Comments / notes on tonight's mission and this interpretation: <p>The heat perimeter grew in both the Southeast and Northeast portions of the fire. The Southeastern side of the fire is the most active and continues to spot ahead of itself. There is currently 7 spotfires outside the heat perimeter in this area, with the farthest about 1,300-feet from the main heat perimeter, and all 1-acre and below in size. There is one spotfire located 400-feet outside the heat perimeter on the East/Southeast portion of the fire, about 2-acres in size. The North and South sides of the fire have the largest concentrations of intense heat. There is scattered heat throughout the entire heat perimeter. There is one heat return 3.5 miles to the Southwest of the fire, located on the North side of road 3242 (42.792722 -123.030931).</p> <p>The fire is located south of Milo and the South Umpqua River, east of Coon Creek, north of Tom Creek, west of Callahan Meadows and the community of Drew.</p>
