12. Prepared By: Print Name: Terry Chaplin, SITL Date/Time Prepared: 08/25/2015 1600 PDT		13. Approved By: Print Name: Jay T. Esperance, ICT2 Signature: 									
14. Date/Time Submitted: 08/25/2015 1619 PDT		15. Primary Location, Organization, or Agency Sent To: WA-NES									
16. State: WA	17. County / Parish / Borough: Stevens		18. City: Fruitland								
19. Unit or Other:	20. Incident Jurisdiction: WA-NES	21. Incident Location Ownership (if different than jurisdiction): WA-NES									
22. Latitude/Longitude: Latitude: 48° 0' 17" Longitude: 118° 12' 13"	23. US National Grid Reference: Grid Zone: 11UMP x-Coordinate: 10224 y-Coordinate: 17525	24. Legal Description: Principal Meridian: Willamette Township: 29N Range: 37E Section: 19 1/4 Sec: of 1/4 Sec: NE									
25. Short Location or Area Description (list all affected areas or a reference point): North and East of Carpenter Road and Mudget Lake Road			26. UTM Coordinates: Zone: 11 Easting: 410224 Northing: 5317525								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): NIFC ftp site											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Active Narrative:											

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

Active fire spread with torching and spotting, high spread potential.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Litter and Understory)
Timber (Grass and Understory)

Narrative:

Old growth timber with mixed understory regen, timber intermixed with grass, intermixed timber with dead and down, moderate to heavy brush.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	600	0	17
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	5	0	10
	I. Other Minor Structures	160	0	14

31. Public Status Summary: <i>C. Indicate the Number of Civilians (Public) Below:</i>				32. Responder Status Summary: <i>C. Indicate the Number of Responders Below:</i>

33. Life, Safety, and Health Status/Threat Remarks: Level II Evacuations are in effect in the whole of the Spokane Agency. Level III Evacuations are lifted for all but the Allen Road Subdivision.	34. Life, Safety, and Health Threat Management:	
		Active?
	A. No Likely Threat	
35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Red Flag Warning will continue through 2100 tonight for warm, dry and unstable conditions. Highs near 85, minimum RH near 15% and southwest wind from 5-10	B. Potential Future Threat	X
	C. Mass Notifications in Progress	

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

mph. Similar conditions are expected tomorrow. However winds will be lighter out of the WSW.		Active?
	D. Mass Notifications Completed	
	E. No Evacuation(s) Imminent	
	F. Planning for Evacuation	X
	G. Planning for Shelter-in-Place	
	H. Evacuation(s) in Progress	X
	I. Shelter-in-Place in Progress	
	J. Repopulation in Progress	
	K. Mass Immunization in Progress	
	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	X
	O. Road Closure	X
P. Trail Closure		
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

The fire has reached primary control lines and are presently holding, however with the Red Flag Warning we anticipate spotting and sloop overs to continue in the SE and NW corners. The inability to stop the growth of the spot in the NW was due to lack of resources has resulted in its growth to 500+ acres and resources have backed to alternate control lines. PSD aerial ignition may no longer be effective due to the fire edge being too close to the north fire line.

12 hours:

Spotting in the NW corner of the fire continues to challenge resources due to critical resource needs not being met. With 2 Type 1 and 3 type 2IA or Type 2 Crews to facilitate burnout operations along the north edge of the fire, the operation could be accomplished in 3-4 operational periods beginning after the Red Flag Warnings have been lifted. Continue to construct secondary containment lines if we are unable to hold fire at the current north control line.

24 hours:

Probability of success of holding control lines will decrease as demonstrated by the inability to address some spotting and sloop over.

48 hours:

72 hours: Conditions are so variable that we are unable to predict with any confidence fire behavior and growth.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. Spotting along northern perimeter across dozer lines decreases the probability of success along the Springdale Hunters Road necessitating moving control lines further north thereby increasing probability the fire will enter the EPA Hazmat site

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Present conditions and fire behavior pose a serious threat to northern control lines. Current resources are unable to respond to spots and sloop overs and continue their work on alternate containment lines. The fire threatens 550+ structures.

12 hours:

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

24 hours: Our alternate control line has now become our primary line necessitating a contingency lines further away from the fire's edge. This will put more values at risk and creates more potential for accidents by having to travel farther out.

48 hours: Limited resources being assigned to the fire combined with growth in control lines will result in greater travel times, increased response times and increased danger to firefighters.

72 hours: With already insufficient resources, many resources will be timing out, further reducing the effectiveness of engaged forces.

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: 3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 3 DIVS, 1 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders.

24 hours: 3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 3 DIVS, 1 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders.

48 hours: 4 Type I Crews, 6 Type 2IA Crews, 8 Type 2 Crews, 7 TFLDs, 34 Type 6 Engines, 6 safety officers, 4 DIVS, 2 water tenders, 7 HEQB, 3 Type III helicopters, 3 Type I helicopters, 5 logistical tenders.

72 hours: 5 Type I Crews, 7 Type 2IA Crews, 10 Type 2 Crews, 9 TFLDs, 41 Type 6 Engines, 7 safety officers, 5 DIVS, 3 water tenders, 9 HEQB, 3 Type III helicopters, 4 Type I helicopters, 6 logistical tenders.

Anticipated after 72 hours: Additional resources timing out.

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

The probability of success would substantially increase if the fire received the 2 Type 1 crews and 3 Type 2IA or Type 2 crews with supporting engines and tenders for the 3-4 operational periods after the Red Flag Warning is lifted.

41. Planned Actions for Next Operational Period:

Due to the lack of critical need resources, progress on planned actions is secondary to reactionary responses to spotting and stop overs. Planned actions are to perform structure protection in all divisions including the Spokane Agency Lands, hold fire inside primary lines, contain spots and stop overs and take appropriate safety measures regarding hazmat near mine sites.

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: 09/08/2015

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: \$5,300,000.00

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):
Block 31 H: Estimated evacuations.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
