8. MEDICAL EMERGENCY PROCEDURES

1. LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and 2 location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on command channel
- Medical Unit will:
 - Dispatch ground ambulance to nearest drop-point for ground transport only.
 - Or after patient pickup, dispatch ambulance to Helibase for Medical AIR EVAC Flight if needed
 - Notify receiving hospital of injury status.

1. CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor

7. INCIDENT COMMUNICATIONS:

- Command: Channel #7
- Air to Ground: Channel #5

--------------	---	--

WHEN HARD HATS AND HARD HEADS CLASH

Often when we're talking about safety on the job, there are complaints about wearing hard hats. Comments we hear include: it's too hot in the summer, it's too cold in the winter, it's too heavy.

Remember that the slightest damage to any part of the brain can severely affect some other area of the body, either temporarily or permanently. The skull protects the brain. A hard hat protects the skull.

Tests have shown that in hot weather the temperature inside a hard hat is 12 degrees cooler than a baseball cap. Your head is kept cooler because ventilation is provided by air spaces between the shell and the suspension. The hat's surface reflects the heat rather than absorbing it. For cold weather, liners are available. Don't wear a hard hat over ordinary caps or hats in the winter.

The average hard hat weighs 13 ounces. The average head weighs 13 pounds. At one ounce of protection per pound of head, what a bargain!

If treated and worn properly, a hard hat can save your life. It can cushion a blow, protect against electric shock, chemical spills or hot materials. Check the shell for cracks and the suspension system for cracking, tearing or fraying. Don't paint, drill holes or use solvent on it because the shell will be weakened.

Finally, you may not need a hard hat if:

You have x-rays proving that you have a four-inch skull and equally thick protection around the other sensitive head and neck areas of your body.

Your doctor just told you that you have six months to live, and he forgot to mention it five months ago during your check-up.

You play Russian roulette for recreation every weekend.

You enjoy stopping large, heavy rocks pitched by graders and loaders with your head!

(Taken from: AZ Transportation Tech Transfer, April 1993. Originally prepared by the Washington Department of Transportation.)

Safety and Health Message

Hazard Trees – Both dead snags and live green trees are one of the most common risks encountered on the fireline.

- Frequently survey you work area for potential hazard trees.
- Identify, flag off, communicate to other personnel; avoid area until mitigated.
- Remove flagging once the hazard has been removed.

Fatigue can manifest itself in a variety of forms. It is extremely important that individuals, crews, team members, support staff, etc, all become aware of the signs and symptoms of fatigue and recognize when intervention is necessary.

Supervisors must be informed of potentially dangerous conditions. The effects of fatigue can directly impact our abilities to:

1. Perform various tasks
2. Maintain situational awareness and a high degree of alertness
3. React appropriately in a timely manner and fashion
4. Retain a sharp memory and recollection of information
5. Efficiently process information and make sound decisions
6. Maintain a positive and supportive attitude
7. Control levels of frustration, irritation and aggression

Personal Protective Equipment:

- Wear your hard hats
- Use your ear plugs when working around pumps
- Wear eye protection when mopping up, digging fire line, using a chainsaw; any activity that could result in foreign debris in your eyes.
- Wear your gloves when mopping up (except for cold trailing).
- Keep your sleeves down to protect your arms (burns, poison oak).
- Wear your chaps when using a chainsaw.

Smoke Exposure:

- When driving keep windows closed with air conditioner set to recirculate
- Drink plenty of water
- Rotate out of heaviest smoke
- Use over the counter eye drops and drink enough water for burning, tearing, red eyes
- Use eye protection when working in dust/ash

"There are no great men, only ordinary men, who have met extraordinary challenges." (ditto for women)
 - Admiral Halsey

Lookouts Communications Escape Routes Safety Zones

Safety Officer: Kellie Carlsen - Oregon Department of Forestry

Safety Analysis of Tactical Actions (215A)

Incident Name: Horse Prairie				Date and Time Prepared: 9/3/2017				Operational Period: Day 9-4-2017							
TACTICAL HAZARDS								LCES MITIGATION							
	A/M	P	Q	S	T	Y									
Indirect Fireline		X	X	X	X									Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.	
Downhill Fireline		X	X	X	X		X							Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide. Establish LCES.	
Underslung Fireline		X	X	X	X		X							Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.	
Mid-Slope Fireline		X	X	X	X		X							Insure that lookouts can see ALL area of mid slope line as well as areas upslope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.	
Frontal Assault		X	X	X	X		X							Identify thresholds for reassessment. Establish LCES.	
No Anchor Points		X	X	X	X		X							Find/construct safe, effective anchor before engaging. Establish LCES.	
Extreme Conditions (Spotting, Wind)	X	X	X	X	X		X							High potential given because of low live fuel moisture and high probability of ignition. Anticipate. Identify thresholds for reassessment, monitor weather. Establish LCES.	
Heavy Equipment	X	X	X	X	X		X							Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.	
Air Ops: Multi Aircraft	X	X	X	X	X		X							Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.	
Hazard Trees/Snags	X	X	X	X	X		X							Assess, Identify, Communicate, isolate, Mitigate. Establish LCES.	
Hazardous Materials														Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.	
Unburned Area Unknown Fires	X	X	X	X	X		X							High potential for re-burn in brush and conifers preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.	
Transportation	X	X	X	X	X		X							Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to uphill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.	
Communication	X	X	X	X	X		X							Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.	
Steep Terrain Gravity Hazards	X	X	X	X	X		X							Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.	
Environmental Hazards	X	X	X	X	X		X							Bees, Snakes, Bears and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals, warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate	
Structures				X	X									Follow page(s) 12-16 of Incident Pocket Response Guide. Establish LCES.	
Transfer of Command														Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.	
Span of Control		X	X	X	X		X							Adhere to Span of Control Guidelines-5:1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times.	
Falling Operations	X	X	X	X	X	X	X							Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.	
Power Lines				X	X									Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.	
I.A.	X	X	X	X	X		X							Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!

Fire Weather Forecast

FORECAST NO: 9
PREDICTION FOR: Day Shift
SHIFT DATE: Monday 9/4/2017
TIME AND DATE ISSUED: 9/3/17 2100hrs

INCIDENT: Horse Prairie Fire
UNIT: Douglas Forest Protection Association
SIGNED: Mary Wister 240-778-5303 (cell)
Incident Meteorologist (IMET)

Another Day of Hot and Smoky Conditions

Discussion:

High pressure responsible for the dry and unseasonably hot conditions will remain over the area through Tuesday. The temperatures and relative humidity today will be similar to yesterday, but the wind directions will be different. Winds will be North-Northeast at 5-10 mph until late afternoon then shift to the North-Northwest. There will be scattered mid and high-level clouds over the region today. It will be smoky again today but not as extensive as the past couple of days.

WEATHER FORECAST for Today:

SKY/WEATHER: Partly Cloudy and Hot. Smoky.

Max Temperature: 90-98 with hottest temperatures in areas with limited smoke.

RH: 15-25 percent with lowest humidity in areas with limited smoke.

WINDS: -20 foot-

North-Northeast 3-8 mph...becoming Northwest-North 3-8 mph after 1400.

-Ridgetop-

North-Northeast 5-10 mph...becoming Northwest-North 5-10 mph after 1400.

HAINES INDEX: 5 (Moderate)...decreasing to a 4 (Low) late.

Transport Winds: South around 15 mph.

STABILITY/INVERSION: Smoke inversion through the day.

Tonight:

SKY/WEATHER: Partly Cloudy. Areas of smoke.

Minimum Temperature: 58-62 Valleys. 70-75 Ridges.

Maximum RH: 60-65 percent Valleys. 32-40 percent Ridges.

WINDS: -20-foot-

Northwest-North 5-10 mph...decreasing to 2-6 mph after midnight.

-Ridgetop-

Northwest-North 5-10 mph...decreasing to 3-7 mph after midnight.

HAINES INDEX: 4 (Low)

Tuesday:

SKY/WEATHER: Partly Cloudy. Not as Smoky. A few cumulus buildups possible.

Max Temperature: 88-93.

RH: 17-22 percent.

WINDS: -20 foot-

Southwest 2-5 mph...shifting to the Northwest 3-8 mph in the afternoon.

-Ridgetop-

Southwest 3-6 mph...shifting to the Northwest 5-10 mph in the afternoon.

HAINES INDEX: 4 (Low)

Transport Winds: Southeast around 20 mph.

STABILITY/INVERSION: Smoke inversion weakening.

Extended Outlook:

WEDNESDAY...Becoming mostly cloudy. A chance of showers and thunderstorms, mainly in the afternoon and evening. Highs 82-87. West-Northwest winds 5 to 10 mph.

THURSDAY through FRIDAY...Mostly cloudy with a slight chance of showers and thunderstorms. Lows 55 to 60. Highs 75 to 80. West-Northwest winds 5 to 10 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 05	TYPE OF FIRE: Wildland
FIRE NAME: Horse Prairie	OPERATIONAL PERIOD: Sept. 4, Day Shift
DATE ISSUED: Sept. 3, 2017	TIME ISSUED: 2000
UNIT: DFPA, Central Unit	SIGNED: <u>Mike Haasken</u> Typed/printed: Mike Haasken

INPUTS

WEATHER SUMMARY: .DISCUSSION... High pressure responsible for the dry and unseasonably hot conditions will remain over the area through Tuesday. The temperatures and relative humidity today will be similar to yesterday, but the wind directions will be different. Winds will be North-Northeast at 5-10 mph until late afternoon then shift to the North-Northwest. There will be scattered mid and high-level clouds over the region today. It will be smoky again today but not as extensive as the past couple of days.

TOPOGRAPHY: Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the southeast end of the fire to 2,600'.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels are timber with a brush and litter understory and grass and brush fields. Fire Behavior has been extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds. The burn period has been 24 hours. Most burned areas have full consumption of fuels and are good safety zones if there are no snags.

Forecasted Indices:

1 hour fuel moisture: 4% (-1); **10 hour fuel moisture:** 5% (-1); **100 hour fuel moisture:** 7% (same); **1000 hour fuel moisture:** 10% (same)

Energy Release Component: 70 (+2); *similar to Stouts Creek and Cable Crossing ERC*

Probability of Ignition: Shaded due to smoke: 60% Unshaded: 80%.

Expected Fire Behavior: Expect moderate rates of spread and flame lengths and spotting up to ½ mile. Timber Understory (TU 5): 8-10' flame length and Rate of spread of 10-15 ch/hr on a 40% slope (5 mph wind)

Shrub (SH 2): 6' flame length and Rate of spread 10-15 ch/hr on a 40% slope (5 mph wind)

SPECIFIC: Divisions P,M,A,Y,T: During mop up, watch for tree, stump and root tunnel burnout and ash pits.

Division Q: Recent burnout; active burning along the control lines near the Division S break. Monitor the green for spots.

Division T: Monitor the active burning along Cow Creek road.

Division S: May be fire activity in the south end of the Division from burnout last night. Monitor the green.

AIR OPERATIONS: Air operations may again be hampered by heavy smoke. Myrtle Creek Sunrise is 6:42 AM; Sunset is 7:44 PM.

SAFETY: Heavy smoke conditions severely reduce visibility for lookouts, modify escape routes accordingly.

Logistics Service Hours

Shower	0900 – 2300
Kitchen	0430 - 0930 1630 – 2130
Fire Cache/ Ground Support	0600 – 2200

Resource Protection on BLM Lands Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.
