OREGON DEPARTMENT OF FORESTRY

INCIDENT MANAGEMENT TEAM

Incident Objectives	1. Incident Name Horse Prairie	2. Date Prepared 9/4/2017	3. Time Prepared 1000
----------------------------	--	------------------------------	--------------------------

4. Operational Period (Date and Time)
 9/4/2017 1800 - 0600 **Night Shift**

5. General Control Objectives for the Incident (include Alternatives)

- a. Fight fire aggressively and safely; maintain LCES at all times.
- b. Minimize fire size primarily through the use of direct tactics and a staffed night shift where possible.
- c. Keep fire South of Olalla Creek, West of Doe Creek, North of Middle Creek, East of Union Creek
- d. Maintain and build positive relationships with impacted landowners, public, and cooperating agencies.
- e. Maintain strict financial records and fiscal and equipment accountability.
- f. Act in a respectful and professional manner around the community.
- g. Protect tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors.
- h. Provide for initial attack and assistance as requested on new and emerging incidents.

6. Weather Forecast for Period

See attached weather forecast

7. General Safety Message

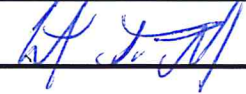

- *Anticipate and look for changes in weather and fire behavior
- *Initiate all actions based on current and expected fire behavior
- *Communicate hazards and mitigation measures to all personnel
- *Stay hydrated

Fire Weather Forecast

FORECAST NO: 10
 PREDICTION FOR: Monday Night Shift
 SHIFT DATE: September 4-5, 2017
 TIME AND DATE
 FORECAST ISSUED: 1300 September 4, 2017

NAME OF FIRE: Horse Prairie
 UNIT: Douglas Forest Protection Association
 Incident Meteorologist: Mary Wister
 Cell #: 240-778-5303

Weather Discussion...One more night of smoky conditions...

The smoke inversion continues with one more night of smoke, poor visibility, and poor air quality. There will be scattered mid-level clouds. The humidity will not be as low as what has been observed the past couple of nights, but temperatures will be mild again. Due to increased mixing and instability on Tuesday, the smoke conditions will improve Tuesday and Tuesday night.

Monday's Weather:

Areas of Smoke. Otherwise, clear skies. WNW winds 3-8 mph. Max Temps: 93-98 above 2000 feet and 85-90 below 2000 feet. Min RH: 12-18 percent above 2000 feet and 25-35 percent below 2000 feet.

Weather Forecast for Tonight:

Weather.....Smoke lingering through the night. Otherwise, partly cloudy.
Min Temperatures.....65-70 above 2000 feet. 53-58 below 2000 feet.
Max Humidity.....40-45 percent above 2000 feet. 70-75 percent below 2000 feet.
Winds (20FT).....Northwest-North 3-7 mph...decreasing to downslope/downvalley 2-5 mph after 2000.
Winds (Ridgetop).....Northwest-North 4-8 mph...decreasing to 3-7 mph after 2000...then shifting to Southwest 2-6 mph by sunrise.
Haines Index.....4 (Low)...borderline 5 (High) in the evening.
Chance of Rain.....0%

Outlook For Tuesday:

Weather.....Partly Cloudy. Not as Smoky. Cumulus Buildups possible.
Max Temperatures...88-93.
Min Humidity.....22-30 percent.
Winds (20FT).....Upslope/upvalley 3-6 mph...becoming Northwest 3-7 mph in the afternoon.
Winds (Ridgetop).....Southwest-West 2-6 mph...becoming Northwest 4-8 mph in the afternoon.
Haines Index.....4 (Low).
Chance of Rain.....0%

Extended Outlook for Wednesday-Friday:

WEDNESDAY...Partly Cloudy. A chance of showers and thunderstorms. Some could be strong with heavy rain, hail and gusty winds. Highs 80-85. Lows 60-65. Northwest winds 3-8 mph.
THURSDAY...Partly Cloudy. A chance of showers and thunderstorms. Cooler. Highs 75-80. Lows 58-65. West-Northwest winds 5-10 mph.
FRIDAY...Partly to Mostly Cloudy. A slight chance of showers. Highs in the 70s. Lows in the 50s.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 06	TYPE OF FIRE: Wildland
FIRE NAME: Horse Prairie	OPERATIONAL PERIOD: Sept. 4, Night Shift
DATE ISSUED: Sept. 4, 2017	TIME ISSUED: 1100
UNIT: DFPA, Central Unit	SIGNED: <u>Mike Haasken</u> Typed/printed: Mike Haasken

INPUTS

WEATHER SUMMARY: .DISCUSSION... Smoke has played a huge role in temperatures and relative humidity the past couple of days, and smoke will linger over the region again today & tonight. Winds are light at the surface and aloft, and little mixing is taking effect. Therefore, it will be another day with temperatures and humidity that will be significantly different in the valleys where smoke will be prevalent through the day compared to the ridges where smoke will thin out during the day. Expect poor humidity recovery overnight on the ridges above 2,000'.

TOPOGRAPHY: Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the south end of the fire to 2,600'.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels are timber with a brush and litter understory and grass and brush fields. Fire Behavior has been extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds. A rotating column with fire whirls were observed in late afternoon on the Div. T burnout a few days ago. The burn period has been 24 hours. Heavy smoke from this fire and others in southern Oregon have slightly suppressed temperature and slightly elevated relative humidity, but the fuel moistures are so low that fire behavior hasn't been affected, especially when the afternoon wind blows.

Forecasted Indices: For Late Afternoon, early evening before shift change.

1 hour fuel moisture: 4% (-1); **10 hour fuel moisture:** 5% (-1); **100 hour fuel moisture:** 7% (same); **1000 hour fuel moisture:** 10% (same); **Energy Release Component:** 70 (+2); **similar to Stouts Creek and Cable Crossing ERC**; **Probability of Ignition: Shaded due to smoke:** 60%; **Unshaded:** 80%

Expected Fire Behavior: Expect moderate rates of spread and flame lengths with torching and possible crown runs and spotting up to ½ mile.

Timber Understory (TU 5): 8-10' flame length and Rate of spread of 10-15 ch/hr on a 40% slope (5 mph eye level wind).

Shrub (SH 2): 6' flame length and Rate of spread 10-15 ch/hr on a 40% slope (5 mph eye level wind)

SPECIFIC: All Divisions should be aware of undetected spot fires outside the control lines.

Division Q: Expect active fire behavior from yesterday's burnout; monitor green for undetected spots.

Division S: Indirect fire line above active burning from the main fire, some active burning along line. Ensure LCES.

AIR OPERATIONS: Air operations may be hampered by heavy smoke. Sunset at Myrtle Creek is 7:44 PM tonight and sunrise tomorrow is 6:43 AM.

SAFETY: Night shifts can be especially difficult; many areas of the fire will experience Lower intensity fire behavior and lead may lead firefighters to a sense of complacency. Stay Alert, and Maintain Situational Awareness. This fire was very active last night and today, and there are still areas of the fire that have the potential for ACTIVE fire behavior.

8. MEDICAL EMERGENCY PROCEDURES

1. LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and 2 location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on command channel
- Medical Unit will:
 - Dispatch ground ambulance to nearest drop-point for ground transport only.
 - Or after patient pickup, dispatch ambulance to Helibase for Medical AIR EVAC Flight if needed
 - Notify receiving hospital of injury status.

1. CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor

7. INCIDENT COMMUNICATIONS:

- Command: Channel #7
- Air to Ground: Channel #5

BUREAU OF INDIAN AFFAIRS
FLATHEAD AGENCY, MT
Pablo, Montana 59855-5555

Date September 3, 2017

Memorandum

To: Aaron Baldwin, Branch of Wildland Fire Management Branch Chief
Stanley Speaks, Northwest Regional Director

From: Peter Plant, Flathead Agency Superintendent

Subject: Liberty Fire Shelter Deployment 24 Hour Report

THE FOLLOWING INFORMATION IS PRELIMINARY AND SUBJECT TO CHANGE

Location: Liberty Fire, Arlee, MT
Date of Occurrence: September 2, 2017
Time of Occurrence: 5 p.m.
Report by: David V. Chevalier
Activity: Fire Suppression
Mission: Hold fire at road; patrol, check, monitor perimeter and evaluate line integrity
Number of fatalities: None
Number of injuries: None
Narrative:

At approximately 1700 on Saturday, September 2, 2017, 13 crewmembers of a hotshot crew, three members of a contract engine and a Division Line Safety Officer working on the northwestern flank of the Liberty Fire experienced a sudden series of rapid wind shifts that resulted in numerous spot fires across the containment line.

The Division Supervisor gave orders for resources to evacuate and regroup at the designated Safety Zones. Sixteen firefighters from the hand crew, engine crew members and the Line Safety Officer found themselves caught between the main fire and emerging spot fires.

Thirteen firefighters escaped east into the designated safety zone. Two members of the hotshot crew and the Line Safety Officer attempted to escape downhill, but found themselves surrounded by heavy smoke and fire. The three began deploying their fire shelters when a shift in the wind cleared the air long enough for them to locate an escape route, allowing them to make their way to safety without using their fire shelters.

All 16 firefighters made it to safety and are uninjured. A team is gathering to form a Lesson Learned Review.

Safety Analysis of Tactical Actions (215A)

Incident Name: Horse Prairie				Date and Time Prepared: 9/4/2017				Operational Period: Night 9/4/2017							
TACTICAL HAZARDS													LCES MITIGATION		
	AM		P		Q	S	T		Y						
Indirect Fireline					X	X	X						Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.		
Downhill Fireline					X	X	X						Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide. Establish LCES.		
Underslung Fireline					X	X	X						Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.		
Mid-Slope Fireline					X	X	X						Insure that lookouts can see ALL area of mid slope line as well as areas upslope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.		
Frontal Assault					X	X	X						Identify thresholds for reassessment. Establish LCES.		
No Anchor Points					X	X	X						Find/construct safe, effective anchor before engaging. Establish LCES		
Extreme Conditions (Spotting, Wind)	X		X		X	X	X		X				High potential given because of low live fuel moisture and high probability of ignition. Anticipate Identify thresholds for reassessment, monitor weather. Establish LCES.		
Heavy Equipment					X	X	X						Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.		
Air Ops: Multi Aircraft	X		X		X	X	X		X				Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.		
Hazard Trees/Snags	X		X		X	X	X		X				Assess, Identify, Communicate, Isolate, Mitigate. Establish LCES.		
Hazardous Materials													Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.		
Unburned Area Unknown Fires	X		X		X	X	X		X				High potential for re-burn in brush and conifers preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.		
Transportation	X		X		X	X	X		X				Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to uphill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.		
Communication	X		X		X	X	X		X				Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.		
Steep Terrain Gravity Hazards	X		X		X	X	X		X				Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.		
Environmental Hazards	X		X		X	X	X		X				Bees, Snakes, Bears and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals, warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate		
Structures							X		X				Follow page(s) 12 - 16 of Incident Pocket Response Guide. Establish LCES.		
Transfer of Command													Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.		
Span of Control					X	X	X						Adhere to Span of Control Guidelines-5:1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times		
Falling Operations	X		X		X	X	X		X				Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.		
Power Lines						X	X						Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.		
I.A.	X		X		X	X	X		X				Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!		
Operations Section Chiefs: Perkins				Date / Time: 9/4/2017 1030 Hours				Safety Officers: Carlsen				Date / Time: 9/14/2017 1030 Hours			

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Horse Prairie	DATE: September 4, 2017 Operation Period: Night
-------------------------	--

Major Hazards and Risks:

Hazard Trees Driving Hydration Health

Continue to be diligent, “expect the unexpected”. There is the potential for an escape in every division, even the quiet ones. Review the **Common Denominators of Fire Behavior on Tragedy fires**. Ensure your lookouts are posted, you have communication, your escape routes and safety zones are known. One foot in the black is safest where ever possible.

Driving – **School starts!!!** Tomorrow morning on your drive in to camp you may see children and school buses.

Camp Crud – Proper hygiene practices will go a long ways to alleviate the “camp crud”. Proper hand washing is critical for preventing all sorts of illnesses. ALWAYS wash your hands:

1. Before handling or eating food
2. After using a public restroom
3. After coughing or sneezing
4. After handling money
5. After petting a dog or cat

Drink plenty of fluids. Eat your fruit and vegetables!

“What you do speaks so loudly that I cannot hear what you say” – Ralph Waldo Emerson

Watch Out Situation of the Day

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES:

1. Most incidents happen on smaller fires or on isolated portions of larger fires.
2. Most fires are innocent in appearance before the “flare-up” or “blow-ups”. In some cases, tragedies occur in the mop-up stage.
3. Flare-ups generally occur in deceptively light fuels.
4. Fires run uphill surprisingly fast in chimneys, gullies and on steep slopes.

Alignment of topography and wind during the burning period should be considered a trigger point to reevaluate tactics.

Resource Protection on BLM Lands Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.
