| <b>Comments / notes on tonight's mission and this interpretation:</b><br><br>There are not isolated heat sources outside the previous heat perimeter. Most the isolated heat sources are located in the North East portion of the fire. There are 2 isolated heat sources on the southern end of the fire. The fire is staying East of the John Day River, North of Windy Point and South of Johnny Creek. On the West side, the fire is holding on Sunflower Flat. |   |  |   |
