INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: 0700-2100	
PIONEER	Date/Time From: 07/12/2024 0700 FRI	Date/Time To: 07/12/2024 2100 FRI
3. Objective(s):		
<u>Strategic Framework:</u>		
<p>The Pioneer Fire is a full suppression fire utilizing strategies and tactics that provide the highest likelihood of success while mitigating risks to the responders and public. Extreme terrain prevents direct attack. Indirect lines are being identified and established that reduces risk to responders while protecting identified values including private and federal infrastructure and recreational values.</p>		
<u>Management Objectives:</u>		
<ul style="list-style-type: none"> • Ensure the safety and well-being of responders and the public by making timely risk-informed decisions that align with values at risk. • Protect private and federal infrastructure and recreational values. • Foster relationships with local cooperators and the public by providing coordinated, accurate and timely information. • Coordinate suppression activities with READ's to identify and mitigate current and future impacts to the landscape and resources. • Treat each other with dignity and respect and act in a professional manner on the fire and in the communities. • Manage cost commensurate with values at risk by coordinating with the Agency Administrators and Incident Business Advisors. 		
4. Operational Period Command Emphasis:		
<ul style="list-style-type: none"> • Implement an effective suppression strategy utilizing direct attack where and when appropriate to protect values at risk. When fire behavior, terrain or safety concerns prohibit direct attack, utilize other suppression tactics such as indirect and point protection as appropriate to reduce risk to responders. Take advantage of natural features such as breaks in fuels, topographic features, or changes in weather. • Establish indirect control lines with the highest probability of success which prevent fire spread into populated areas. • Communicate with local law enforcement officials to ensure current and potential evacuations are coordinated. 		
General Situational Awareness:		
<p>All incident personnel should be familiar with the Incident Response Plan and understand their role in supporting an Incident within an Incident (IWI). The Pioneer fire has unique challenges with excessive travel times and methods. Do not rely solely on one method of transport or extraction. Be mindful of weather, terrain, travel time and access limitations that could potentially cause delay in providing triage, treatment, extrication and transport of injured personnel.</p>		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Fire Weather Forecast

FORECAST NO: 30
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Friday 7/12/2024
TIME AND DATE ISSUED: 7/11/2024 1900 hrs

INCIDENT: Pioneer Fire
SIGNED: *Maddie Kristell*
Incident Meteorologist

Discussion:

Northwest flow will continue as high pressure has flattened out. Ridge top winds will be gusting from the northwest through Sunday. As down-lake flow commences in the afternoon and aligns with the Straits of Lake Chelan, wind waves and white caps are expected. Temperatures will be cooling slightly, but are still expected to be around five degrees above normal for this time of year. Relative humidity recoveries are going to continue to be poor into early next week.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Sunny and hot. Smoke in the morning and in valleys, mixing out in the afternoon.
MAX TEMPERATURE: 92 to 98 valleys/mid-slopes. 70 to 80 around 5000 feet.
MIN RH: 10 to 17 percent valleys/mid-slopes. 18 to 24 percent ridges.
20 FT WINDS:
Lower Valleys: West to Northwest 5 to 10 mph gusting 20 mph.
Mid-slopes and Ridges: Southwest to northwest in the afternoon 12 to 16 mph gusting to 22 mph.
HAINES INDEX: 4 Moderate. **TRANSPORT WINDS:** Southwest to northwest at 20 mph.
INVERSION: Moderate to strong low level inversion lifting by 1100. Mixing Height 11000 ft by 1500.

TONIGHT:

SKY/WEATHER: Mostly Clear. Smoke will settle in valleys near Chelan and in drainages near the fire.
MIN TEMPERATURE: 65 to 69 valleys/mid-slopes. 50 to 55 around 5000 feet.
MAX RH: Poor Recovery. 30 to 35 percent valleys/mid-slopes. 40 to 45 percent ridges around 5000 feet.
20 FT WINDS:
Valleys/Lower Slopes: Northwest down lake 8 to 12 mph in the evening gusting to 25 mph.
Mid-Slopes and Ridges: Northwest 12 to 16 mph gusting to 25 mph.
INVERSION: Developing after 2300 hrs to near 1000 ft. Thermal belt activity likely at the top of the inversion.

SATURDAY:

SKY/WEATHER: Sunny and still hot.
MAX TEMPERATURE: 90 to 95 valleys/mid-slopes. 67 to 74 around 5000 feet.
MIN RH: 15 to 20 percent valleys/mid-slopes. 20 to 30 percent ridges.
20 FT WINDS:
Lower Valleys: West to Northwest 5 to 10 mph gusting 22 mph.
Mid-slopes and Ridges: Southwest 14 to 18 mph gusting 25 mph.
HAINES INDEX: 4 Moderate. **TRANSPORT WINDS:** NW 10 to 15 mph.

Boating concerns Friday: Increased northwesterly winds will cause bumpy conditions across the lake in the afternoon. Wave heights to 2 feet have been observed in similar wind conditions.

Aviation concerns Friday: Temperature near 25C at 4000 feet for load calcs. Thermal turbulence likely due to uneven heating of terrain and slopes in addition to mechanical, wind driven turbulence.

Weather observations can be texted to 509-844-7003 or emailed to bubba57@comcast.net

Fire Behavior Forecast # 31

Name of Incident: Pioneer	Administrative Unit: SE Region DNR / Okanogan-Wenatchee NF
Date & Time Issued: July 11, 2024 @ 1900	Operational Period: <u>DAY</u> 07/12/2024
FBAN: Mike Bowden	Signed: /s/ Michael Bowden

Continued poor nighttime humidity recovery over the past week has had a significant effect on live and dead fuels moisture. Today's hot, dry, windy, and unstable afternoon conditions will contribute to another critical fire day. Rapid fire spread will occur when aligned with wind and/or slope. Expect active burning between 1400 to 2200 hours. While live fuels are starting to contribute to fire intensity at mid slopes and lower, fire spread rate is being dominated by fine dead fuels and cured grasses. Lake effect winds (up/ down lake) dominate lower and mid slopes; the fire is on a dry S/SW aspect with steep side drainages that provide strong upslope winds. Wind/slope alignment and/or lake wind will influence fire spread rate and direction.

Weather Summary
See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area are composed of a mosaic of ***Timber Litter, Grass, Timber with Understory, and Grass/Shrub*** models. The fire is burning in the Rex Creek (2001) fire footprint. Primary tree species include mixed sizes and densities of Douglas Fir and Ponderosa Pine. Local timber litter is compact to fluffy. Brush and understory species include ceanothus, hardwoods, and dog-hair conifer reproduction. **Large snags and heavy downed fuel loadings are common throughout all areas.** Live woody and herbaceous fuels are becoming available to contribute to fire intensity, mid slopes and lower. Grasses are partially to fully cured depending on elevation and aspect. Fuel conditions vary by aspect, previous fire history, and elevation. Most N and E aspects include 23-year-old brush and conifer trees with a heavy dead and down component beneath.

Expect fire behavior to include areas of fingering head fire runs, active flanking, and backing (with rollout) when wind/slope align. In light fuels such as grass, expect rapid fire spread. Heavy fuels are retaining heat serving as ignition sources for surrounding fuels. At higher elevations and north aspects, some grasses are still curing. Very active fire behavior is expected for next several days. Watch out for slope reversal with rapid rates of spread and high intensity burning when it occurs. Expect lee-side spotting as fire reaches ridgelines.

*** FFM= 3%-4%, 1000hr. moisture=10%, Woody fuels 120%, Probability of Ignition—80-90%, Max Spotting 0.5 miles or more with significant column development.**

Fuel Type	Rate of Spread	Flame Length	Backing ROS	Spot Size in 2-hours
...If your work area includes -	(CH/HR = FPM)	Feet	FPM	Acres
GR2 - Moderate load grass/shrub	45 - 50	4 - 5	1-2	250
SH2 - Moderate load shrub	3 - 5	2-3	< 1	3
TU5 - High load Timber w/ Understory	12 - 14	8- 9 (torching)	1	15
TL8 - Long needle timber litter	10-12	4- 6	1 +	10

Specific Assignments:

Div. A – The fire will continue to back and flank towards Fish Creek and wrap around the north side of Horton Butte with upslope short finger runs.

Div. S – Expect backing fire in Lone Fir drainage. Potential exists for fire to spread across creek

Shore Protection Group – **Monitor up/down lake winds closely.** Expect rapid spread in fine fuels when fire becomes active.

Other Br./Grp. – Should not be affected by fire activity during the burn period. Monitor smoke direction and amount. Assess fuels.

***IA** – Expect rapid rates of spread in light fuels. Ensure good size-up before engaging and base tactics on current as well as expected fire behavior.

Air Operations: Hot. Locally heavy downwind smoke in drainages and aloft. Complex terrain, watch for lee-side turbulence.

Safety

The recent hot and dry weather has decreased fine fuel moisture to the point of easy and rapid ignition with rapid spread rates. Taking suppression actions on spreading fire requires clear thinking, good judgement, and assurance that LCES are in place to ensure decisions and actions are safe and effective. Good firefighters make good decisions – work smarter not harder.

**Today's Fire Behavior Forecast contains 683 words written for your situational awareness.*

SAFETY MESSAGE

12 JULY 2024

INCIDENT: Pioneer

OPERATIONAL PERIOD: 0700-2100

HOUSEKEEPING

Do not camp in the parking lot.
Drive slowly, this is a residential area, lots of children walking.
Watch your step in the parking area, lots of dips and holes.
Follow the ingress egress in camp parking.

RESPECT THE LOCALS

We're new to Manson, this is their busy time, this is how they prosper.
Follow all traffic laws.
This is their home, act like you're a guest in it.
We are representing Federal, State, and Local Agencies present yourself
as such.

SAFETY OFFICERS: Marshall Brown, Joshua Northrup

Risk Assessment Worksheet		1. Incident Name: PIONEER FIRE		2. Location: WA-SES-000173	
3. Leaders Intent /Specific Objective: Risk Management tools will be used to evaluate tactics in order to provide for firefighter and public safety while implementing actions that have a high probability of success. THIS IS NOT AN EXHAUSTIVE LIST OF RISKS OR CONTROL OPTIONS		4. Prepared By: Joshua Northrup		5. Date Prepared: Thursday, July 11, 2024	
Signature:		Title:			

Identify Hazards		Assess Hazards			Risk Control Options	Residual Risk			Decision	Implement
7. Task	8. Hazard	9. Hazard Probability	10. Severity	11. RAC	12. Identify hazard mitigations & abatement measures (press [alt + enter] to add a line)	13. Hazard Probability	14. Severity	15. RAC	16. Risk Acceptable?	17. Hazard Control Assigned to:
Operational tasks	Medical Treatment and Transport Delay	Almost Certain	Catastrophic	Extremely High	Staff Medical personnel that is commensurate with the operational assignment. Coordination with the MEDL, BOAT Group and AOBD is essential. Detailed procedures are in place for medical transportation. If boat and/or air resources are unavailable, medical personnel is unavailable, and Risk Management matrix is unacceptable; consider alternative operational tactics and strategies. Use P.A.C.E. model for transportation planning utilizing the ICS206 medical plan. Identify helispots and possible. LEADERS INTENT: ANY WEATHER PARAMETERS OR OPERATIONAL CHANGES THAT WOULD AFFECT TRANSPORT WILL BE COMMUNICATED TO INCIDENT PERSONNEL FOR OPERATIONAL REASSESSMENT.	Possible	Critical	High	YES	All Incident Personnel
Operational tasks	Hit by Hazards	Possible	Catastrophic	Extremely High	Maintain sound risk management processes and modify tactics and strategy to limit personnel exposure in areas that have probability for roll out and falling material.	Possible	Critical	High	YES	All Incident Personnel
Perimeter Control	Increased Fire Behavior	Likely	Critical	Extremely High	With red flag warnings, drying of fuels, wind, and rollout potential anticipate increase in fire behavior and adjust tactics and strategies using the risk management process.	Possible	Critical	High	YES	All Operations Personnel
Ground transportation (Boats, Hiking, UTV, Driving)	Motor Vehicle Accident- Struck by/Striking Object/Loss of vehicle control	Possible	Critical	High	Boats: Follow Agency safety policies. Hiking: Pace and situational awareness. UTV: Adhere to Agency UTV Policy Driving: Drive defensively, Chelan July traffic will be busy. Road closures do not have security assigned.	Possible	Critical	High	YES	All Incident Personnel
Helicopter Operations	Aircraft Mishap - General	Unlikely	Catastrophic	High	VALIDATE THAT MISSIONS ARE ESSENTIAL AND MEET INCIDENT OBJECTIVES. TFR IS IN PLACE, IF YOU SEE INTRUSION COMMUNICATE IMMEDIATELY.	Rare	Catastrophic	Moderate	YES	All Operational Personnel
Firing Operations - Ground	Ingress/Egress/Access	Possible	Critical	High	Use resources qualified for complicated firing operations. Write and follow firing plan. Sufficient radio capacity for all persons on the firing group. Plan and identify contingencies and multiple escape routes.	Unlikely	Critical	Moderate	YES	Alpha/Sierra, Firing Group
Interactions with Public Safety/Public Relations, Forest closure order growth	Personal Injury/Damage to Public Relations, no roads guards.	Possible	Moderate	Moderate	Travel with the expectation of public on roads and trails. Contact Team Law Enforcement, Safety Officers, and Security when necessary. Disengage from any confrontations.	Possible	Moderate	Moderate	YES	All Incident Personnel
Initial Attack	Unknown terrain, cooperators, leadership added to existing fire and ambient conditions. Sense of urgency & confusion.	Likely	Critical	Extremely High	Incident IA resources pre-designated. Briefed at incident and dispatched with incident leadership. IA frequencies programmed into radios.	Possible	Critical	High	YES	All Operations Personnel
All Incident Operational Tasks	Medical - Heat Related Illness/Wildlife	Likely	Moderate	High	Identifying heat related illness early, appropriate pace in extreme temps, shade, fluid intake in appropriate proportions. Discussions/Awareness on wildlife/snakes.	Unlikely	Critical	Moderate	YES	All Personnel

PIONEER NW TEAM 12 INITIAL ATTACK RESPONSE PLAN

Per the Pioneer Fire Delegation of Authority, NW Team 12 has responsibility for Initial Attack response within the Pioneer Fire TFR. Additionally, the team will support initial attack efforts surrounding the TFR as requested. This includes ground and air resources. Most of the TFR consists of Forest Service and Park Service land with small parcels of private inholdings. Additional land ownership adjacent to the TFR consists of BLM, State, and private land.

Pioneer Initial Attack Response Plan:

- IA fires reported near or within the TFR will be reported through CWICC.
- Appropriate agency Duty Officer will be informed of the fire. If the fire is within the TFR and suppression actions are necessary, CWICC will contact Field Operations by phone or radio and provide response instructions. The duty officer is responsible for notifying the agency administrator of decision. Order of contact:
 - CWICC will contact Field Ops Aaron Rowe at 509-679-5378 or Field Ops trainee Lonnie Newton at 208-501-4019
 - If neither Field Ops can be reached by phone, call Field Ops on radio. If not reachable on radio, contact Pioneer Communications and have them relay message.
 - If no contact can be established with Field Ops, contact Planning Ops Kurt Ranta at 360-708-5227 or Planning Ops trainee Rob Poyner at 425-512-2621.
- Air Operations and/or Division/Group Supervisor assigned to the division/group nearest the IA location will be notified by Field Operations and respond with assigned resources.
- Local forest or state Initial Attack frequencies will be used and provided in the IAP Communications Plan.
- The same processes will be used for fires outside of TFR if assistance from Pioneer Fire resources is requested.
- Any air resources used on initial attack or support missions other than Pioneer will be on a lend/lease arrangement.
- All resources in Structure/IA Group are available for Initial Attack response. Other divisions/groups may have resources also identified for IA response. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.

Process as written in 204 comments:

- All resources in Structure/IA Group are available for Initial Attack response per the Pioneer Fire IA Response Plan. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.
 - If Initial Attack occurs within the TFR, Wenatchee Dispatch will coordinate with appropriate duty officer and contact Field Ops for response.
 - Field Operations will contact the Structure/IA Group Supervisor and/or Air Operations to coordinate response to new start.
 - Local forest Initial Attack frequencies will be used and provided in the IAP Communications Plan
 - The same process will be used for fires outside of TFR if assistance from Pioneer fire resources is requested.

6. Control Operations/Work Assignments:						
<p>TASK: Use multiple tactics to slow fire spread in Meadow Creek where terrain and fuels allow for highest probability of success. Monitor fire progression north and west as fire progresses to high elevations. Implement point protection on federal and private infrastructure</p> <p>PURPOSE: To slow fire progression, provide time for suppression tactics, and prevent fire spread towards Stehekin</p> <p>END STATE: Fire impacts to critical values, including private inholdings, federal infrastructure and Stehekin are minimized.</p>						
7. Special Instructions:						
<p>-In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary.</p> <p>-Minimize ground disturbance on the Moore Point and Meadow Creek alluvial fans in order to protect sensitive resources.</p> <p>-Hose used from Prince Creek to Moore Pt: contaminated with invasive plants. Do not reuse. Backhaul to Moore Pt DP22 and store in "infested hose" area at Moore Pt until decontaminated.</p> <p>-Ensure hazard mitigations and IWI protocols are in place before taking action.</p> <p>-** Denotes available for Initial Attack</p>

6. Control Operations/Work Assignments:							
<p>TASK: Continue road prep and work around Stehekin Valley Ranch in Stehekin.</p> <p>PURPOSE: To protect the community of Stehekin, surrounding infrastructure and historic values from fire impacts.</p> <p>END STATE: Fire impacts to critical values in and around Stehekin have been minimized.</p>							
7. Special Instructions:							
<p>-All operational personnel working on USFS lands will need to conduct a thorough inspection for invasive species seeds on boots including laces, clothing, and gear prior to entering NPS lands.</p> <p>-Only fresh (direct from the cache) hose should be utilized on NPS lands to prevent the transport of invasive species seeds.</p> <p>-Hose used on USFS lands should not be used on NPS lands and hose used on NPS lands should not be used on USFS lands to prevent the spread of invasives species seeds.</p> <p>-Cargo loads being transported onto NPS lands should be inspected for invasive weed seed prior to flight.</p> <p>-NPS Resource Avoidance Area Flagging is yellow with red polka dots. Contact NPS READs before working in areas where this flagging is present.</p> <p>-Ensure hazard mitigations and IWI protocols are in place before taking action.</p> <p>-** Denotes available for Initial Attack</p> <p>-Designated Resources are available for Initial Attack response per the Pioneer Fire IA Response Plan. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.</p> <p>-If Initial Attack occurs within the TFR, Wenatchee Dispatch will coordinate with appropriate duty officer and contact Field Ops for response.</p> <ul style="list-style-type: none"> Field Operations will contact the Structure/IA Group Supervisor and/or Air Operations to coordinate response to new start. Local forest Initial Attack frequencies will be used and provided in the IAP Communications Plan The same process will be used for fires outside of TFR if assistance from Pioneer fire resources is requested.

6. Control Operations/Work Assignments:						
<p>TASK: Begin assessment of risk to structures/infrastructure near Manson, working with local partners and authorities</p> <p>PURPOSE: Plan for and mitigate potential long-term impact to communities down lake from fire</p> <p>END STATE: Plan has been developed and mitigation implemented for protection of structures in and around Manson</p>						
7. Special Instructions:						
<p>-Ensure hazard mitigations and IWI protocols are in place before taking action.</p> <p>-All resources in Structure/IA Group are available for Initial Attack response per the Pioneer Fire IA Response Plan. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.</p> <p>-If Initial Attack occurs within the TFR, Wenatchee Dispatch will coordinate with appropriate duty officer and contact Field Ops for response.</p> <ul style="list-style-type: none"> Field Operations will contact the Structure/IA Group Supervisor and/or Air Operations to coordinate response to new start. Local forest Initial Attack frequencies will be used and provided in the IAP Communications Plan The same process will be used for fires outside of TFR if assistance from Pioneer fire resources is requested.

Resource Advice

Lead READ: Eireann Pederson 360-854-8197, eireann.pederson@usda.gov

REAF: Brigitte Ranne 509-663-6118, brigitte.ranne@usda.gov

REAF: Hector Rodriguez 509-393-5379, Hector.Rodriguez3@usda.gov

REAF: Carrissa Camenson 360-899-7147, carissa.camenson@usda.gov

Resource Guidelines

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.
- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.
- In large or long term spike the camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If the camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat or before entering National Park Service Land.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.
- Weed wash all vehicles, including boats, when they arrive to the incident and when demobed.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.
- Non-mechanized suppression activities are recommended within Riparian Reserves (150-300 ft from stream channel). For example, consider hand lines instead of dozer lines when feasible.

Retardant Use

- Retardant avoidance areas are present in the fire suppression area for both aquatic and terrestrial species.
- Track all retardant drops – locations and amounts.
- Report all mis-applications ASAP to READ. Monitoring and reporting of misapplications is required.

Wet Meadows

- No line or other disturbance in wet meadows in the Summer Blossom area (east of South Navarre campground above and below the 8200 road) and at Coyote and Poison Springs at the headwaters of their respective creeks.

Dry Meadows

- Minimize disturbance from staging and parking areas in dry meadows. These areas recovery slowly and are vulnerable to invasive plant infestation.

White Bark Pine

- Avoid cutting white bark pine whenever possible. Needles of 5 keep it alive! Ask READ for help with ID.

Burnout operations

- Plan to protect whitebark pine of all ages and mature cold and moist forest during burnouts. READ consultation and line officer approval is required for burn plans that include these forest types.
- During burnouts modify firing to retain large trees, large snags and large down wood in forests whenever possible.
- Minimize total acres burned in burnouts.
- Incorporate typical resource protection measures used in RX burning whenever it is safe and practical to do so (such as retention of green islands in moist areas).
- Provide a map of areas that were burned as part of the burnout operation (for use in emergency consultation).
- If cultural resources are discovered during suppression activities, leave on site and notify READ.

Be sure to use the most current IAP QR Code. Any questions call Demob at 500-661-5376

Check In Message

- Please complete the virtual check-in process via the QR code on the front cover.
- You are not checked in until you provide the following:
 - 1) Red Cards
 - 2) Roster/Manifest
- Please email documents to: 2024.pioneer.checkin@firenet.gov

Any Questions:

Phone: 509-661-5372

Email: 2024.pioneer.checkin@firenet.gov

Demob Message

- Fliers complete the “Air Travel Request” via the QR code on the front cover 72 hours prior to flight date.
- Return supplies to the Cache.
- Return radios, antennas, etc., to Communications.
- All contract equipment and vehicles driven in fire area will need to do weed wash.
- Contact Finance about closing out your paperwork.
- Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.

Any Questions:

Phone: 509-661-5376

Email: 2024.pioneer.demob@firenet.gov

Human Resource Message Pioneer Fire

Hydration July 12, 2024

Dehydration is the result of the body trying to regulate its temperature naturally through sweating. Maintaining body fluids is essential for sweating. You must hydrate before, during, and after your shift.

Studies conducted on wildland firefighters indicate that during fire suppression activities firefighters need to drink a minimum of one quart of fluid each hour of work. Before work, you should take extra fluids to prepare for the heat. Drink one or two cups of water, juice, or a sports drink before work.

While working, drink at least one quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.

Thirst always underestimates fluid needs, so you should drink more than you think you need.

You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.

Rapid loss of several pounds of body weight is a certain sign of dehydration. Rehydrate before returning to work; working in a dehydrated state can lead to serious consequences, including heat stroke, muscle breakdown, and kidney failure.

What are you doing right now to ensure that you are hydrated?

Margaret Dietrich, Human Resource Specialist 360-701-3154

Union Representation Local 34, Katijo Maher
360-677-2414 Katijo.Maher@usda.gov

Finance Message

Scan this QR code to submit documents to finance.

SUBJECT: *Include Key Word **TIME** for Overhead, Crews & Cooperators*

SUBJECT: *Include Key Word **EQUIPMENT** for Contract Resources*

Phone: 484-501-1835

Finance Email: 2024.pioneer.finance@firenet.gov

Please submit the below listed documents to the finance for Check-in, Daily processing and Demob.

Overhead, Crews & Cooperator Resources	Contract Resources
<ul style="list-style-type: none"> • Check-In: Crew Manifest, Cooperative Agreement (if applicable), AD Hire Letter, Resource Order • Daily: Crew Time Report (CTR), Shift Tickets • Demob: Signed OF288, Final Equipment Use Invoice (Cooperator). If you don't have a way to sign you must come to finance. 	<ul style="list-style-type: none"> • Check-In: Resource Order, Contract/VIPR Agreement (make sure you have your UEI), Pre-Inspection, Crew Manifest • Daily: Shift Tickets, receipts (fuel issues, claims, etc.) • Demob: Contractor Evaluations, Final Shift Tickets and receipt(s) for Addition/Deductions, Post-Inspection, Final Signed Invoices. If you don't have a way to sign you must come to finance

REMINDERS

- ★ PLEASE SHOW YOUR LUNCH BREAK
- ★ PLEASE USE MILITARY TIME (0001-2400)
- ★ WHEN CLAIMING HAZARD PAY YOU MUST INCLUDE THE SUPPRESSION ACTION BEING PERFORMED. THIS INCLUDES OPERATIONS WHICH DIRECTLY SUPPORT CONTROL OF FIRE (E.G., ACTIVITIES TO EXTINGUISH THE FIRE, FIREFIGHTING, GROUND SCOUTING, SPOT FIRE PATROLLING, SEARCH AND RESCUE OPERATIONS, AND BACKFIRING).
- ★ CTRS SHOULD BE NAMED AS: CTR_RO#_YYMMDD-DD (EX: CTR_O235_240605-07)
- ★ SHIFT TICKETS SHOULD BE NAMED AS: ST_RO#_YYMMDD-DD (EX: ST_E5_240624-27)
- ★ PLEASE MAKE SURE YOU SEE FINANCE AND MEDLS FOR MINOR INJURIES. AGENCY PEOPLE WILL NOT HAVE CLAIMS PAID IF THEY DON'T FOLLOW PROTOCOLS.
- ★ **FOR AN EXPEDIANT DEMOBING PROCESS PLEASE MAKE SURE YOU HAVE NO OUTSTANDING CLAIMS, ALL TIME AND REQUIRED CHECK IN DOCUMENTS HAVE BEEN SUBMITTED BEFORE YOU COME TO FINANCE TO CHECK-OUT.**

Public Information

PHOTOS: Your fireline photos help us build understanding with the public. Community members want to see what you see because you go where others can't safely go. We are looking for any pictures of the fire line, mop-up work, and **fire resources working on the fire line in their PPE**. You can send photos to:

Email: 2024.pioneer@firenet.gov

Text: 509-388-1475

As always, make sure you're wearing all your PPE and conveying a professional, caring, and respectful attitude toward the homes and land in this community. Thanks for helping us out!

LOST AND FOUND: We have a few items in the Information yurt, just inside the door to the left. If you have lost something, please stop by and see if it has been turned in. If you find something left around camp, you can turn it in to us.

QUESTIONS FROM THE PUBLIC: If community members have questions that you do not feel equipped to answer professionally, please give them our fire information line: 541-861-5808.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- **ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.**
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Controlled Unclassified Information//Basic
