

# Suppression Response Plan Bear Butte 2 Fire

MAP 7, 8 - Milk Contingency, NW Bald Peter to Camp Ck Butte - Should fire spread beyond MAP 4, 5, 6 construct dozer lines utilizing natural barriers and creeks to burn out and hold.

MAP 4, 5, 6 - Top of Cliff, South of Biddle Pass, 2003 Bear Butte Fire - Keep fire contained in current perimeter. Limit further fire spread on the carbon sequestration project or valued timber lands.

MAP 1- Mt Jefferson Wilderness - Fire is actively spreading near the Mt Jefferson Wilderness Boundary. Take action to stop fire spread toward the ORWSA.

MAP 2 - J100 Road - Stop all eastern fire spread. Only to be utilized if attempts at stopping fire spread on the J170 road fails.

MAP 3 - J170 Road East Cliffs - Utilize road system and trails to burn off to stop eastern fire spread.

MAP 9 - Jefferson Ck Lava Flow - Fire has progressed south and is established mid-way through the lava flow, showing potential for spread. Begin evaluation of fire potential.

MAP 10 - Fire spreads east toward the Jefferson Creek Trail and shows potential to spot across the lava flow to Map 3.

MAP 12 - Cascade Crest - Fire is actively spreading within 1 mile (east) of the Cascade Crest. Evaluate fire spread potential, notify the Willamette NF, and determine if actions are feasible or needed.

MAP 11 - Cabot Lava Flow - Fire actively spreading south toward MAP and threatens to continue spread toward the contingency line or Brush Creek Trail. Evaluate Brush Creek trail for holding opportunities, order resources to prep trail if needed, and to fire/hold contingency line and trail.

MAP 13 - Contingency Line - Fire is readily spreading through the Cabot Lava Flow progressing toward the contingency line. Stop fire spread at the contingency line.

MAP 14 - Brush Creek Trail - Brush Creek Trail from contingency line to Cascade crest. Fire is actively spreading south of MAP 11 and likely to reach the trail. Stop fire spread to the south at the Brush Creek Trail.
