33. Life, Safety, and Health Status/Threat Remarks:

All evacuations reduced to Level I.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

The arrival of a cold front Wednesday morning will result in a 3-5 degree decrease in temperatures. Dry air behind the front will counteract the cooling providing for a 5-10% decrease in relative humidity. Gusty southwest winds are forecast along and behind the front with gust potential of 25-30 mph on exposed high ridges. Showers are possible, but wetting rains are not anticipated. Unseasonably cool temperatures will remain through the work week with a slight chance of showers each day. Once again though, wetting rains are not anticipated. A wind shift to north is forecast either this weekend.

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **The current weather conditions caused slow fire expansion, allowing flanking construction of line. Weak cold front may cause additional concerns.**

24 hours: **Strengthen constructed line on the north half of the fire.**

48 hours: **Strengthen hand lines and dozer lines and secure fire's edge.**

72 hours: **Mop up and patrol fire perimeter and spots.**

Anticipated after 72 hours: **Same as 72 hours.**

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. South and east of a line beginning on the Cedonia Addy Road then east to the Klins Meadow Road, then SE along that road to the Red Marble Road then SW to the North Fork of Cedar Creek, then south to Deer Creek Road to Bellinger Road, then to the Gennett Road.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

24 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

48 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

Anticipated after 72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **3 DIVS, 10 TFLDs, 12 HEQB, 1 ASGS, 5 safety officers, 2 Type I Crews, 15 Type 6 Engines, 3 water tenders, 1 SEC1, 2 falling modules, 1 Type III helicopter, 1 Type I helicopter.**

24 hours: **5 DIVS, 5 TFLDs, 6 HEQB, 1 ASGS, 5 safety officers, 3 Type I Crews, 2 Type 2IA Crews, 2 Type 2 Crews, 28 Type 6 Engines, 3 water tenders, 1 Type III helicopter, 1 Type I helicopter.**

48 hours: **5 DIVS, 12 TFLDs, 16 HEQB, 1 ASGS, 6 safety officers, 4 Type I Crews, 4 Type 2IA Crews, 5 Type 2 Crews, 34 Type 6 Engines, 5 water tenders, 2 Type III helicopters, 2 Type I helicopters.**

72 hours: **5 DIVS, 12 TFLDs, 16 HEQB, 1 ASGS, 6 safety officers, 4 Type I Crews, 4 Type 2IA Crews, 5 Type 2 Crews, 34 Type 6 Engines, 5 water tenders, 2 Type III helicopters, 2 Type I helicopters.**

Anticipated after 72 hours: **Additional resources timing out. Extensions are being offered to resources to create overlap beyond this team's demob date.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Incident Status Summary (ICS-209)

Incident: **CARPENTER RD.**

Without the requested overhead, Type 1 Crews, Type 2 Crews and other critical resource needs, sustained challenges to controlling fireline will continue. Shifting resources to trouble spots causes a reactive response versus a well-thoughtout and planned attack.

41. Planned Actions for Next Operational Period:

We will continue to perform point structure protection, build line and pick up spots and slop overs. Identify and establish contingency line. Hazmat identification will continue.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):

43. Anticipated Incident Containment or Completion Date: **09/11/2015**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$11,800,000.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

Transition to Oregon Team 3, Doug Johnson, IC, will occur at 0600 tomorrow, 9/2/2015.
