Incident Name: Stouts Creek (OR-732S-000090)	IR Interpreter(s): Jacob Rosenberg IRIN	Local Dispatch Phone: Douglas Forest Protective Association Dispatch Center (541-672-6507)	Interpreted Size: 23,767 Acres Growth last period: 252 Acres
Flight Time: 2044 PDT Flight Date: 8-12-2015	Interpreter(s) location: Oregon Interpreter(s) Phone: 541-294-9222	Regional Coordinator: Jim Grace Regional Coord. Phone: 541-416-6593	National Coordinator: Tom Mellin National Coord. Phone: 505-842-3845
Ordered By: Jacob Rosenberg	Order Number: A-75	Aircraft/Scanner System: N144Z/Phoenix	Pilots/Techs: Johnson/Lowery/Kuenzi
IRIN Comments on imagery: 2 Flight Lines, Good imagery on all parts of the fire.		Weather at time of flight: Clear	Flight Objective: Perimeter identification and hotspot location
Date and Time Imagery Received by Interpreter: 8-12-2015 @ 2054 (PDT)		Type of media for final product: PDF Maps, Shapefiles, and KMZ	
Date and Time Imagery Delivered to Incident: 8-12-2015 @ 2215 (PDT)		Electronic file sent to: http://ftp.nifc.gov/incident_specific_data/pacific_nw/2015_Incidents_Oregon/2015_StoutsCreek/IR/20150813/	
Comments /notes on tonight's mission and this interpretation: The heat perimeter grew predominately in the south. There were three new isolated heat source outside the heat perimeter on the southern portion of the fire, with the largest two being 17.6 and 10 acres each. The Southern side of the fire still has the largest concentrations of intense heat. There has been a reduction in the amount of intense heat since the last flight. There are numerous isolated heat sources throughout the heat perimeter. The fire is located south of Milo and the South Umpqua River, east of Coon Creek, north of Diamond Rock, west of Callahan Meadows and 0.8 miles west of both Tiller and Drew. The fire is still about 2.8 miles from the Douglas/Jackson county line to the south.
