12. Prepared By: Print Name: <b>Terry Chaplin, SITL</b> Date/Time Prepared: <b>08/26/2015 1600 PDT</b>		13. Approved By: Print Name: <b>Jay T. Esperance, ICT2</b> Signature: 									
14. Date/Time Submitted: <b>08/26/2015 1638 PDT</b>		15. Primary Location, Organization, or Agency Sent To: <b>WA-SPA</b>									
16. State: <b>WA</b>	17. County / Parish / Borough: <b>Stevens</b>	18. City: <b>Fruitland</b>									
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): <b>WA-SPA</b>									
22. Latitude/Longitude: Latitude: <b>48° 0' 17"</b> Longitude: <b>118° 12' 13"</b>	23. US National Grid Reference: Grid Zone: <b>11UMP</b> x-Coordinate: <b>10224</b> y-Coordinate: <b>17525</b>	24. Legal Description: Principal Meridian: <b>Willamette</b> Township: <b>29N</b> Range: <b>37E</b> Section: <b>19</b> 1/4 Sec: of 1/4 Sec: <b>NE</b>									
25. Short Location or Area Description (list all affected areas or a reference point): <b>North and East of Carpenter Road and Mudget Lake Road</b>			26. UTM Coordinates: Zone: <b>11</b> Easting: <b>410224</b> Northing: <b>5317525</b>								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): <b>NIFC ftp site</b>											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):  <b>Active Uphill Runs</b>											

## Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

**Torching  
Spotting**  
Narrative:  
**Active spread with short uphill runs, torching, spotting. High spread potential to the north.**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):  
  
**Timber (Litter and Understory)  
Timber (Grass and Understory)**  
Narrative:  
**Old growth timber with mixed understory regen, timber intermixed with grass, intermixed timber with dead and down, moderate to heavy brush.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	600	0	17
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	5	0	10
	I. Other Minor Structures	160	0	14

31. Public Status Summary: <i>C. Indicate the Number of <u>Civilians</u> (Public) Below:</i>				32. Responder Status Summary: <i>C. Indicate the Number of <u>Responders</u> Below:</i>			
	Previous Report Total	A. # this Reporting Period	B. Total # to-date		Previous Report Total	A. # this Reporting Period	B. Total # to-date

	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	X
O. Road Closure	X	
P. Trail Closure		
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

Fire continues to challenge primary control lines on the north edge. Primary attention is on the north control line to check spread. Lack of resources has resulted in an increase of 6300+ acres. PSD aerial ignition may no longer be effective but is being held as a possible tactic.

12 hours: 2 Type 1 and 3 Type 2IA or Type 2 Crews are essential to facilitate burnout operations on the north and south edges. Without these resources the fire has a high probability of spread across the north perimeter. Construction of alternate lines continues as resources become available from other priority assignments.

24 hours: Probability of success of holding control lines will decrease as demonstrated by the inability to address some spotting and slop over.

48 hours: Conditions are so variable that we are unable to predict with any confidence fire behavior and growth.

72 hours: Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. Spotting along northern perimeter across dozer lines decreases the probability of success along the Springdale Hunters Road necessitating moving control lines further north thereby increasing probability the fire will enter the EPA Hazmat site

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Current resources are unable to respond to spots and slop overs or continue to work on their alternate containment lines because as they are being taken from work on primary lines. Present conditions and fire behavior pose a serious threat to northern control lines.

12 hours: The probability of the fire crossing control lines increases over time. Distance between divisions will result in

24 hours:

## Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

	longer travel and fewer work hours.
48 hours:	Over time fire perimeter growth will severely challenge control lines.
72 hours:	As resources begin to time out the level of risk to remaining firefighters increases and the probability of success of incident objectives decreases.
Anticipated after 72 hours:	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 3 DIVS, 1 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders.
24 hours:	3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 3 DIVS, 1 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders.
48 hours:	4 Type I Crews, 6 Type 2IA Crews, 8 Type 2 Crews, 7 TFLDs, 34 Type 6 Engines, 6 safety officers, 4 DIVS, 2 water tenders, 7 HEQB, 3 Type III helicopters, 3 Type I helicopters, 5 logistical tenders.
72 hours:	5 Type I Crews, 7 Type 2IA Crews, 10 Type 2 Crews, 9 TFLDs, 41 Type 6 Engines, 7 safety officers, 5 DIVS, 3 water tenders, 9 HEQB, 3 Type III helicopters, 4 Type I helicopters, 6 logistical tenders.
Anticipated after 72 hours: Additional resources timing out. Extensions are being offered to resources to create overlap beyond this team's demob date.	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Without the described resources in Block 36, 24 hours, sustained challenges to the northern control lines will decrease our probability of success in holding the fire. Shifting of resources to the northern edge negatively affects our ability to hold line on the SE edge where probability of escape increases. Incoming resources are assigned accordingly.	
41. Planned Actions for Next Operational Period: Reactive shifting of resources to short term needs hampers our ability to execute the overall plan. We will continue to perform structure protection, fire suppression and identification of Hazmat in all areas and will return to the pursuit of our planned outcome as internal resources become available.	
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):	
43. Anticipated Incident Containment or Completion Date: 09/08/2015	
44. Projected Significant Resource Demobilization Start Date:	
45. Estimated Incident Costs to Date: \$6,300,000.00	
46. Projected Final Incident Cost Estimate:	
47. Remarks (or continuation of any blocks above – list block number in notation): Block 31 H: Estimated evacuations. Block 32 E: one aortic defibrillation transported by bus to Spokane, one respiratory distress precipitated by smoke inhalation. The incident name and number has been changed from Carpenter Road, WA-NES-001235 to Carpenter Rd, WA-SPA-00046 to better reflect the true location of the origin.	
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
