Comments / notes on tonight's mission and this interpretation: The fire is comprised mostly of intense heat, with two concentration of isolated heat on the West and South West sides of the fire. The fire is currently South of Milo, North of Castle Rock, West of Callahan Ridge, and East of Stouts Creek. The fire is very active on all side with spotting on both the South and East sides of the fire. There are five areas of intense heat outside the heat perimeter on the South and Eastern sides of the fire.
