Comments /notes on tonight's mission and this interpretation: <p>Started with incident provided perimeter from incident 8/19/15.</p> <p>There was upslope growth of 200 acres along the northside of in the perimeter. Small areas of intense heat, primarily burning up Paradise Creek and adjacent drainages. Bob Creek on the west, and unnamed creek on the east, each of these drainages show small pocket of intense heat at the bottom of their drainage.</p> <p>Scattered heat is located just downslope of the upslope advances. Isolated heat sources scattered throughout the interior.</p> <p>Maps and data posted on ftp site and emailed to; Plansparadise@gmail.com, todd_rankin@nps.gov</p>
