INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: 0700-2100	
PIONEER-EASY-KITLING PEAK	Date/Time From: 07/20/2024 0700 SAT	Date/Time To: 07/20/2024 2100 SAT
3. Objective(s):		
<u>Strategic Framework</u> The Pioneer Fire is a full suppression fire utilizing strategies and tactics that provide the highest likelihood of success while mitigating risks to the responders and public. Extreme terrain prevents direct attack. Indirect lines are being identified and established that reduces risk to responders while protecting identified values including private and federal infrastructure and recreational values.		
<u>Management Objectives:</u>		
<ul style="list-style-type: none"> • Ensure the safety and well-being of responders and the public by making timely risk-informed decisions that align with values at risk. • Protect private and federal infrastructure and recreational values. • Foster relationships with local cooperators and the public by providing coordinated, accurate and timely information. • Coordinate suppression activities with READ's to identify and mitigate current and future impacts to the landscape and resources. • Treat each other with dignity and respect and act in a professional manner on the fire and in the communities. • Manage cost commensurate with values at risk by coordinating with the Agency Administrators and Incident Business Advisors. 		
4. Operational Period Command Emphasis:		
<ul style="list-style-type: none"> • Implement an effective suppression strategy utilizing direct attack where and when appropriate to protect values at risk. When fire behavior, terrain or safety concerns prohibit direct attack, utilize other suppression tactics such as indirect and point protection as appropriate to reduce risk to responders. Take advantage of natural features such as breaks in fuels, topographic features, or changes in weather. • Establish indirect control lines with the highest probability of success which prevent fire spread into populated areas. • Communicate with local law enforcement officials to ensure current and potential evacuations are coordinated. 		
General Situational Awareness:		
As unusually high temperatures continue in the area, responders are urged to prioritize personal safety in the heat by staying hydrated, taking breaks, and seeking shade or cooler environments.		
All incident personnel should be familiar with the Incident Response Plan and understand their role in supporting an Incident within an Incident (IWI). The Pioneer fire has unique challenges with excessive travel times and methods. Do not rely solely on one method of transport or extraction. Be mindful of weather, terrain, travel time and access limitations that could potentially cause delay in providing triage, treatment, extrication and transport of injured personnel.		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

Fire Weather Forecast

FORECAST NO: 38
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Saturday 7/20/2024
TIME AND DATE ISSUED: 7/19/2024 1900 hrs

INCIDENT: Pioneer Fire
SIGNED: *Bob Tobin*
Incident Meteorologist

Discussion:

*****Excessive Heat Warning Saturday through Monday***
*****Fire Weather Watch*******

The upper-level flow will remain mainly south-southwest through the weekend as high pressure builds over the four corners region. Temperatures on Saturday will be about 3-5 degree warmer today, then increase another 3-4 degrees on Sunday. Overnight lows will remain quite warm as well. The atmosphere continues to be very dry, so relative humidity will be very low with very bad overnight recoveries. Some changes are expected by the middle of next week, with temperatures rolling back close to seasonal normals.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Sunny, very hot and dry.

MAX TEMPERATURE: 97 to 103 valleys/mid-slopes. 85 to 92 around 5000 feet.

MIN RH: 12 to 16 percent valleys/mid-slopes. 15 to 20 percent ridges.

20 FT WINDS:

Lower Valleys: Down lake, down canyon 3 to 5 mph through 0900...then southeast to south 5 to 10 mph gusting to 12 mph.

Mid-slopes and Ridges: Southeast to Southwest 8 to 12 mph gusting to 20 mph.

HAINES INDEX: 4 Low.

TRANSPORT WINDS: Southwest 8-12 mph.

INVERSION: Moderate to strong low-level inversion lifting by 1000. Mixing Height 10000 ft by 1100.

TONIGHT:

SKY/WEATHER: Clear with areas of smoke.

MIN TEMPERATURE: 65 to 70 valleys/mid-slopes. 60 to 65 around 5000 feet.

MAX RH: 30 to 40 percent valleys/mid-slopes. 25 to 35 percent ridges around 5000 feet.

20 FT WINDS:

Valleys/Lower Slopes: Northwest-north and down the lake 6 to 10 mph gusting to 20 mph.

Mid-Slopes and Ridges: West to northwest 7 to 10 mph gusting to 12 mph.

INVERSION: Developing after 2000 hrs. to near 1000 ft. Thermal belt activity likely at the top of the inversion.

Sunday:

SKY/WEATHER: Sunny. Smokey through early afternoon.

MAX TEMPERATURE: 97 to 106 valleys/mid-slopes. 87 to 92 around 5000 feet.

MIN RH: 12 to 15 percent valleys/mid-slopes. 14 to 18 percent ridges.

20 FT WINDS:

Lower Valleys: Northwest in the morning...becoming southeast-southwest 5 to 10 mph gusting to 15 mph.

Mid-slopes and Ridges: Southeast to south 5 to 10 mph gusting to 15 mph.

HAINES INDEX: 5 Moderate.

TRANSPORT WINDS: SE 10 to 12 mph.

Boating concerns Saturday Down lake winds until about 0900. Then up-lake Expect bumpy conditions across the lake in the afternoon, waves to 2 feet are common with these winds.

Aviation concerns Friday: Temperature near 30C at 4000 feet for load calcs. Thermal turbulence likely with differential heating due to slope/terrain.

Weather observations can be texted to 509-844-7003 or emailed to bubba57@comcast.net.

Fire Weather Forecast

FORECAST NO: 2

PREDICTION FOR: 24 Hr Shift

SHIFT DATE: Friday 7/20/2024

TIME AND DATE ISSUED: 7/19/2024 2000 hrs

INCIDENT: Easy Fire / Kitling Peak Fire

SIGNED: *Bob Tobin*

Incident Meteorologist

Discussion:

*****Very Warm and Very Dry Through the Weekend*****

The upper-level flow will be south-southwest through the weekend as high pressure builds over the four corners area. A weak disturbance on Sunday may increase winds a bit, but conditions should remain dry. Temperatures on Saturday will increase 4 to 8 degrees Saturday and a few degrees warmer on Sunday. Temps will be well above normal. Overnight lows will remain quite warm as well. The atmosphere continues to be very dry, and it will become drier Saturday and Sunday. Overnight recoveries will be poor at best. Some changes are expected by Tuesday, with temperatures rolling back close to seasonal normals.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Sunny, and warm. Very smokey in the morning along the road.

MAX TEMPERATURE: 82 to 87 valleys/mid-slopes. 75 to 79 on the ridge around 6000 feet.

MIN RH: 20 to 30 percent valleys/mid-slopes. 20 to 24 percent on the ridge.

20 FT WINDS:

Lower Valleys: Upslope winds...westerly/ upslope 5 to 10 mph.

Mid-slopes and Ridges: Southwest to west 8 to 12 mph gusting to 20 mph.

HAINES INDEX: 5 moderate

TRANSPORT WINDS: Southwest-west 8-10 mph.

TONIGHT:

SKY/WEATHER: Clear with areas of smoke.

MIN TEMPERATURE: 55 to 60 valleys/mid-slopes. 60 to 64 around 6000 feet.

MAX RH: 60-65 percent valleys/mid-slopes. 75 to 80 percent on the ridge.

20 FT WINDS:

Valleys/Lower Slopes: Northwest 4 to 8 mph.

Mid-Slopes and Ridges: Northwest to north 5 to 10 mph.

INVERSION: Developing after 2000 hrs. to the valley floor.

Sunday:

SKY/WEATHER: Sunny. Smokey through the morning.

MAX TEMPERATURE: 85 to 92 valleys/mid-slopes. 79 to 84 around 6000 feet.

MIN RH: 15 to 20 percent valleys/mid-slopes. 20 to 25 percent on the ridge.

20 FT WINDS:

Lower Valleys: Becoming up-slope southwest-west 5 to 10 mph.

Mid-slopes and Ridges: South to southwest 5 to 10 mph gusting to 15 mph.

HAINES INDEX: 4 Low.

TRANSPORT WINDS: S W8 to 10 mph.

Weather observations can be texted to 509-844-7003 or emailed to Bob Tobin at bubba57@comcast.net.

Fire Behavior Forecast # 39

Name of Incident: Pioneer	Administrative Unit: SE Region DNR / Okanogan-Wenatchee NF
Date & Time Issued: July 19, 2024 @ 1900	Operational Period: DAY 07/20/2024
FBAN: Don Strand and Steve Ziel	Signed: /s/ <i>Steve Ziel</i> / RDS

Excessive Heat Warning today. Hotter and drier weather brings potential for another very active fire behavior day. Rapid fire spread will occur with wind and/or slope alignment in available fuels. Expect very active burning conditions between 1200 to 2000 hours. Live fuels are available to contribute to fire intensity on mid and lower slopes. Lake effect winds (up/ down lake) dominate lower and mid slopes; much of the fire is on a dry S/SW aspect with steep side drainages that provide strong upslope winds. Wind/slope alignment and/or lake wind will influence and accelerate fire rate of spread and direction.

Weather Summary **See attached Fire Weather Forecast**

Fire Behavior Summary

Pioneer fire area fuels are composed of a mosaic of **Timber Litter, Grass, Timber with Understory, and Grass/Shrub** models. The fire is burning in the Rex Creek (2001) fire footprint. Primary tree species include mixed sizes and densities of Douglas Fir and Ponderosa Pine. Local timber litter is compact to fluffy. Brush and understory species include ceanothus, hardwoods, and dog-hair conifer reproduction. **Numerous snags and heavy downed fuel loadings are common throughout all areas.** Grasses are partially to fully cured depending on elevation and aspect. Fuel conditions vary by aspect, previous fire history, and elevation.

Expected fire behavior includes areas of sustained head fire runs, aggressive flanking, and backing (with rollout) with wind/slope alignment in areas with available fuels. In light fuels (grass, pine needle litter) expect dangerous rates of fire spread. Heavy fuels are retaining heat serving as ignition sources for surrounding fuels. Slope reversals will produce rapid rates of spread and high intensity burning when it occurs. Expect lee-side spotting as fire reaches ridgelines. Fuel concentrations will generate high intensity fire behavior with torching. Expect group torching with spotting to <.5 mi. where sufficient timber fuels are present.

*** FFM= 3%-5%, 1000hr. moisture 8 to 9%, Woody fuels 100%, Probability of Ignition—80-90%, Max Spotting 0.5 miles (or more with column development).**

Pioneer Fire Fuel Type	Rate of Spread	Flame Length	Backing ROS	Spot Size in 1-Hour
...If your work area includes -	(CH/HR = FPM)	Feet	FPM	Acres
GR2 - Moderate load grass/shrub	45 - 50	4 - 5	2	75 - 100
SH2 – Moderate load shrub	3 - 5	2-3	< 1	<1
TU5 - High load Timber w/ Understory	12 - 14	8- 9 (torching)	2	5 - 7
TL8 – Long needle timber litter	10-12	4- 6	2	6 - 8

Specific Assignments - Pioneer Fire:

Div. A – Fire spread on the westerly aspect of Moore Mtn, burning towards Flick Creek. Runs/ spots.

Div. S – Prince Cr. is spreading on both sides upstream to Middle Fk. Prince Cr. and toward Cub Lake. Finger runs likely.

Lakeshore Protection Group – **Monitor up/down lake winds closely.** Expect rapid spread in fine fuels if fire becomes active on the lower slopes between Moore Point and Stehekin, and down lake to Nelson Ridge. Expect high intensity fire behavior in timber fuels

Other Br./Grp. – As fire becomes active, monitor fire activity for travel. Monitor smoke direction/amount with SW winds.

***IA** – Expect rapid rates of spread in light fuels. Ensure good size-up before engaging and base tactics on current as well as expected fire behavior. Review potential ROS and FL by fuel type.

Air Operations: Dense downwind and lake smoke early.

Safety

Excessive Heat Warning today. Hot and dry conditions continue to dry live and dead fuels making them more available to burn and add to intensity.

Fire is dynamic - Keep in mind, fire may have moved from where you saw it yesterday and repositioned into available fuels today.

Today’s Fire Behavior Forecast contains 650 words written for you situational awareness.

Fire Behavior Forecast # 1

Name of Incident: Easy and Kitling Peak	Administrative Unit: Okanogan-Wenatchee NF
Date & Time Issued: July 19, 2024 @ 2000	Operational Period: DAY 07/20/2024
FBAN: Don Strand and Steve Ziel	Signed: /s/ <i>Steve Ziel</i> / RDS

Hotter and drier weather brings potential for another active fire behavior day. Wind / Slope alignment on the southwest aspect will increase rate of spread where available fuels are present. Expect very active burning conditions between 1200 to 2000 hours.

Weather Summary ****See attached Fire Weather Forecast****

Fire Behavior Summary

Easy Fire

Fuels consist of TU5, TL5, TU2; generally, a timber litter fuel with mature mixed conifer including Douglas fir, Engleman Spruce, Red/Yellow Cedar, Mountain Hemlock. Areas with moss/lichen and snags with large down wood present. Understory regeneration and pockets of leafy brush species are present. Fuels in this area are drier than normal for this time of year.

Expect backing and flanking fire behavior with potential for short up slope runs. Fire spread from roll out of burning material is likely on the steep slopes. Potential for Single and group torching with spotting up to 0.3 mile exists.

*** FFM= 6% to 8%, 1000hr. moisture estimated to be 14 %, Woody fuels 130%, Probability of Ignition—40-60%, Max Spotting 0.3miles (or more with column development).**

Pioneer Fire Fuel Type	Rate of Spread	Flame Length	Flanking ROS	Backing ROS
...If your work area includes -	(CH/HR = FPM)	Feet	FPM	Ft/min
TU2 – Moderate load timber shrub	10	3	2	0.5
TU5 - High load Timber w/ Understory	8	6	2	0.5
TL5 – High load conifer litter	4	2	1	0.2

Kitling Peak Fire

This is a small fire in surface moss, duff, sparse grass and brush. Area is surrounded by very rocky area. Fire behavior is smoldering and creeping is surface and ground fuel.

Safety

Hot and dry conditions continue to dry live and dead fuels making them more available to burn and add to fire intensity. On steep slopes, be mindful of rolling debris and fire weakened trees and snags.

Maintain Situational Awareness by reviewing the Fire Assessment Process in the IRPG (starting on pg 33)

Today's Fire Behavior Forecast contains 358 words written for your situational awareness.

SAFETY MESSAGE

20 JULY 2024

INCIDENT: Pioneer Fire & Easy Fire

OPERATIONAL PERIOD: 0700-2100

RECORD BREAKING HEAT

*Predicted record breaking heat in the Wenatchee Valley. These temperatures aren't abnormal for August, but almost three weeks in to July is out of normal.

*Work at the pace your body tells you to. Today and for the season. Again, its only July.

***Heat Illnesses can kill; quick recognition is critical. Know the signs and symptoms:**

- Heat cramps: The least serious form of hyperthermia, but a warning sign that more serious problems may develop.
- Heat exhaustion: Occurs when the body produces more heat than it can dissipate, which can lead to dehydration or temperature regulation failure.
- **Heat stroke: Requires the body to be cooled down as quickly as possible.**

SAFETY OFFICERS: Taija Corso, Joshua Northrup

Night Operations	Human Factors - Night Ops: Visibility, Fatigue. Limited egress options for firing operations.	Likely	Critical	Extremely High	Dedicated night operations for boat egress. Dedicated night shift medic. Identify day sleeping areas.			Possible	Critical	High		Div A

PIONEER NW TEAM 12 INITIAL ATTACK RESPONSE PLAN

Per the Pioneer Fire Delegation of Authority, PNW Team 12 has responsibility for Initial Attack response within the Pioneer Fire TFR. Additionally, the team will support initial attack efforts surrounding the TFR as requested. This includes ground and air resources. Most of the TFR consists of Forest Service and Park Service land with small parcels of private inholdings. Additional land ownership adjacent to the TFR consists of BLM, State, and private land.

Pioneer Initial Attack Response Plan:

- IA fires reported near or within the TFR will be reported directly through CWICC by radio or phone. CWICC phone number is 509-884-3473
- Appropriate agency Duty Officer will be informed of the fire. If the fire is within the TFR and suppression actions are necessary, CWICC will contact Field Operations by phone or radio and provide response instructions. The duty officer is responsible for notifying the agency administrator of decision. Order of contact:
 - CWICC will contact Field Ops Aaron Rowe at 509-679-5378 or Field Ops trainee Lonnie Newton at 208-501-4019
 - If neither Field Ops can be reached by phone, call Field Ops on radio. If not reachable on radio, contact Pioneer Communications and have them relay message.
 - If no contact can be established with Field Ops, contact Planning Ops Kurt Ranta at 360-708-5227.
- Air Operations and/or Division/Group Supervisor assigned to the division/group nearest the IA location will be notified by Field Operations and respond with assigned resources.
- Local forest or state Initial Attack frequencies will be used and provided in the IAP Communications Plan.
- The same processes will be used for fires outside of TFR if assistance from Pioneer Fire resources is requested.
- Any air resources used on initial attack or support missions other than Pioneer will be on a lend/lease arrangement.
- All resources in Structure/IA Group are available for Initial Attack response. Other divisions/groups may have resources also identified for IA response. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.
- Initial attack fires in the North Cascades NP Complex are reported through Puget Sound Dispatch. If IA occurs in the Lake Chelan NRA within the TFR or if IA support is needed in other parts of the NOCA Complex, PSICC will notify CWICC. CWICC will then proceed with notifications as outlined above.

Process as written in 204 comments:

- All resources in Structure/IA Group are available for Initial Attack response per the Pioneer Fire IA Response Plan. Number and type of resources mobilized to a new start will be determined by anticipated or requested need. Resources will be led by overhead at the Strike Team Leader level or above.
 - If Initial Attack occurs within the TFR, Wenatchee Dispatch will coordinate with appropriate duty officer and contact Field Ops for response.
 - Field Operations will contact the Structure/IA Group Supervisor and/or Air Operations to coordinate response to new start.
 - Local forest Initial Attack frequencies will be used and provided in the IAP Communications Plan
 - The same process will be used for fires outside of TFR if assistance from Pioneer fire resources is requested.

6. Control Operations/Work Assignments:						
<p>TASK: Implement point protection on private and federal infrastructure. Monitor fire growth north and west of Moore ridge and Hunts Creek and look for opportunities to limit fire spread towards Stehekin.</p> <p>PURPOSE: To slow fire progression, minimize fire intensity around critical values, provide time for suppression tactics, and prevent fire spread towards Stehekin.</p> <p>END STATE: Fire impacts to critical values, including private inholdings, federal infrastructure and Stehekin are minimized.</p>						
7. Special Instructions:						
-In large or long term spike camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary.

6. Control Operations/Work Assignments:						
<p>TASK: Continue constructing and improving indirect control lines on Cooper's Ridge from H-46 to DP-53. Continue shaded fuel break and line construction from DP-53 down Antolin line to Lake Chelan. Prep and plumb Antolin line for potential future firing operations. Complete road repair on Antoine Rd (8140), Cooper's Ridge Rd (8020) and Black Canyon Rd (4140).</p> <p>PURPOSE: To protect critical values at risk, including infrastructure in Manson and Chelan, and to return the roads affected by suppression traffic to their original state.</p> <p>END STATE: The Antolin secondary strategic line has been completed as a line of defense for future fire growth towards the Methow Valley and Manson. Roads affected by fire suppression use are returned to pre-fire condition.</p>						
7. Special Instructions:

6. Control Operations/Work Assignments:

TASK: Look for opportunities to keep the fire North of Highway 20, East of the 2004 Mebee Ridge fire scar, South of the Okanogan and Skagit County divide, and West of Swamp Creek.

PURPOSE: To prevent or minimize fire impacts to the Highway 20 corridor, Forest Service infrastructure and natural/cultural resources.

END STATE: Impacts to the Highway 20 corridor, Forest Service infrastructure and natural/cultural resources, and other identified values have been minimized.

Resource Advice

Lead READ: Brigitte Ranne 509-860-7016, brigitte.ranne@usda.gov

REAF: Hector Rodriguez 509-393-5379, Hector.Rodriguez3@usda.gov

REAF: Eireann Pederson 360-854-8197, eireann.pederson@usda.gov

REAF: Carrissa Camenson 360-899-7147, carissa.camenson@usda.gov

MIST for Spike Camp and Lucerne Forward Operating Base Management

- Employ minimum impact suppression tactics (MIST) where feasible, especially in remote or sensitive areas.
- If spike camps are necessary, use existing, or previously impacted campsites where available. If existing campsites are not available; use your local resource advisor to help identify the most resilient sites in rocky or sandy soils. Avoid camping in wet meadows, along streams, or on lake shores.
- Store food properly so that it is not accessible to wildlife. Consider hanging food in trees at least 15 feet off the ground and 5 feet from the trunk of the tree, or store food in sealable containers. Store food away from the campsite (300 feet is ideal) to reduce the risk of human and bear (and rodent!) conflicts.
- Do not let garbage and food scraps accumulate in camp. All garbage and food scraps need to be removed from the camp ASAP and before leaving the site.
- Minimize disturbance to land in preparing bedding and campfire sites. Do not clear vegetation, trench, or excavate a flat spot to create bedding sites.
- Do not use nails in trees. Don't construct camp furniture.
- If a campfire is built for warmth in the evening, build either a pit or mound fire. Use dead and down firewood. Use small diameter wood that burns down more cleanly. Don't burn plastics or aluminum - pack it out with the rest of the camp garbage.
- In small spike camp situations (not Lucerne), individuals should use the "cat-hole" method of disposing of human waste. Toilet seats should be located a minimum of 200 feet from water sources. Holes should be dug 6-8 inches deep.
- In large or long term spike the camps use helicopters, boats, or pack stock to deliver portable backcountry latrines and remove human waste if necessary. If the camp does not have adequate pack, boat, or air support for human waste management, establish community latrines well away from water sources and common areas. Use human waste bags, if necessary

Dipping and Drafting

- No cross-dipping between water bodies. All buckets or snorkels should be cleaned, inspected, and dried in the sun if they must be used between lakes. Dipping in small lakes must be pre-approved by the READ or AA.
- When drafting, use already disturbed areas for stream access (road crossings, dispersed campsites) to reduce the need for riparian vegetation clearing.
- Use screens (3/32" inch) for all pumping operations.
- Use containment pads and basins under pumps and fuel cans. Ensure a spill kit is present with every operating pump.

Invasive Species

- The fire is burning within an infestation of common crupina, a WA State Class A Noxious weed. Prevent spread of crupina off site – plan to wash hose and other equipment. Request fire fighters brush boots before boarding boat or before entering National Park Service Land.
- Inspect slings and remove all plant/soil material prior to use.
- Ensure all camps, staging areas, helispots and cargo areas are free of invasive plants to prevent spread to un-infested areas.
- Weed wash all vehicles, including boats, when they arrive to the incident and when demobed.

Fisheries /Aquatic Recommendations

- If trees must be felled in riparian areas for suppression or safety reasons, fell them toward streams where possible and minimize bucking where possible.
- Non-mechanized suppression activities are recommended within Riparian Reserves (150-300 ft from stream channel). For example, consider hand lines instead of dozer lines when feasible.

Retardant Use

- Retardant avoidance areas are present in the fire suppression area for both aquatic and terrestrial species.
- Track all retardant drops – locations and amounts.
- Report all mis-applications ASAP to READ. Monitoring and reporting of misapplications is required.

Wet Meadows

- No line or other disturbance in wet meadows in the Summer Blossom area (east of South Navarre campground above and below the 8200 road) and at Coyote and Poison Springs at the headwaters of their respective creeks.

Dry Meadows

- Minimize disturbance from staging and parking areas in dry meadows. These areas recovery slowly and are vulnerable to invasive plant infestation.

White Bark Pine

- Avoid cutting white bark pine whenever possible. Needles of 5 keep it alive! Ask READ for help with ID.

Burnout operations

- Plan to protect whitebark pine of all ages and mature cold and moist forest during burnouts. READ consultation and line officer approval is required for burn plans that include these forest types.
- During burnouts modify firing to retain large trees, large snags and large down wood in forests whenever possible.
- Minimize total acres burned in burnouts.
- Incorporate typical resource protection measures used in RX burning whenever it is safe and practical to do so (such as retention of green islands in moist areas).
- Provide a map of areas that were burned as part of the burnout operation (for use in emergency consultation).
- If cultural resources are discovered during suppression activities, leave on site and notify READ.

**Be sure to use most current IAP QR Code
Demob - 509-661-5376**

Check In Message

- Please complete the virtual check-in process via the QR code on the front cover.
- You are not checked in until you provide the following:
 - 1) Red Cards
 - 2) Roster/Manifest
- Please email documents to: 2024.pioneer.checkin@firenet.gov

Any Questions:

Phone: 509-661-5372

Email: 2024.pioneer.checkin@firenet.gov

Demob Message

- Fliers complete the “Air Travel Request” via the QR code on the front cover 72 hours prior to flight date.
- Return supplies to the Cache.
- Return radios, antennas, etc., to Communications.
- All contract equipment and vehicles driven in fire area will need to do weed wash.
- Contact Finance about closing out your paperwork.
- Once the above items have been completed, SCAN the QR code on the front cover and complete the demob questions.

Any Questions:

Phone: 509-661-5376

Email: 2024.pioneer.demob@firenet.gov

Pioneer Finance Message

Scan this QR code to submit documents to finance.

SUBJECT: *Include Key Word* **TIME** for Overhead, Crews & Cooperators

SUBJECT: *Include Key Word* **EQUIPMENT** for Contract Resources

Phone: 484-501-1835

Finance Email: 2024.pioneer.finance@firenet.gov

Please submit the below listed documents to the finance for Check-in, Daily processing and Demob.

Overhead, Crews & Cooperator Resources	Contract Resources
<ul style="list-style-type: none"> • Check-In: Crew Manifest, Cooperative Agreement (if applicable), AD Hire Letter, Resource Order • Daily: Crew Time Report (CTR), Shift Tickets • Demob: Signed OF288, Final Equipment Use Invoice (Cooperator). If you don't have a way to sign you must come to finance. 	<ul style="list-style-type: none"> • Check-In: Resource Order, Contract/VIPR Agreement (make sure you have your UEI), Pre-Inspection, Crew Manifest • Daily: Shift Tickets, receipts (fuel issues, claims, etc.) • Demob: Contractor Evaluations, Final Shift Tickets and receipt(s) for Addition/Deductions, Post-Inspection, Final Signed Invoices. If you don't have a way to sign you must come to finance

REMINDERS

In Camp Medical Procedure

If Red or Yellow

Yell for help and stay with patient

Provide first aid as appropriate

Call 911

Contact Pioneer communications at **208-891-8093** or by radio

If Green

Go to Adventure Medical Trailer for evaluation and treatment

(Near playground)

Public Information

PHOTOS: Your fireline photos help us build understanding with the public. We are looking for any pictures of the fire line and **fire resources working on the fire line in their PPE**. You can send photos to: Email: 2024.pioneer@firenet.gov; Text: 509-388-1475

As always, make sure all PPE is worn.

PERSONAL SOCIAL MEDIA: When unprofessional or unsafe activities are posted, it reflects poorly on the entire fire and aviation community and has a shelf life of years. Nothing is private and no one benefits when the fire service is perceived as unprofessional. For more information, see:

https://www.nifc.gov/sites/default/files/pio/documents/photo_video_NIFC.pdf

LOST AND FOUND: We have a few items in the information trailer. If you have lost something, stop by and see if it has been turned in. If you find something left behind, you can turn it in to us.

MAIL: Public Information Officers will help facilitate mail. If you need to receive mail while at this incident, you can pick it up at the PIO trailer. Please use this format and address:

Name and resource order number
Pioneer Fire
300 Madeline Ave
Manson, WA 98831

QUESTIONS FROM THE PUBLIC: If community members have questions that you do not feel equipped to answer professionally, please give them our fire information line: 541-861-5808.

The public may access information by scanning this QR code.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- **ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.**
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
