Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

Selder Road east to include Lessig Road to approximately 1 mile past the Cleveland Mine Road.																																					
35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Cooler conditions are expected to day with minimum RHs only falling to near 30%. Breezy SW winds will continue this afternoon. A Red Flag Warning and High Wind Watch are in effect for tomorrow. Temps will be in the 70's with RHs near 35%. SW winds will increase to 30-40 mph with gusts near 55 mph possible.	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>A. 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: Fire continues to challenge primary control lines on the north, the south central and SW edges of the fire. Fire crossed the Division D line and resulted in an increase of 9000+ acres due in part to the lack of ground and air resources. PSD aerial ignition may no longer be effective but is being held as a possible tactic.

24 hours: 3 additional Type 1 and 11 additional Type 2IA or Type 2 Crews and 5 DIVS are essential to facilitate burnout operations along control lines. Without these resources the fire has a high probability of repeating the large fire growth experienced yesterday due to the expected winds. Construction of alternate lines continues as resources become available from other priority assignments.

48 hours: Probability of success of holding control lines continues to decrease with the inability to staff spots and slop overs. Increased forecasted winds will continue to decrease success even further.

72 hours: Conditions are so variable that we are unable to predict with any confidence fire behavior and growth.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. South and east of a line beginning on the Cedonia Addy Road then east to the Klines Meadow Road, then SE along that road to the Red Marble Road then SW to the North Fork of Cedar Creek, then south to Deer Creek Road to Bellinger Road, then to the Gennett Road.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: Fire crossing control lines continues to necessitate additional divisions which will stretch resources even further.

24 hours: Current resources are unable to respond to spots and slop overs or continue to work on their alternate

Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

48 hours:	containment lines because as they are being taken from work on primary lines. Present conditions and fire behavior continue to threaten northern and southern control lines. Over time fire perimeter growth will severely challenge our ability to hold control lines and construct alternate lines.															
72 hours:	As resources begin to time out the level of risk to remaining firefighters increases and the probability of success of incident objectives decreases.															
Anticipated after 72 hours:	As equipment and personnel are timed out, there is a concern with extensions due to continued fatigue.															
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:																
12 hours:	3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 5 DIVS, 3 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders, 1 AOBD, 1 ASGS.															
24 hours:	3 Type I Crews, 5 Type 2IA Crews, 6 Type 2 Crews, 5 TFLDs, 28 Type 6 Engines, 5 safety officers, 6 DIVS, 3 water tenders, 6 HEQB, 2 Type III helicopters, 2 Type I helicopters, 4 logistical tenders, 1 AOBD, 1 ASGS.															
48 hours:	4 Type I Crews, 6 Type 2IA Crews, 8 Type 2 Crews, 7 TFLDs, 34 Type 6 Engines, 6 safety officers, 6 DIVS, 4 water tenders, 7 HEQB, 3 Type III helicopters, 3 Type I helicopters, 5 logistical tenders, 1 AOBD, 1 ASGS.															
72 hours:	5 Type I Crews, 7 Type 2IA Crews, 10 Type 2 Crews, 9 TFLDs, 41 Type 6 Engines, 7 safety officers, 7 DIVS, 5 water tenders, 9 HEQB, 3 Type III helicopters, 4 Type I helicopters, 6 logistical tenders, 1 AOBD, 1 ASGS.															
Anticipated after 72 hours:	Additional resources timing out. Extensions are being offered to resources to create overlap beyond this team's demob date.															
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:																
1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results.																
Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.																
Without the Type 1 Crews and the Type 2IA or Type 2 crews and other critically needed resources, sustained challenges to control lines will decrease our probability of success in holding the fire. Shifting of resources to the trouble spots negatively affects our ability to hold line. Incoming resources are assigned accordingly.																
41. Planned Actions for Next Operational Period:																
We will continue to perform structure protection, fire suppression and identification of Hazmat. Continue to pickup spots and slop overs, continue to hold established line and continue to scout and implement contingency lines.																
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):																
43. Anticipated Incident Containment or Completion Date: 09/11/2015																
44. Projected Significant Resource Demobilization Start Date:																
45. Estimated Incident Costs to Date: \$7,600,000.00																
46. Projected Final Incident Cost Estimate:																
47. Remarks (or continuation of any blocks above – list block number in notation):																
Block 8a: Reduction due to large fire growth.																
Block 31 H: Estimated evacuations.																
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):																
48.	CR1	CR2	CR2IA	CRC	ENG1	ENG2	ENG3	ENG4	ENG5	ENG6	DOZR	WTDT	WTDS	MAST	50.	51.
