INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: 0700-2100	
PIONEER	Date/Time From: 07/17/2024 0700 WED	Date/Time To: 07/17/2024 2100 WED
3. Objective(s):		
<p><u>Strategic Framework</u> The Pioneer Fire is a full suppression fire utilizing strategies and tactics that provide the highest likelihood of success while mitigating risks to the responders and public. Extreme terrain prevents direct attack. Indirect lines are being identified and established that reduces risk to responders while protecting identified values including private and federal infrastructure and recreational values.</p>		
<p><u>Management Objectives:</u></p> <ul style="list-style-type: none"> • Ensure the safety and well-being of responders and the public by making timely risk-informed decisions that align with values at risk. • Protect private and federal infrastructure and recreational values. • Foster relationships with local cooperators and the public by providing coordinated, accurate and timely information. • Coordinate suppression activities with READ's to identify and mitigate current and future impacts to the landscape and resources. • Treat each other with dignity and respect and act in a professional manner on the fire and in the communities. • Manage cost commensurate with values at risk by coordinating with the Agency Administrators and Incident Business Advisors. 		
4. Operational Period Command Emphasis:		
<ul style="list-style-type: none"> • Implement an effective suppression strategy utilizing direct attack where and when appropriate to protect values at risk. When fire behavior, terrain or safety concerns prohibit direct attack, utilize other suppression tactics such as indirect and point protection as appropriate to reduce risk to responders. Take advantage of natural features such as breaks in fuels, topographic features, or changes in weather. • Establish indirect control lines with the highest probability of success which prevent fire spread into populated areas. • Communicate with local law enforcement officials to ensure current and potential evacuations are coordinated. 		
General Situational Awareness:		
<p>As unusually high temperatures continue in the area, responders are urged to prioritize personal safety in the heat by staying hydrated, taking breaks, and seeking shade or cooler environments.</p> <p>All incident personnel should be familiar with the Incident Response Plan and understand their role in supporting an Incident within an Incident (IWI). The Pioneer fire has unique challenges with excessive travel times and methods. Do not rely solely on one method of transport or extraction. Be mindful of weather, terrain, travel time and access limitations that could potentially cause delay in providing triage, treatment, extrication and transport of injured personnel.</p>		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):		
<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206	<input type="checkbox"/> ICS 207 <input checked="" type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input checked="" type="checkbox"/> HR MESSAGE <input checked="" type="checkbox"/> LOGISTICS MESSAGE <input checked="" type="checkbox"/> ICS 214 - UNIT LOG <input type="checkbox"/> _____

Fire Weather Forecast

FORECAST NO: 35

INCIDENT: Pioneer Fire

PREDICTION FOR: 24 Hr Shift

SHIFT DATE: Wednesday 7/17/2024

SIGNED: *Bob Tobin*

TIME AND DATE ISSUED: 7/16/2024 1900 hrs

Incident Meteorologist

Discussion:

*****Red Flag Warning for Dry Thunderstorms Today*****

Heat Advisory

South-southwest flow is currently over the Pacific Northwest. This is tapping into mid and upper-level moisture per satellite imagery. It will also allow for a vigorous weather disturbance to move through the region Wednesday afternoon and out of the region Wednesday night. The main changes to the forecast will be a southerly component to the winds, and slowly increasing temperatures through the week. The combination of the weather disturbance and increased moisture is a good pattern for this area to receive elevated thunderstorms. As such, a Red Flag Warning has been issued. Temperatures are expected to slowly increase through the week. Winds will shift diurnally from south/ upslope during the day and drainage, down lake at night. Relative humidity will remain quite dry.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Mostly cloudy and hot. A chance of afternoon thunderstorms. **CWR: 10%**

MAX TEMPERATURE: 88 to 94 valleys/mid-slopes. 74 to 80 around 5000 feet.

MIN RH: 14 to 18 percent valleys/mid-slopes. 20 to 25 percent ridges.

20 FT WINDS:

Lower Valleys: Down lake, down canyon 3 to 5 mph through 1000 then southeast to southwest 5 to 10 mph gusting to 12 mph.

Mid-slopes and Ridges: Southeast to south 8 to 12 mph gusting to 15 mph.

HAINES INDEX: 4 Moderate.

TRANSPORT WINDS: Southeast-southwest 10-12 mph.

INVERSION: Moderate to strong low-level inversion lifting by 1000. Mixing Height 9000 ft by 1100.

TONIGHT:

SKY/WEATHER: Mostly Cloudy with a chance of evening thunderstorms. Clearing after midnight.

MIN TEMPERATURE: 66 to 72 valleys/mid-slopes. 59 to 65 around 5000 feet.

MAX RH: 45 to 52 percent valleys/mid-slopes. 40 to 50 percent ridges around 5000 feet.

20 FT WINDS:

Valleys/Lower Slopes: Northwest-north down the lake 6 to 10 mph in the evening gusting to 20 mph, especially after midnight.

Mid-Slopes and Ridges: Southwest to west 10 to 12 mph gusting to 15 mph.

INVERSION: Developing after 2000 hrs. to near 1000 ft. Thermal belt activity likely at the top of the inversion.

Thursday:

SKY/WEATHER: Partly cloudy in the morning. Clearing in the afternoon. very smokey in the canyons and along the lake.

MAX TEMPERATURE: 92 to 98 valleys/mid-slopes. 77 to 82 around 5000 feet.

MIN RH: 17 to 21 percent valleys/mid-slopes. 20 to 25 percent ridges.

20 FT WINDS:

Lower Valleys: Southeast to south 5 to 10 mph gusting to 15 mph.

Mid-slopes and Ridges: Southwest to West 12 to 15 mph gusting to 22 mph.

HAINES INDEX: 3 Low.

TRANSPORT WINDS: SWW 10 to 12 mph.

Boating concerns Tuesday Up-lake winds will develop after 1000. Expect bumpy conditions across the lake in the afternoon. Wave heights to 2 feet have been observed in similar wind conditions.

Aviation concerns Monday: Temperature near 25C at 4000 feet for load calcs. Thermal turbulence likely near any convection from afternoon thunderstorms.

Weather observations can be texted to 509-844-7003 or emailed to bubba57@comcast.net.

Fire Behavior Forecast # 36

Name of Incident: Pioneer	Administrative Unit: SE Region DNR / Okanogan-Wenatchee NF
Date & Time Issued: July 16, 2024 @ 1900	Operational Period: <u>DAY</u> 07/17/2024
FBAN: Steve Ziel	Signed: /s/ <i>Steve Ziel</i>

Red Flag Warning for Dry Thunderstorms. Southerly winds with hot/dry weather brings another very active fire behavior day. Rapid fire spread will occur with wind and/or slope alignment. Expect very active burning conditions between 1200 to 2000 hours. Live fuels are starting to contribute to fire intensity on mid and lower slopes; fire spread rate is being dominated by fine dead fuels and cured grasses. Lake effect winds (up/ down lake) dominate lower and mid slopes; the fire is on a dry S/SW aspect with steep side drainages that provide strong upslope winds. Wind/slope alignment and/or lake wind will influence and accelerate fire rate of spread and direction. T-storms bring multi-directional outflow winds, new starts, long range spotting, high intensity fire runs .

Weather Summary
See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area are composed of a mosaic of *Timber Litter, Grass, Timber with Understory, and Grass/Shrub* models. The fire is burning in the Rex Creek (2001) fire footprint. Primary tree species include mixed sizes and densities of Douglas Fir and Ponderosa Pine. Local timber litter is compact to fluffy. Brush and understory species include ceanothus, hardwoods, and dog-hair conifer reproduction. **Numerous snags and heavy downed fuel loadings are common throughout all areas.** Live woody and herbaceous fuels are becoming available to contribute to fire intensity, mid slopes and lower. Grasses are partially to fully cured depending on elevation and aspect. Fuel conditions vary by aspect, previous fire history, and elevation. Most N and E aspects include 23-year-old brush and conifer trees with a heavy dead and down component beneath. Jackstraw fallen dead trees may be covered by brush.

Expected fire behavior includes areas of sustained head fire runs, aggressive flanking, and backing (with rollout) with wind/slope alignment. In light fuels (grass, pine needle litter) expect dangerous rates of fire spread. Heavy fuels are retaining heat serving as ignition sources for surrounding fuels. Very active fire behavior is expected for next several days. Slope reversals will produce rapid rates of spread and high intensity burning when it occurs. Expect lee-side spotting as fire reaches ridgelines. Fuel concentrations will generate high intensity fire behavior with torching. Expect group torching with spotting to <.5 mi. where sufficient timber fuels are present. T-Storms may produce strong outflow winds, multi-directional fire spread, long range spotting, and new starts today.

**** FFM= 3%-5%, 1000hr. moisture=10%, Woody fuels 120%, Probability of Ignition—80-90%, Max Spotting 0.5 miles (or more with significant column development).***

Fuel Type	Rate of Spread	Flame Length	Backing ROS	ROS T-Storm Gusts to 35 mph
...If your work area includes -	(CH/HR = FPM)	Feet	FPM	(CH/HR = FMP)
GR2 - Moderate load grass/shrub	45 - 50	4 - 5	2	90 – 120 (1-1/2 MPH)
SH2 – Moderate load shrub	3 - 5	2-3	< 1	8 -10
TU5 - High load Timber w/ Understory	12 - 14	8- 9 (torching)	2	25 - 30
TL8 – Long needle timber litter	10-12	4- 6	2	30 – 35 (high intensity run)

Specific Assignments:

Div. A – Fire will continue spread on both sides of Fish Creek, up the slopes of Moore Mtn, and Hunts Cr. to ridge tops. Runs/spots.

Div. S – Prince Cr. is spreading on both sides upstream to Middle Fk. Prince Cr. and toward Cub Lake. Finger runs likely.

Lakeshore Protection Group – Monitor up/down lake winds closely. Expect rapid spread in fine fuels if fire becomes active on the lower slopes between Moore Point and Stehekin, and down lake to Nelson Ridge. Expect high intensity fire behavior in timber fuels

Other Br./Grp. – T-storms may bring new starts, monitor fire activity for travel. Monitor smoke direction/amount. SW/SE winds.

***IA** – Expect rapid rates of spread in light fuels. Ensure good size-up before engaging and base tactics on current as well as expected fire behavior. Review potential ROS and FL by fuel type. ***New starts possible within and outside the TFR from T-storms.**

Air Operations: Dense downwind and lake smoke early. T-storm hazards during the operational period, 30 mph outflow winds likely.

Safety

Threat of thunderstorm related fire behavior will require situational awareness at all times, smoke may obscure thunder cells above, as well as travel routes, fire in your local area, etc. Ensure that LCES accounts for long travel times. Review the first page of the Incident Response Pocket Guide – “Risk Management Process”.

**Today's Fire Behavior Forecast contains 770 words written for your situational awareness.*

SAFETY MESSAGE

17 July 2024

INCIDENT: Pioneer

OPERATIONAL PERIOD: 0700-2100

What is Risk?

Risk can be succinctly defined as a “measure of the probability and consequence of uncertain future events” **RISK = Probability and Consequences**

6 Major Responder Risk Categories (Influencers)

Ground Transportation: All ground movement to/from & at the work area: Driving (engines, heavy equipment, rentals, operational & support functions, etc.) UTV/ATV, hiking, pack strings, boats, etc.

Fire Behavior Hazards: Think Entrapment: escape routes/safety zones, disengagement points, fuel conditions & indices, event predictability, etc.

Hit-by & Gravity Hazards: Gravity Hazards: Snags, green trees, rolling rocks, topography, etc.

Aviation Operations: All aviation use (manned/unmanned): Logistical support, operational tasks scooping/dipping, water sources, UAS, etc.

Human Factors: All things human-related: internal/external pressures real or perceived, communication, leadership, social-political, etc.

Medical Response & Capability: How resilient is our system to support from a medical standpoint – NOT how severe of an injury!

Which of the 6 Major Risk Influencers have the most impact on your task or operation?

- Considering your assignment and the associated challenges, which category of influencers are driving your Real-Time Risk Management decision.

	Risk Assessment/Activity	Risk Ownership Level
Enterprise	Agency Policy, Organizational Safety Plans	Agency/Bureau Leaders, Jurisdictional Entity Responsibility
Strategic	Strategic Risk Assessment	Jurisdictional entity together with Protection FMOs or Reqs, IMT
Operational	Next Implementation Shift: 215A, 215R	IMT, Crews, Aircraft, Engines, etc.
Real-Time	Sizing up a tree/felling Hiking into a fire	Individual firefighter

SAFETY OFFICERS: Taija Corso, Justin Randall (t)

Risk Assessment Worksheet				1. Incident Name: PIONEER FIRE				2. Location: WA-SES-000173				
3. Leaders Intent /Specific Objective: Risk Management tools will be used to evaluate tactics in order to provide for firefighter and public safety while implementing actions that have a high probability of success. THIS IS NOT AN EXHAUSTIVE LIST OF RISKS OR CONTROL OPTIONS				4. Prepared By: Taija Corso/Justin Randall				5. Date Prepared: Tuesday, July 16, 2024				
Signature: <i>Taija Corso</i>				Title: SOFC

Operational tasks	Medical Treatment and Transport Delay	Almost Certain	Catastrophic	Extremely High	Staff Medical personnel that is commensurate with the operational assignment. Coordination with the MEDL, BOAT Group and AOBD is essential. Detailed procedures are in place for medical transportation. If boat and/or air resources are unavailable, medical personnel is unavailable, and Risk Management matrix is unacceptable; consider alternative operational tactics and strategies. Use P.A.C.E. model for transportation planning utilizing the ICS206 medical plan. Identify helispots and possible. LEADERS INTENT: ANY WEATHER PERAMETERS OR OPERATIONAL CHANGES THAT WOULD AFFECT TRANSPORT WILL BE COMMUNICATED TO INCIDENT PERSONNEL FOR OPERATIONAL REASSEMENT.			Possible	Critical	High	YES	All Incident Personnel
Operational tasks	Hit by Hazards	Possible	Catastrophic	Extremely High	Maintain sound risk management processes and modify tactics and strategy to limit personnel exposure in areas that have probability for roll out and falling material.			Possible	Critical	High	YES	All Incident Personnel
Road maintenance	Vehicle collision or sliding off road, personal injury. 8200 road system deteriorating from use and difficult to drive. Increased fire behavior-entrapment.	Likely	Critical	Extremely High	Gravel ordered for the 8200 road. Use caution when driving in powder conditions. Minimize traffic where possible. Drive cautiously until road repaired.			Possible	Critical	High	YES	Road Group
Perimeter Control	Increased Fire Behavior-entrapment & burnover	Possible	Critical	High	With red flag warnings, drying of fuels, wind, and rollout potential anticipate increase in fire behavior and adjust tactics and strategies using the risk management process.			Unlikely	Critical	Moderate	YES	All Operations Personnel
Ground transportation (Hiking, UTV, Driving)	Motor Vehicle Accident- Struck by/Striking Object/Loss of vehicle control.	Possible	Critical	High	Hiking: Pace and situational awareness. UTV: Adhere to Agency UTV Policy Driving: Drive defensively, Chelan July traffic will be busy. Road closures do not have security assigned.			Possible	Critical	High	YES	All Incident Personnel
Transportation - Boat	Boat sinking from striking an object or capsizing due to high winds or waves- people drowning. Boat utilized as emergency egress for firefighter transport/escape route.	Unlikely	Critical	Moderate	Boat coordinators assigned. Qualified agency and commercial boat captains. PAX safety briefings and pax wear life jackets. Multi pax on board so MOB noticed immediately. Nomex PPE in boat for boat operators in event of emergency escape route access in dynamic fire environment. Boating plan and float following. Wind speed advisories. Sherrif directs boats to opposite side of lake and participants are cooperative and knowledgeable. Will rendezvous for briefing.			Rare	Moderate	Low	YES	Boat Group
Helicopter Operations	Aircraft Mishap - General	Unlikely	Catastrophic	High	VALIDATE THAT MISSIONS ARE ESSENTIAL AND MEET INCIDENT OBJECTIVES. TFR IS IN PLACE, IF YOU SEE INTRUSION COMMUNICATE IMMEDIATELY.			Rare	Catastrophic	Moderate	YES	All Operational Personnel
Interactions with Public Safety/Public Relations, Forest closure order growth	Personal Injury/Damage to Public Relations, no roads guards.	Possible	Moderate	Moderate	Travel with the expectation of public on roads and trails. Contact Team Law Enforcement, Safety Officers, and Security when necessary. Disengage from any confrontations.			Possible	Moderate	Moderate	YES	All Incident Personnel
Initial Attack	Unknown terrain, cooperators, leadership added to existing fire and ambient conditions. Sense of urgency & confusion.	Likely	Critical	Extremely High	Incident IA resources pre-designated. Briefed at incident and dispatched with incident leadership. IA frequencies programmed into radios.			Possible	Critical	High	YES	All Operations Personnel
All Incident Operational Tasks	Medical - Heat Related Illness/Wildlife	Likely	Moderate	High	Identifying heat related illness early, appropriate pace in extreme temps, shade, fluid intake in appropriate proportions. Discussions/Awareness on wildlife/snakes.			Unlikely	Critical	Moderate	YES	All Personnel

PIONEER NW TEAM 12 INITIAL ATTACK RESPONSE PLAN

Per the Pioneer Fire Delegation of Authority, NW Team 12 has responsibility for Initial Attack response within the Pioneer Fire TFR. Additionally, the team will support initial attack efforts surrounding the TFR as requested. This includes ground and air resources. Most of the TFR consists of Forest Service and Park Service land with small parcels of private inholdings. Additional land ownership adjacent to the TFR consists of BLM, State, and private land.

Pioneer Initial Attack Response Plan:

- IA fires reported near or within the TFR will be reported through CWICC.
- Appropriate agency Duty Officer will be informed of the fire. If the fire is within the TFR and suppression actions are necessary, CWICC will contact Field Operations by phone or radio and provide response instructions. The duty officer is responsible for notifying the agency administrator of decision. Order of contact:
 - CWICC will contact Field Ops Aaron Rowe at 509-679-5378 or Field Ops trainee Lonnie Newton at 208-501-4019
 - If neither Field Ops can be reached by phone, call Field Ops on radio. If not reachable on radio, contact Pioneer Communications and have them relay message.
 - If no contact can be established with Field Ops, contact Planning Ops Kurt Ranta at 360-708-5227 or Planning Ops trainee Rob Poyner at 425-512-2621.
- Air Operations and/or Division/Group Supervisor assigned to the division/group nearest the IA location will be notified by Field Operations and respond with assigned resources.
- Local forest or state Initial Attack frequencies will be used and provided in the IAP Communications Plan.
- The same processes will be used for fires outside of TFR if assistance from Pioneer Fire resources is requested.
- Any air resources used on initial attack or support missions other than Pioneer will be on a lend/lease arrangement.
- All resources in Structure/IA Group are available for Initial Attack response. Other divisions/groups may have resources also identified for IA response. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.

Process as written in 204 comments:

- All resources in Structure/IA Group are available for Initial Attack response per the Pioneer Fire IA Response Plan. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.
 - If Initial Attack occurs within the TFR, Wenatchee Dispatch will coordinate with appropriate duty officer and contact Field Ops for response.
 - Field Operations will contact the Structure/IA Group Supervisor and/or Air Operations to coordinate response to new start.
 - Local forest Initial Attack frequencies will be used and provided in the IAP Communications Plan
 - The same process will be used for fires outside of TFR if assistance from Pioneer fire resources is requested.

6. Control Operations/Work Assignments:							
<p>TASK: Implement point protection on private and federal infrastructure. Monitor fire growth north and west of Moore ridge and Hunts Creek and look for opportunities to limit fire spread towards Stehekin.</p> <p>PURPOSE: To slow fire progression, minimize fire intensity around critical values, provide time for suppression tactics, and prevent fire spread towards Stehekin.</p> <p>END STATE: Fire impacts to critical values, including private inholdings, federal infrastructure and Stehekin are minimized.</p>							
7. Special Instructions:							
<p>-In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary.</p> <p>-Minimize ground disturbance on the Moore Point and Meadow Creek alluvial fans in order to protect sensitive resources.</p> <p>-Hose used from Prince Creek to Moore Pt: contaminated with invasive plants. Do not reuse. Backhaul to Moore Pt DP22 and store in "infested hose" area at Moore Pt until decontaminated.</p> <p>-All equipment, including UTVs, must be thoroughly rinsed before being backhauled from Moore Point.</p> <p>-Ensure hazard mitigations and IWI protocols are in place before taking action.</p> <p>-** Denotes available for Initial Attack</p>

Controlled Unclassified Information//Basic

1. Incident Name:				3.			
PIONEER				IV		STRUCTURE/IA	
2. Operational Period: 0700-2100							
Date/Time From: 07/17/2024 0700 WED		Date/Time To: 07/17/2024 2100 WED					
4. Operations Personnel							
OPERATIONS CHIEF		AARON ROWE, LONNIE NEWTON (T)		BRANCH DIRECTOR		TIM BARNETT	
DIVISION/GROUP SUPERVISOR		SCOTT CLEAVE		AIR OPS BRANCH DIRECTOR		PAUL BALFOUR	
5. Resources Assigned this Period							
Strike Team / Task Force / Resource Designator		LWD	Leader	Number Persons	Drop Off PT./Time	Pick Up PT./Time	
6. Control Operations/Work Assignments:							
<p>TASK: Continue structure assessment northeast of Manson and complete structure protection plan for Manson. Have resources prepared for IA response.</p> <p>PURPOSE: Plan for and mitigate potential long-term impact to communities down lake from fire. Provide a resource to respond to IA fires.</p> <p>END STATE: Structure Plan has been developed and mitigation implemented for protection of structures in and around Manson.</p>							
7. Special Instructions:							
<p>-Ensure hazard mitigations and IWI protocols are in place before taking action.</p> <p>-All resources in Structure/IA Group are available for Initial Attack response per the Pioneer Fire IA Response Plan. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.</p> <p>-If Initial Attack occurs within the TFR, Wenatchee Dispatch will coordinate with appropriate duty officer and contact Field Ops for response.</p> <ul style="list-style-type: none"> Field Operations will contact the Structure/IA Group Supervisor and/or Air Operations to coordinate response to new start. Local forest Initial Attack frequencies will be used and provided in the IAP Communications Plan. The same process will be used for fires outside of TFR if assistance from Pioneer fire resources is requested.

Resource Advice

Lead READ: Brigitte Ranne 509-860-7016, brigitte.ranne@usda.gov

REAF: Hector Rodriguez 509-393-5379, Hector.Rodriguez3@usda.gov

REAF: Eireann Pederson 360-854-8197, eireann.pederson@usda.gov

REAF: Carrissa Camenson 360-899-7147, carissa.camenson@usda.gov

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.
- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.
- In large or long term spike the camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If the camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat or before entering National Park Service Land.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.
- Weed wash all vehicles, including boats, when they arrive to the incident and when demobed.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.
- Non-mechanized suppression activities are recommended within Riparian Reserves (150-300 ft from stream channel). For example, consider hand lines instead of dozer lines when feasible.

Retardant Use

- Retardant avoidance areas are present in the fire suppression area for both aquatic and terrestrial species.
- Track all retardant drops – locations and amounts.
- Report all mis-applications ASAP to READ. Monitoring and reporting of misapplications is required.

Wet Meadows

- No line or other disturbance in wet meadows in the Summer Blossom area (east of South Navarre campground above and below the 8200 road) and at Coyote and Poison Springs at the headwaters of their respective creeks.

Dry Meadows

- Minimize disturbance from staging and parking areas in dry meadows. These areas recovery slowly and are vulnerable to invasive plant infestation.

White Bark Pine

- Avoid cutting white bark pine whenever possible. Needles of 5 keep it alive! Ask READ for help with ID.

Burnout operations

- Plan to protect whitebark pine of all ages and mature cold and moist forest during burnouts. READ consultation and line officer approval is required for burn plans that include these forest types.
- During burnouts modify firing to retain large trees, large snags and large down wood in forests whenever possible.
- Minimize total acres burned in burnouts.
- Incorporate typical resource protection measures used in RX burning whenever it is safe and practical to do so (such as retention of green islands in moist areas).
- Provide a map of areas that were burned as part of the burnout operation (for use in emergency consultation).
- If cultural resources are discovered during suppression activities, leave on site and notify READ.

PIONEER US-WA-SES-000173

De mob List for Wednesday 7/17/2024

OVERHEAD			
O-249	0730	TFLD	HARPER, MARK THOMAS
O-378	0700	ABRO	GEISLER, CORY
O-381	0830	HEBM	MERRITT, WILLOW

**Be sure to use the most current IAP QR Code.
Any questions call Demob at 509-661-5376**

Check In Message

- Please complete the virtual check-in process via the QR code on the front cover.
- You are not checked in until you provide the following:
 - 1) Red Cards
 - 2) Roster/Manifest
- Please email documents to: 2024.pioneer.checkin@firenet.gov

Any Questions:

Phone: 509-661-5372

Email: 2024.pioneer.checkin@firenet.gov

Demob Message

- Fliers complete the “Air Travel Request” via the QR code on the front cover 72 hours prior to flight date.
- Return supplies to the Cache.
- Return radios, antennas, etc., to Communications.
- All contract equipment and vehicles driven in fire area will need to do weed wash.
- Contact Finance about closing out your paperwork.
- Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.

Any Questions:

Phone: 509-661-5376

Email: 2024.pioneer.demob@firenet.gov

Human Resource Message

**Pioneer Fire
July 17, 2024**

Social Media

What if there was a tragedy on this incident that affected you? How would you want your family and friends to find out?

We live in a social media world where information sharing is often instantaneous by cell phones, text messages, emails, video clips, photos, Facebook posts, Twitter, blogs, etc.

Think about the perception if we're posting about how wonderful fire is and how much money we are making. That doesn't come across well.

If an incident tragedy should occur, our Unified Team will follow specific protocols to notify the appropriate people as quickly and sensitively as possible. Please allow our process to take place. Consider those affected, and the way the message can be perceived before sharing sensitive information with others.

**Margaret Dietrich
Human Resource Specialist, 360-701-3154**

Public Information

PHOTOS: Your fireline photos help us build understanding with the public. We are looking for any pictures of the fire line and **fire resources working on the fire line in their PPE**. You can send photos to: Email: 2024.pioneer@firenet.gov; Text: 509-388-1475

As always, make sure all PPE is worn.

PERSONAL SOCIAL MEDIA: When unprofessional or unsafe activities are posted, it reflects poorly on the entire fire and aviation community and has a shelf life of years. Nothing is private and no one benefits when the fire service is perceived as unprofessional. For more information, see: https://www.nifc.gov/sites/default/files/pio/documents/photo_video_NIFC.pdf

LOST AND FOUND: We have a few items in the information trailer. If you have lost something, stop by and see if it has been turned in. If you find something left behind, you can turn it in to us.

MAIL: Public Information Officers will help facilitate mail. If you need to receive mail while at this incident, you can pick it up at the PIO trailer. Please use this format and address:

Name and resource order number
Pioneer Fire
300 Madeline Ave
Manson, WA 98831

QUESTIONS FROM THE PUBLIC: If community members have questions that you do not feel equipped to answer professionally, please give them our fire information line: 541-861-5808. The public may access information by scanning this QR code.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- **ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.**
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

MEDICAL PLAN (206 WF)

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
