35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):  <b>Wetting rains are likely across the fire on Saturday as an area of low pressure moves across eastern Washington. Gusty northerly winds of 25 mph will accompany the precipitation and continue into Sunday when temperatures warm back into the 70s. The continued warming and drying trend is forecast early next week as an upper level ridge amplifies over the Pacific Northwest.</b>		Active?

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Minimal burning conditions expected, wetting rain forecasted on Saturday. Fire behavior potential decreasing.**

24 hours: **Minimal burning conditions expected, wetting rain forecasted on Saturday. Fire behavior potential decreasing.**

48 hours: **Warmer and drier weather rapidly building over the fire area.**

72 hours: **Warmer and drier weather.**

Anticipated after 72 hours: **Same as 72 hours.**

37. Strategic Objectives (define planned end-state for incident):

**Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. South and east of a line beginning on the Cedonia Addy Road then east to the Klines Meadow Road, then SE along that road to the Red Marble Road then SW to the North Fork of Cedar Creek, then south to Deer Creek Road to Bellinger Road, then to the Gennett Road.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

24 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

48 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

Anticipated after 72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **5 TFLDs, 12 HEQB, 6 water tenders, 1 EMTF, 1 EMPF.**

24 hours: **5 TFLDs, 12 HEQB, 6 water tenders, 1 EMTF, 1 EMPF.**

48 hours: **5 TFLDs, 12 HEQB, 6 water tenders, 1 EMTF, 1 EMPF.**

72 hours: **5 TFLDs, 12 HEQB, 6 water tenders.**

Anticipated after 72 hours: **Same as 72 hours.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**Without the requested overhead and other critical resource needs, sustained challenges to controlling and securing fireline will continue.**

41. Planned Actions for Next Operational Period:

## Incident Status Summary (ICS-209)

Incident: **CARPENTER RD.**

**We will continue to perform point structure protection, build direct line and continue to secure mop-up and patrol spot fires. Mop-up and repair operations have begun on southern portion of the incident. Hazmat identification will continue.**

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):

43. Anticipated Incident Containment or Completion Date: **09/12/2015**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$14,745,495.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

**Current weather conditions are allowing for more direct suppression strategy. Forecasted weather for Saturday may impact suppression and repair operations.**
