33. Life, Safety, and Health Status/Threat Remarks: All evacuations reduced to Level I. Road closures in effect. Mine waste and undisclosed mine excavations are of concern.	34. Life, Safety, and Health Threat Management:	
35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): <p style="text-align: center;">An upper low pressure system swept across eastern Washington and the Idaho Panhandle today, bringing significant rainfall to the fire area. New rainfall amounts ranged from 1.00" across the southern half of the fire, to .60" across the northern half. Temperatures have hovered in the mid 40s to around 50 degrees all day, with relative humidity levels of 90-100%. Mostly cloudy skies with isolated rain showers are expected tomorrow, but a wetting rain is not anticipated. Temperatures are forecast to warm to around 60 degrees, with minimum RH levels of 30-35%.</p>		Active?

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:
 12 hours: **Minimal burning conditions expected, wetting rain received 9/5. Fire behavior minimal, smoldering.**
 24 hours: **Minimal burning conditions expected, wetting rain received 9/5. Fire behavior minimal, smoldering.**
 48 hours: **Minimal burning conditions expected, wetting rain received 9/5. Fire behavior minimal, smoldering.**
 72 hours: **Fire behavior potential increasing.**
 Anticipated after 72 hours: **Same as 72 hours.**

37. Strategic Objectives (define planned end-state for incident):
Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. South and east of a line beginning on the Cedonia Addy Road then east to the Klines Meadow Road, then SE along that road to the Red Marble Road then SW to the North Fork of Cedar Creek, then south to Deer Creek Road to Bellinger Road, then to the Gennett Road.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
 12 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**
 24 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**
 48 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**
 72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**
 Anticipated after 72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
 12 hours: **12 HEQB, 1 EMTF, 1 EMPF.**
 24 hours: **12 HEQB, 1 EMTF, 1 EMPF.**
 48 hours: **12 HEQB, 1 EMTF, 1 EMPF.**
 72 hours: **12 HEQB, 1 EMTF, 1 EMPF.**
 Anticipated after 72 hours: **Same as 72 hours.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
 1) critical resource needs identified above,
 2) the Incident Action Plan and management objectives and targets,
 3) anticipated results.
 Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

41. Planned Actions for Next Operational Period:
We will continue to perform point structure protection, build direct line and continue to secure, mop-up and patrol spot fires. Mop-up and repair operations have begun on southern portion of the incident and are progressing north. Hazmat identification will continue.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):
