

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

1. Incident Name: CARPENTER RD.		2. Incident Number: WA-SPA-000046	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Jay T. Esperance Rocky Mountain Blue Team	5. Incident Management Organization: Type 2 Team	6. Incident Start Date/Time: Date: 08/14/2015 Time: 1957 PDT
7. Current Incident Size or Area Involved (use unit label – e.g., "Acres", "Square Miles"): 46691 Acres	8a. Percent (%) Contained or Completed: 25 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Unknown D. Fire Suppression Strategy:	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single <input type="checkbox"/> Complex
	b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %		
12. Prepared By: Print Name: Terry Chaplin, SITL Date/Time Prepared: 08/27/2015 1600 PDT		13. Approved By: Print Name: Jay T. Esperance, ICT2 Signature: 	
14. Date/Time Submitted: 08/27/2015 1451 PDT	15. Primary Location, Organization, or Agency Sent To: WA-SPA		
16. State: WA	17. County / Parish / Borough: Stevens	18. City: Fruitland	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): WA-SPA	
22. Latitude/Longitude: Latitude: 48° 0' 17" Longitude: 118° 12' 13"	23. US National Grid Reference: Grid Zone: 11UMP x-Coordinate: 10224 y-Coordinate: 17525	24. Legal Description: Principal Meridian: Willamette Township: 29N Range: 37E Section: 19 1/4 Sec: of 1/4 Sec: NE	
25. Short Location or Area Description (list all affected areas or a reference point): North and East of Carpenter Road and Mudget Lake Road			26. UTM Coordinates: Zone: 11 Easting: 410224 Northing: 5317525
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): NIFC ftp site			
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Active Uphill Runs			

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

Torching Spotting Narrative: Active surface spread with short uphill runs, torching and spotting. Very high spread potential to the north.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc): Timber (Litter and Understory) Timber (Grass and Understory) Narrative: Old growth with mixed understory regen, timber intermixed with grass, intermixed timber with dead and down, moderate to heavy brush.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	600	0	17
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	5	0	10
	I. Other Minor Structures	160	0	14

31. Public Status Summary: <i>C. Indicate the Number of <u>Civilians</u> (Public) Below:</i>				32. Responder Status Summary: <i>C. Indicate the Number of <u>Responders</u> Below:</i>

	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	X
O. Road Closure	X	
P. Trail Closure		
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: Fire continues to challenge primary control lines on the north, the south central and SW edges of the fire. Lack of resources has resulted in an increase of 2720+ acres. PSD aerial ignition may no longer be effective but is being held as a possible tactic.

24 hours: An additional Type 1 and 3 Type 2IA or Type 2 Crews are essential to facilitate burnout operations on the north and south edges. Without these resources the fire has a high probability of spread across the north and the south perimeters. Construction of alternate lines continues as resources become available from other priority assignments.

48 hours: Probability of success of holding control lines continues to decrease as demonstrated by the inability to address some spotting and slop over. Increased forecasted winds will continue to decrease success even further.

72 hours: Conditions are so variable that we are unable to predict with any confidence fire behavior and growth.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. Spotting along northern perimeter across the Springdale Hunters Road decreases the probability of success along the north necessitating moving control lines further thereby increasing probability the fire will enter the EPA Hazmat site. Spotting across the south and SW dozer control lines will necessitate moving to alternate lines there as well.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: Fire crossing control lines continues to increase necessitating having to add another division which will stretch resources already stretched even further.

24 hours: Current resources are unable to respond to spots and slop overs or continue to work on their alternate

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

containment lines because as they are being taken from work on primary lines. Present conditions and fire behavior continue to threaten northern and southern control lines.

48 hours: Over time fire perimeter growth will severely challenge our ability to hold control lines and construct alternate lines.

72 hours: As resources begin to time out the level of risk to remaining firefighters increases and the probability of success of incident objectives decreases.

Anticipated after 72 hours: As equipment and personnel are time out, there is a concern with extensions due to continued fatigue.

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: 3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 3 DIVS, 1 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders.

24 hours: 3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 3 DIVS, 1 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders.

48 hours: 4 Type I Crews, 6 Type 2IA Crews, 8 Type 2 Crews, 7 TFLDs, 34 Type 6 Engines, 6 safety officers, 4 DIVS, 2 water tenders, 7 HEQB, 3 Type III helicopters, 3 Type I helicopters, 5 logistical tenders.

72 hours: 5 Type I Crews, 7 Type 2IA Crews, 10 Type 2 Crews, 9 TFLDs, 41 Type 6 Engines, 7 safety officers, 5 DIVS, 3 water tenders, 9 HEQB, 3 Type III helicopters, 4 Type I helicopters, 6 logistical tenders.

Anticipated after 72 hours: Additional resources timing out. Extensions are being offered to resources to create overlap beyond this team's demob date.

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Without the Type 1 Crew and the 3 Type 2IA or Type 2 crews, sustained challenges to the northern and southern control lines will decrease our probability of success in holding the fire. Shifting of resources to the northern edge negatively affects our ability to hold line. Incoming resources are assigned accordingly.

41. Planned Actions for Next Operational Period:

We will continue to perform structure protection, fire suppression and identification of Hazmat. Continue to pickup spots and slop overs, continue to hold established line and continue to scout and implement contingency lines.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):

43. Anticipated Incident Containment or Completion Date: 09/08/2015

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: \$6,900,000.00

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

Block 31 H: Estimated evacuations.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
