12. Prepared By: Print Name: Laurie Bergvall Date/Time Prepared: 09/08/2025 1145 PDT		13. Approved By: Print Name: Jeremey Bryant Signature: <i>Jeremey Bryant</i>												
14. Date/Time Submitted: 09/08/2025 1154 PDT		15. Primary Location, Organization, or Agency Sent To: orric@firenet.gov												
16. State: OR	17. County / Parish / Borough: Lane		18. City: Oakridge											
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): OR-UPF												
22. Latitude/Longitude: Latitude: 43° 39' 20" Longitude: 122° 37' 22"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:		24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:											
25. Short Location or Area Description (list all affected areas or a reference point): 14 Miles SW of Oakridge, OR			26. UTM Coordinates: Zone: Easting: Northing:											
27. Note any geospatial data available (indicate data format, content, and collection time information and labels):														
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal														

Incident Status Summary (ICS-209)

Incident: **Sugar Loaf**

Narrative:

The fire perimeter is on the west side of the Wyatt Creek drainage on a south-facing slope. Primary surface spread during initial attack was a backing fire, with occasional spot fires caused by rollout. The fire was burning under a dense forest canopy, with limited intensity. Lack of torching and minimal wind influence limited spotting. Current fire behavior is minimal due to suppression action and weather.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Litter and Understory)

Narrative:

Fire is under dense canopy of conifer trees with brush understory. Rate of spread was less than 5 chains per hour during initial attack. Backing downhill and spotting through rollout was the primary method of surface spread. Current and expected fire behavior is minimal.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

There are no structures threatened.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	0	0	0
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	0	0	0
I. Other Minor Structures	0	0	0

31. Public Status Summary:

C. Indicate the Number of Civilians (Public) Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Civilians (Public) Affected:	0		0

32. Responder Status Summary:

C. Indicate the Number of Responders Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Responders Affected:	0		0

33. Life, Safety, and Health Status/Threat Remarks:

Snags, steep slopes, rolling debris and long travel times to medical

34. Life, Safety, and Health Threat Management:

Incident Status Summary (ICS-209)

Incident: **Sugar Loaf**

<p>assistance are issues. Long travel times to medical assistance has been mitigated with adequate medical personnel staffing. There are currently no outstanding critical medical resource needs.</p> <hr/> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Widespread convection with wetting rain moved into the area through the afternoon and is expected to continue Tuesday. Temperatures remained below 70F and relative humidity values stayed above 50% for the duration of the day, with similar conditions expected tomorrow. Precipitation potential begins to taper off on Wednesday before drier and warmer conditions return for the last two days of the week. Critical conditions are not expected with the brief warming and drying, but sunnier skies and seasonable temperatures/relative humidity minimums are expected.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>A. <p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p>
<p>12 hours: No fire growth is expected due to suppression efforts and rain.</p>
<p>24 hours: No fire growth is expected due to suppression efforts and rainy conditions.</p>
<p>48 hours: No fire growth is expected due to suppression efforts.</p>
<p>72 hours: No fire growth is expected due to suppression efforts and rainy conditions.</p>
<p>Anticipated after 72 hours: No fire growth is expected due to minimal fire.</p>

<p>37. Strategic Objectives (define planned end-state for incident):</p>
<p>12 hours: Monitoring and patrolling the bottom of the fire. Cleaning up excess hose and hardware. All heavy equipment and FMODs are engaged with the fuel break.</p>
<p>24 hours: Monitoring and patrolling the bottom of the fire. Cleaning up excess hose and hardware. All heavy equipment and FMODs are engaged with the fuel break.</p>
<p>48 hours: Monitoring and patrolling the bottom of the fire. Cleaning up excess hose and hardware. All heavy equipment and FMODs are engaged with the fuel break.</p>
<p>72 hours: Monitoring and patrolling the bottom of the fire. Cleaning up excess hose and hardware. All heavy equipment and FMODs are engaged with the fuel break.</p>

Incident Status Summary (ICS-209)

Incident: **Sugar Loaf**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts: 12 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values. 24 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values. 48 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values. 72 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values. Anticipated after 72 hours: Private timberlands, Federal Forest infrastructure, watersheds and natural resource values.
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order: 12 hours: None. 24 hours: None. 48 hours: None. 72 hours: None. Anticipated after 72 hours: None.
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. There is potential for smoke to impact local communities.
41. Planned Actions for Next Operational Period: Monitoring and patrolling the bottom of the fire. Cleaning up excess hose and hardware. All heavy equipment and FMODs are engaged with the fuel break.
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): 60 Acres
43. Anticipated Incident Containment or Completion Date: 09/20/2025
44. Projected Significant Resource Demobilization Start Date: 08/08/2025

Incident Status Summary (ICS-209)

Incident: **Sugar Loaf**

45. Estimated Incident Costs to Date: \$3,134,467.00														
46. Projected Final Incident Cost Estimate: \$4,000,000.00														
47. Remarks (or continuation of any blocks above – list block number in notation): The Emigrant Fire is continuing to support the Sugar Loaf Fire resources with camp support and reporting.														
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
