35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Gusty southwest winds accompanied a cold front passage this morning. The winds are forecast to continue into the evening on Wednesday, but then weaken as high pressure builds across the fire. Post frontal cooling is anticipated through the end of the work week, but dry air will fill behind the passing front allowing for minimum relative humidity of 20-25% Thursday and Friday. Recovery will trend down each night as well. Cool air aloft will promote cumulus build up each day into Saturday. 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **The current weather conditions caused slow fire expansion, allowing direct line construction.**

24 hours: **Potential fire behavior slowly increasing over the next few days.**

48 hours: **Potential fire behavior slowly increasing over the next few days.**

72 hours: **Mop up and patrol fire perimeter and spots.**

Anticipated after 72 hours: **Same as 72 hours.**

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. South and east of a line beginning on the Cedonia Addy Road then east to the Klines Meadow Road, then SE along that road to the Red Marble Road then SW to the North Fork of Cedar Creek, then south to Deer Creek Road to Bellinger Road, then to the Gennett Road.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

24 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

48 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

Anticipated after 72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **12 TFLDs, 16 HEQB, 3 safety officers, 4 Type I Crews (for 4 shifts), 10 Type 6 Engines, 3 water tenders, and 2 falling modules.**

24 hours: **12 TFLDs, 16 HEQB, 3 safety officers, 4 Type I Crews (for 4 shifts), 10 Type 6 Engines, 3 water tenders, and 2 falling modules.**

48 hours: **12 TFLDs, 16 HEQB, 3 safety officers, 4 Type I Crews (for 3 shifts), 10 Type 6 Engines, 3 water tenders, and 2 falling modules.**

72 hours: **12 TFLDs, 16 HEQB, 3 safety officers, 4 Type I Crews (for 2 shifts), 10 Type 6 Engines, 3 water tenders, and 2 falling modules.**

Anticipated after 72 hours: **Same as 72 hours.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Incident Status Summary (ICS-209)

Incident: **CARPENTER RD.**

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Without the requested overhead, Type 1 Crews and other critical resource needs, sustained challenges to controlling and securing fireline will continue. Inadequate resources causes a reactive response versus a well-thought out and planned attack to urgent events.

41. Planned Actions for Next Operational Period:

We will continue to perform point structure protection, build line and pick up spots and slop overs. Identify and establish contingency line. Hazmat identification will continue.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):

43. Anticipated Incident Containment or Completion Date: **09/11/2015**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$12,621,757.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

Oregon Team 3, Doug Johnson, IC, assumed command of the incident at 0600 hrs today.
