Incident Status Summary (ICS-209)

Incident: CARPENTER RD.

<p>An upper disturbance crossed northern Washington today, producing a few light rains showers across the fire area this morning, as well as highly variable cloud cover. Temperatures climbed to around 70 degrees today, with relative humidity levels of 40-45%. Mostly sunny skies are forecast for Tuesday, with temperatures climbing into the lower to mid 70s and minimum RH levels of around 30%.</p>		Active?

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Minimal burning conditions expected. Fire behavior minimal, smoldering.**

24 hours: **Minimal burning conditions expected. Fire behavior minimal, smoldering.**

48 hours: **Fire behavior potential increasing with creeping and surface fire possible.**

72 hours: **Fuels continue to dry. Surface fine fuels available to carry fire.**

Anticipated after 72 hours: **Fuels continue to dry. Surface fine fuels available to carry fire.**

37. Strategic Objectives (define planned end-state for incident):

Full Suppression strategic objectives are to contain the fire west of Highway 231 and north of the Turtle Creek Road on the Spokane Agency. South and east of a line beginning on the Cedonia Addy Road then east to the Klines Meadow Road, then SE along that road to the Red Marble Road then SW to the North Fork of Cedar Creek, then south to Deer Creek Road to Bellinger Road, then to the Gennett Road.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

24 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

48 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

Anticipated after 72 hours: **With current fire conditions and predicted weather, minimal fire growth is expected.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **8 HEQB**

24 hours: **8 HEQB**

Incident Status Summary (ICS-209)

Incident: **CARPENTER RD.**

48 hours: 8 HEQB 72 hours: 8 HEQB Anticipated after 72 hours: None.																	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Wetting rain has mitigated fire behavior and assisted with containment and completion of direct line. Mop-up and repair operations will continue.																	
41. Planned Actions for Next Operational Period: We will continue to perform point structure protection, secure direct line and continue to mop-up patrol and of spot fires.																	
42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):																	
43. Anticipated Incident Containment or Completion Date: 09/12/2015																	
44. Projected Significant Resource Demobilization Start Date:																	
45. Estimated Incident Costs to Date: \$18,847,472.00																	
46. Projected Final Incident Cost Estimate:																	
47. Remarks (or continuation of any blocks above – list block number in notation): Current weather conditions are allowing for a direct suppression strategy.																	
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
