

Incident Status Summary (ICS-209)

Incident: **BALDY**

1. Incident Name: BALDY		2. Incident Number: WA-COF-001003	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Brian Gales, ICT2	5. Incident Management Organization: Type 2 Team	6. Incident Start Date/Time: Date: 08/01/2015 Time: 1719 CT
7. Current Incident Size or Area Involved (use unit label – e.g., “Acres”, “Square Miles”): 515 Acres	8a. Percent (%) Contained or Completed: 53 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Unknown D. Fire Suppression Strategy:	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex Organization Assessment continues to recommend Type 2 team.
	b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %		
12. Prepared By: Print Name: Michelle Ellis, SITL(t) Date/Time Prepared: 08/13/2015 2100 CT		13. Approved By: Print Name: Pat Halford, ICT2(t) Signature: _____	
14. Date/Time Submitted: 08/13/2015 2204 CT		15. Primary Location, Organization, or Agency Sent To: OR-NWC	
16. State: WA	17. County / Parish / Borough: Pend Oreille	18. City:	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction):	
22. Latitude/Longitude: Latitude: 48° 49' 7" Longitude: 117° 30' 27"	23. US National Grid Reference: Grid Zone: 11UMQ x-Coordinate: 62116 y-Coordinate: 7914	24. Legal Description: Principal Meridian: Willamette Township: 38N Range: 42E Section: 4 1/4 Sec: NW of 1/4 Sec: SW	
25. Short Location or Area Description (list all affected areas or a reference point): 6 MILES NW OF THE TOWN OF IONE, WASHINGTON		26. UTM Coordinates: Zone: 11 Easting: 462116 Northing: 5407914	
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): GIS data and maps located on the NIFC FTP site http://ftp.nifc.gov/incident_specific_data/pacific_nw/2015_Incidents_Washington/Baldy_WA_COF_001003/GIS/			
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal			

Incident Status Summary (ICS-209)

Incident: **BALDY**

Backing
Single Tree Torching
Creeping

Narrative:
Suppression activities have been successful in minimizing fire behavior. Potential still exists for fire to move if interior consumption produces spots.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Light Logging Slash
Timber (Litter and Understory)
Timber (Grass and Understory)

Narrative:
FM11 mimics heavy dead and down component with closed canopy. FMs TU5 and GS2 from LANDFIRE are being used for modeling.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): There are structures and a residence on the isolated private property to the north and in the community of Cedar Creek. To the south, southeast and southwest are critical Seattle City Light, Bonneville Power Authority (BPA) and PUD transmission lines and fiber optic lines.	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

33. Life, Safety, and Health Status/Threat Remarks: Currently fire is still on USFS, however, there is a minor threat that the fire may	34. Life, Safety, and Health Threat Management:
---	---

Incident Status Summary (ICS-209)

Incident: **BALDY**

<p>back toward private inholdings with some structures. ICT2 is working with local authorities for pre-planned evacuation procedures and contingency actions. For public safety, an area closure on USFS lands that includes roads and trails is in effect. Significant firefighter hazards include extensive snags, bug, drought and fire-weakened trees, steep terrain, limited safety zones, rolling debris and reburn potential. Deliberate Risk Analysis completed, updated and approved.</p>																																					
<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Hot, dry and unstable conditions prevailed once again as temperature over the fire surged into the lower to middle 90's with relative humidity values in the teens. Big weather changes are expected to develop on Friday as a strong cold front tracks toward the area. There will be a slight chance of thunderstorms ahead of the cold front both late tonight into Friday morning; however the best chances will arrive with the cold front in the afternoon. The strength of the front suggests the possibility of strong to severe thunderstorms, which could produce wind gusts to 50 mph and one inch hail. The front will exit the fire area late in the afternoon or evening followed by much cooler conditions as well as breezy southwest winds.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 90%;"></th> <th style="width: 10%;">Active?</th> </tr> </thead> <tbody> <tr><td>A. <p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p>12 hours: No fire movement expected.</p> <p>24 hours: High winds expected with the cold front will produce interior consumption. Confidence is high that the fire will remain within the existing footprint.</p> <p>48 hours: Cooler, moderating weather will keep fire activity minimal.</p> <p>72 hours: Cooler, moderating weather will keep fire activity minimal.</p> <p>Anticipated after 72 hours:</p>

<p>37. Strategic Objectives (define planned end-state for incident): Where safely possible, direct and indirect suppression tactics are being employed to minimize fire duration and long-term firefighter exposure. Options that balance safety with a high probability of success are being utilized, reducing the risk of fire spread to private lands and residences. Containment and control efforts will protect from loss the Cedar Creek community watershed, PUD and BPA transmission lines, and other FERC infrastructure.</p>
--

<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p> <p>12 hours: Threat of escaped fire due to open fireline, inaccessible terrain and lack of safety zones. Fire is burning in heavy down fuels.</p> <p>24 hours:</p>

Incident Status Summary (ICS-209)

Incident: **BALDY**

<p>Threat of escaped fire due to open fireline, inaccessible terrain and lack of safety zones. Fire is burning in heavy down fuels. High temperatures and winds may increase fire behavior and affect current control efforts.</p> <p>48 hours: Threat of escaped fire due to open fireline and lack of safety zones.</p> <p>72 hours: Threat of escaped fire due to open fire line and lack of safety zones.</p> <p>Anticipated after 72 hours: Continued threat to control line until direct construction is completed on Divisions A and Q. Burnout operations are complete.</p>																			
<p>39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:</p> <p>12 hours: None</p> <p>24 hours: Wildland Fire Modules, Type 1 and Type 2IA Crews</p> <p>48 hours: Wildland Fire Modules, Type 1 and Type 2IA Crews</p> <p>72 hours: Wildland Fire Modules, Type 1 and Type 2IA Crews</p> <p>Anticipated after 72 hours: Wildland Fire Modules, Type 1 and Type 2IA Crews</p>																			
<p>40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:</p> <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p>Consistent support from the Type 1, Type 2 IA crews and aviation resources has enhanced our ability to construct direct lines and mop-up on steep ground with unstable trees and rolling material.</p>																			
<p>41. Planned Actions for Next Operational Period:</p> <p>Continue to hold and mop-up in all divisions.</p>																			
<p>42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”): 600</p>																			
<p>43. Anticipated Incident Containment or Completion Date: 09/30/2015</p>																			
<p>44. Projected Significant Resource Demobilization Start Date: 08/15/2015</p>																			
<p>45. Estimated Incident Costs to Date: \$5,000,000.00</p>																			
<p>46. Projected Final Incident Cost Estimate: \$8,000,000.00</p>																			
<p>47. Remarks (or continuation of any blocks above – list block number in notation):</p> <p>Size reduction due to more accurate mapping.</p>																			
<p>49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):</p>
