Comments / notes on tonight's mission and this interpretation: The heat perimeter grew in both the Southeast and Northeast portions of the fire. The Southeastern side of the fire is the most active and continues to spot ahead of itself. There is currently one spotfire outside the heat perimeter in this area. There some scattered heat on the Northwest and Southwest portions of the fire. The fire is located south of Milo and the South Umpqua River, east of Coon Creek, north of Tom Creek, west of Callahan Meadows and the community of Drew.
