0600-2000 Operational Period

Incident Objectives	1. Incident Name	2. Date Prepared	3. Time Prepared
	South Columbia Basin & Upper Cemetery	7/27/2024	2000
4. Operational Period (Date and Time)			
7/28/2024		0600-2000	
5. General Control Objectives for the Incident (include Alternatives)			
<ul style="list-style-type: none"> • Provide for firefighter and public safety at all times. This includes the application of the "10 and 18", LCES, and the Risk Management Process. • Ensure structures and infrastructure are properly identified and mopped up around. • Minimize acres burned. • Act professionally and in a manner that fosters good relationships with the public, private landowners, timber industry representatives, elected officials and other stakeholders. • Follow agency policies at all times and respect the policies of the host agency. • Maximize opportunities for cost savings without jeopardizing public or firefighter safety. • Provide timely communications and accurate information as it becomes available. 			
6. Weather Forecast for Operational Period			
See attached weather forecast			
7. General Safety Message			
<ul style="list-style-type: none"> • Provide for firefighter and public safety at all times. • Monitor compliance of 10 and 18 by all incident personnel. • Adhere to 2:1 work/rest ratio for all fire line personnel. • Aviation safety is high priority. Assess the risk against the benefit of the mission. • Ensure all assigned personnel understand emergency medical reporting & transport procedures including locations of nearest emergency responders & facilities.

WEATHER	1. Incident Name South Columbia Basin	2. Date Prepared 7/27/2024	3. Time Prepared 2000
----------------	--	-------------------------------	--------------------------

Forecast is based on forecast start time of 1800 PDT on July 27.
If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

Warm and dry conditions will continue through the weekend. Min RH will begin to increase Sunday through the beginning of next week with the arrival of a wetter weather system. This will bring chance for showers and thunderstorms Monday evening into Tuesday.

.SUNDAY...

Sky/weather.....Sunny. Haze through the day.
CWR.....0 percent.
LAL.....1.
Max temperature.....Around 87.
Min humidity.....22 percent.
Wind (20 ft).....South winds 6 to 10 mph.
Mixing height.....8500 ft AGL.
Transport winds.....Southwest around 12 mph.
Haines Index.....3 Very Low.

.SUNDAY NIGHT...

Sky/weather.....Mostly clear. Haze.
CWR.....0 percent.
LAL.....1.
Min temperature.....Around 61.
Max humidity.....67 percent.
Wind (20 ft).....South winds 4 to 9 mph.
Mixing height.....1000 ft AGL.
Transport winds.....Southwest around 10 mph.
Haines Index.....3 Very Low.

Fuels and Fire Behavior Advisory **Eastern Oregon & Washington below 7,000'** **July 24, 2024**

Subject: The recent high pressure over the Pacific Northwest has rapidly dried both live and dead fuels across the Geographic Area. Fuels in eastern Oregon have above average fine fuel loading with excellent fuel continuity. **The very dry fuels coupled with the abundant fuel loading has supported rapid fire growth and aggressive fire behavior especially when aligned with wind and slope.**

Discussion: Local observations include:

- **ERCs for most areas east of the Cascades continue to be above the 97th percentile and in many cases near maximum values.**
- All fuels are available below 7000' except far northeast Washington.
- Lightning efficiency has been very high during recent lightning events.

Difference from normal conditions: Multiple years of above average grass production in rangelands has resulted in above normal fuel loading and continuity. Seasonal drying of fuels is ahead of schedule and reaching record values for the time of year. **Recent fire behavior has been greater than anticipated.** Fires have exhibited extreme resistance to control. Large fire growth has occurred with minimal alignment with slope and wind, and across all fuel types.

Concerns to Firefighters and the Public:

- **Unstable conditions with winds over 10 mph have resulted in extreme fire behavior.**
- Sagebrush fires will exhibit extreme rates of spread and moderate to long range spotting.
- Direct attack has been unsuccessful in the middle of the burn period. Night operations have been very successful.
- Do not expect retardant to be effective without immediate backup from ground personnel. The above average grass crop is reducing retardant effectiveness.
- Outflow gusts from thunderstorms has drastically increased rates of spread and changes in direction.
- **Do not underestimate fire spread potential, even in the absence of alignment with wind or slope.**

Mitigation Measures:

- **Validate safety zones and escape routes frequently.**
- Obtain a new spot weather forecast when conditions become unrepresentative.
- Burning Index is an excellent predictor of daily fluctuations influencing fire danger and growth potential.

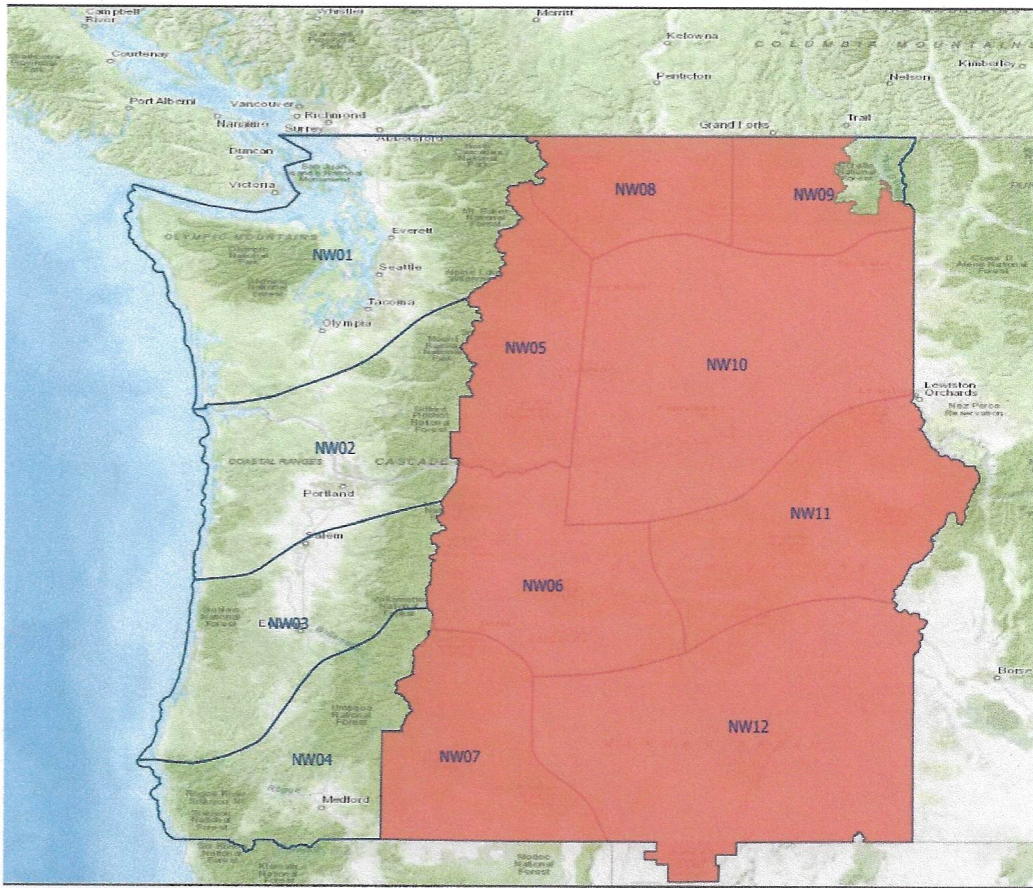

Area of Concern: Eastern Oregon and Washington, except for far northeast below 7,000'.

Issued By: Northwest Coordination Center Predictive Services

Did you notice a fuels treatment???

Deploy the Wildfire Interaction with Treatments and Suppression (WITS) Survey

- 1- Download the Survey123 App onto your mobile device
- 2 – Login with your AGOL account (does not have to be NIFC) – you do not need to login
- 3- Use the QR code to download the WITs Survey
- 4- Allow Survey123 to send notifications, your locations, photos, and videos if necessary
- 5- Answer all the questions in the survey. This should take less than 15 mins.
- 6- Please upload pictures if you have them or can take them.
- 7- Submit the survey.

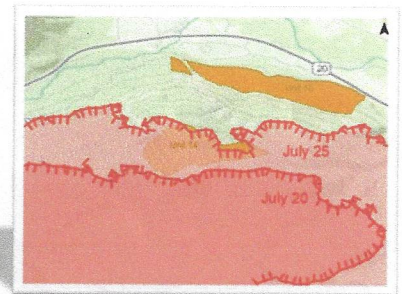

When to Deploy?

Any time a fire interacts with a treatment.

Deploy again if the fire interacts with the treatment at multiple locations,

Multiple submissions for the same interaction is great! We want everyone's perspective.

Important Notes:

- You **do not** need service to complete the survey, but you **do** need service to download the survey for the **first time**.
- If a survey is filled out when you are out of service, you may need to save the survey in your outbox and send it once you are back in service.
- Once a survey has been sent, you can access it on your device and edit and resend the survey or delete it.
- All questions with the red asterisk (*) are required to answer before you can advance to the next page or submit the survey.

Any Issues, questions, or if you need help trouble shooting?

Jessica Walston – jessica.walston@dnr.wa.gov or 509-690-0114

CHECK IN Form for South Columbia Basin or Upper Cemetery Rd Fire

Safety Message

Incident: Upper Cemetery/South Columbia Basin	Date: July 28, 2024	Time: Day Shift
---	-------------------------------	---------------------------

Major Hazard and Risk:

Wildland Urban Interface
Light Flashy Fuels
Active Rail Road Lines

Implement LCES prior to operational engagement.

Wildland Urban Interface (*Review IRPG Green pages 11-15*)

- Agricultural Area, Unknown Hazardous Materials throughout, use extra caution near burnt structures.
- **Do not overhaul burnt structures without appropriate structural PPE/Respiratory protection.**

Light Flashy Fuels: anticipate extreme fire behavior!

Active Rail Road Lines: The average freight train can take a mile or more to stop.

- It's closer and faster than you think. Stay well clear of the RR tracks!!!

Heavy Equipment: Use caution when heavy equipment is in use.

Air Operations: Stay alert, keep well clear of drop area.

Transportation: Drive defensively, headlights on, keep windshields clean, watch for local traffic always use backers.

Power lines throughout the area: Treat all lines as if they are live.

Fire Weakened Trees & Snags: Identify, Flag, Use only qualified fallers.

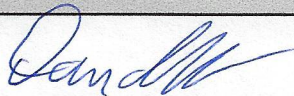

Elevated Public Interest: Due to proximity to Spokane.

Steep Terrain/Exposed Cliffs: Watch your footing, do not work above or below other or heavy equipment.

Transient Frequented Area: Be aware of biohazardous waste/needles/Haz-Mat/other?

STAY ALERT / STAY ALIVE!!!

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.
 Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
