Incident Name: Kewa WA-COA-000082	IR Interpreter(s): Ken Marchand kenfiregis@yahoo.com	Local Dispatch Phone: WA-COA (509-634-3100)	Interpreted Size: 1,970 Acres Growth last period: 3 Acres on westside
Flight Time: 2216 MDT Flight Date: 08/06/2016	Interpreter(s) location: Custer, SD Interpreter(s) Phone: Cell 6056731444	GACC IR Liaison: Jim Grace GACC IR Liaison Phone: 5417714521	National Coordinator: Tom Mellin National Coord. Phone: 505.301.8167
Ordered By: Justin Mund SITL	A Number: 57	Aircraft/Scanner System: N144Z/Phoenix	Pilots/Techs: Boyce/Nelson/Mann
IRIN Comments on imagery: One pass., very good detail imagery.		Weather at time of flight Mostly Clear	Flight Objective: Map heat perimeter, intense, scattered, and isolated heat
Date and Time Imagery Received by Interpreter: 08/06/2016 @ 2216 MDT		Type of media for final product: Pdf map, KMZ, IR log and shapefiles	
Date and Time Products Delivered to Incident: 08/06/2016 @ 2350 MDT		Digital files sent to: ftp.nifc.gov/incident_specific_data/pacific_nw/2016_Incidents_Washington\2016_Kewa_WA_COA_000082/IR/20160807/	
Comments /notes on tonight's mission and this interpretation: I used an updated perimeter from the incident. The only perimeter growth from fire was 3 acres on the west side of the fire, growth in the same timbered area in a southwestern direction towards the southwest corner of section 17. There was no intense heat observed, scattered heats were found in the same locations as last night, the southwest part of section 17 and the northwest part of section 16. Isolated Heats were detected and mapped throughout the fire, the least amount of heats is in the southern end of the fire.
