28. Observed Fire Behav terminology. For non-fire Minimal Smoldering								

Incident: Sugar Loaf

Narrative:

The fire perimeter is on the west side of the Wyatt Creek drainage on a south-facing slope. Primary surface spread during initial attack was a backing fire, with occasional spot fires caused by rollout. The fire was burning under a dense forest canopy, with limited intensity. Lack of torching and minimal wind influence limited spotting. Current fire behavior is minimal due to suppression action.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Litter and Understory)

Narrative:

Fire is under dense canopy of conifer trees with brush understory. Rate of spread was less than 5 chains per hour during initial attack. Backing downhill and spotting through rollout was the primary method of surface spread. Current and expected fire behavior is minimal.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

There are no structures threatened.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	0	0	0
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	0	0	0
I. Other Minor Structures	0	0	0

31. Public Status Summary:

C. Indicate the Number of Civilians (Public) Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to- date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0

- 32. Responder Status Summary:
- C. Indicate the Number of Responders Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to- date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Responders Affected:	0		0

33. Life, Safety, and Health Status/Threat Remarks:

Snags, steep slopes, rolling debris and long travel times to medical

34. Life, Safety, and Health Threat Management:

Incident: Sugar Loaf

assistance are issues. Long travel times to medical assistance has been mitigated with adequate medical personnel staffing. There are currently no outstanding critical medical resource needs.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

Warm and dry conditions once again across the area with temperatures in the low to mid 80s and relative humidity values dropping below 30% before growing cloud cover shaded out the area. Thunderstorms were observed along the Cascade crest to the east of the incident, and more widespread thunderstorm activity is expected for tomorrow. Temperatures will begin to cool more significantly on Saturday ahead of a push of marine air and increasing chances for wetting rain on Monday and Tuesday.

	Active?
A. No Likely Threat	х
B. Potential Future Threat	
C. Mass Notifications in Progress	
D. Mass Notifications Completed	
E. No Evacuation(s) Imminent	
F. Planning for Evacuation

Q. Area Closure	

- 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:
- 12 hours: No fire growth is expected due to suppression efforts.
- 24 hours: No fire growth is expected due to suppression efforts.
- 48 hours: No fire growth is expected due to suppression efforts.
- 72 hours: No fire growth is expected due to suppression efforts.

Anticipated after 72 hours: No fire growth is expected due to suppression efforts.

37. Strategic Objectives (define planned end-state for incident):

24 hours:

Continue to secure and hold the direct fire edge.

Identify and mitigate gravity hazards to work areas and threats to control lines.

48 hours:

Continue to secure and hold the direct fire edge.

Identify and mitigate gravity hazards to work areas and threats to control lines.

Scout secondary containment lines, preparing for implementation if needed.

72 hours:

Continue to secure and hold the direct fire edge.

Identify and mitigate gravity hazards to work areas and threats to control lines.

Scout secondary containment lines, preparing for implementation if needed.

Incident: Sugar Loaf

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values.

24 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values.

48 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values.

72 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values.

Anticipated after 72 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values.

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: None.

None. 24 hours:

None. 48 hours:

None. 72 hours:

Anticipated after 72 hours: None.

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

There is potential for smoke to impact local communities.

41. Planned Actions for Next Operational Period:

Continue to secure and hold the direct fire edge.

Identify and mitigate gravity hazards to work areas and threats to control lines.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): **60 Acres**
- 43. Anticipated Incident Containment or Completion Date: 09/20/2025
- 44. Projected Significant Resource Demobilization Start Date: 08/08/2025
- 45. Estimated Incident Costs to Date: \$2,269,082.00
- 46. Projected Final Incident Cost Estimate: \$4,000,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):

The Emigrant Fire is continuing to support the Sugar Loaf Fire resources with camp support and

Incident: Sugar Loaf

reporting.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
