging is yellow with red polka dots. Contact NPS READs before working in areas where this flagging is present.

OKANOGAN-WENATCHEE NATIONAL FOREST

Resource Guidelines for Fire Suppression

Fire: Pioneer

Location: Pioneer Creek, North shore of Lake Chelan

Date: 6/18/2024

Resource Advisors

Lead READ: Brigitte Ranne 509-663-6118, brigitte.ranne@usda.gov

REAF: Hector Rodriguez 509-393-5379, Hector.Rodriguez3@usda.gov

REAF: Eireann Pederson 360-854-8197, eireann.pederson@usda.gov

HUMAN SAFETY IS THE HIGHEST PRIORITY FOR EVERY EMERGENCY RESPONSE ACTION

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.

- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.

In large or long term spike the camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If the camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary.

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat or **before entering National Park Service Land**.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.
- Weed wash all vehicles when they arrive to the incident and when demobed.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.
- Non-mechanized suppression activities are recommended within Riparian Reserves (150-300 ft from stream channel). For example, consider hand lines instead of dozer lines when feasible.

Retardant Use

- Retardant avoidance areas are present in the fire suppression area for both aquatic and terrestrial species.
- Track all retardant drops – locations and amounts.
- Report all mis-applications ASAP to READ. Monitoring and reporting of misapplications is required.

Wet Meadows

- No line or other disturbance in wet meadows in the Summer Blossom area (east of South Navarre campground above and below the 8200 road) and at Coyote and Poison Springs at the headwaters of their respective creeks.

Dry Meadows

- Minimize disturbance from staging and parking areas in dry meadows. These areas recovery slowly and are vulnerable to invasive plant infestation.

White Bark Pine

- Avoid cutting white bark pine whenever possible. Needles of 5 keep it alive! Ask READ for help with ID.

Burnout operations

- Plan to protect whitebark pine of all ages and mature cold and moist forest during burnouts. READ consultation and line officer approval is required for burn plans that include these forest types.
- During burnouts modify firing to retain large trees, large snags and large down wood in forests whenever possible.
- Minimize total acres burned in burnouts.
- Incorporate typical resource protection measures used in RX burning whenever it is safe and practical to do so (such as retention of green islands in moist areas).
- Provide a map of areas that were burned as part of the burnout operation (for use in emergency consultation).

Cultural Resources

- If cultural resources are discovered during suppression activities, leave on site and notify READ.

Human Resource Message

Pioneer Fire June 24, 2024

Thank You

We're demobing and going home tomorrow. CIMT-NW13 would like to thank each of you for the professional and competent manner in which you approached your fire assignment.

You were proactive at maintaining good work relationships and creating a harassment-free work environment. Due to your efforts, personnel-related issues on this incident have been minimal.

Thank you for a job well done. Our team looks forward to working with you again on future fire assignments.

I can do things you cannot, you can do things I cannot: together we can do great things.- *Mother Teresa* -

Margaret Dietrich, Human Resource Specialist, CIMT-NW13

18.	Tool, Combi	ea	48.	Chainsaw Kit	ea
19.	Tool, McLeod	ea	49.	Toilet Paper (96 per case)	cs
20.	Tool, Specify Type	ea	50.	1000 ft. Hose Lay Kit	ea
21.	Fusee	cs	51.	Garbage Bags	bx
22.	Drip Torch	ea	52.	Leadline	ea
23.	Drip Torch Mix, 5 gal.	ea	53.	Spike Supply Kit	ea
24.	Coffee Kit w/propane	ea	54.	Dolmar (6 per case)	ea
25.	Swivel	ea	55.	Sprinkler Kit	ea
26.	Backpack Pump	ea	56.	LINE Spike Supply Kit	ea
27.	Pumpkin, specify size	ea	57.	Duct Tape	roll
28.	Mark 3 Pump	ea	58.	House Wrap	roll
29.	Mark 3 Pump Accessory Kit	ea	59.	Staple Gun w/staples	ea
30.	2-cycle oil, high pressure pump	qt			

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.
 1600 - DIVS to have next day's resource order ready for Planning OPS.

- All orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Communications Unit.
- All orders will be tracked using the process found on the front of this form.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (*if different*): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
