Comments /notes on tonight's mission and this interpretation: Growth in heat perimeter since the last flight is primarily to the southeast. Intense heat on east, south, and west perimeter. Fourteen isolated heat sources or hot spots were identified outside the southern and eastern heat perimeter. Fire is located south of Milo and the South Umpqua River, has crossed Stouts Creek to the west, crossed Callahan Creek and is now north of Granite and Drew Creeks, and has entered the headwaters of Hatchet Creek to the east.
