# Horse Prairie

<b>Incident Objectives</b>	1. Incident Name <b>Horse Prairie</b>	2. Date Prepared 9/5/2017	3. Time Prepared 2300												
4. Operational Period (Date and Time) 9/6/2017      0600 - 1800 <b>Day Shift</b>															
5. General Control Objectives for the Incident (include Alternatives)															
<ul style="list-style-type: none"> <li>a. Fight fire aggressively and safely; maintain LCES at all times.</li> <li>b. Minimize fire size primarily through the use of direct tactics and a staffed night shift where possible.</li> <li>c. Keep fire South of Olalla Creek, West of Doe Creek, North of Middle Creek, East of Union Creek</li> <li>d. Maintain and build positive relationships with impacted landowners, public, and cooperating agencies.</li> <li>e. Maintain strict financial records and fiscal and equipment accountability.</li> <li>f. Act in a respectful and professional manner around the community.</li> <li>g. Protect tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors.</li> <li>h. Provide for initial attack and assistance as requested on new and emerging incidents.</li> </ul>															
6. Weather Forecast for Period															
See attached weather forecast															
7. General Safety Message															
<ul style="list-style-type: none"> <li>*Anticipate and look for changes in weather and fire behavior</li> <li>*Initiate all actions based on current and expected fire behavior</li> <li>*Communicate hazards and mitigation measures to all personnel</li> <li>*Stay hydrated</li> </ul>

**8. MEDICAL EMERGENCY PROCEDURES**

**1. LINE EMERGENCY:** Crew Supervisor to contact Division Supervisor with patient complaint/condition and 2 location.

- Division Supervisor contacts:
  - Line EMT / PM
  - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications Unit contacts:
  - Medical Unit
  - Safety
  - Operations
- Division Supervisor will run medical emergency on command channel
- Medical Unit will:
  - Dispatch ground ambulance to nearest drop-point for ground transport only.
  - Or after patient pickup, dispatch ambulance to Helibase for Medical AIR EVAC Flight if needed
  - Notify receiving hospital of injury status.

**1. CAMP EMERGENCY:** Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
  - Communications
  - Safety
  - Logistics
  - Operations
  - Crew Supervisor

**7. INCIDENT COMMUNICATIONS:**

- Command: Channel #7
- Air to Ground: Channel #5

**Today's discussion is from the  
Environmental Factors Category.**

## **THUNDERSTORM SAFETY**

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- Do not lie down.
  - The best position is sitting on the pack or crouching with feet close together.
  - Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
  - Avoid grouping together. Keep a minimum of 15 feet between people when possible.
  - Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!
  
- "Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.
  
- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.
  
- Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.
  
- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
  
- Put down all tools.
  
- Take shelter in vehicles if possible.

Incident: Horse Prairie

Thunderstorm Safety Plan

September 6, 2017

In the event of a significant thunderstorm event affecting the Horse Prairie Incident, the following actions will be implemented:

1. The Safety Officer will address the safety concern at shift briefings, through safety messages, and informational sharing with Section Chiefs.
2. Thunderstorm safety guidelines from the IRPG page 21 and information from 6 Minutes for Safety Thunderstorm Safety handouts will be provided in camp and on the fire line.

**The 30/30 rule will be observed: If you see lightning, and hear the thunderclaps follow in less than 30 seconds, take the following storm precautions seriously.**

**A) Take shelter in a vehicle. No suitable buildings/yerts are located at the ICP.**

**B) Do not group together.**

**C) Avoid seeking shelter beneath a tree.**

**D) Do not resume work in exposed areas until 30 minutes after storm activity has passed.**

3. The IMET will monitor the development of significant thunderstorm activity in the vicinity of the incident and the ICP.
4. The IMET will request incident communications to make a radio announcement to fire line DIVS when the thunderstorm is approximately 30-60 minutes away from the incident or the ICP.

Section Chiefs at the ICP will be responsible for insuring this information is communicated to their subordinates and assigned resources.

Kellie Carlsen – Safety Officer Oregon Department of Forestry Incident Management Team 3

# HEALTH AND SAFETY MESSAGE

**SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Horse Prairie

DATE: 9/6/2017

Operation Period: Night

## Major Hazards and Risks:

### Hazard Trees

### Thunderstorms

### Hydration

### Health

Get Briefings and Monitor the Weather Throughout the Shift!  
Safety & Health Working Team

**Thunderstorms** - This fire is not over; there is the potential for an escape in every division. Continue to be diligent and “expect the unexpected”. Ensure your lookouts are posted, you have communication, your escape routes and safety zones are known. One foot in the black is safest where ever possible.

**Dehydration** - Remain hydrated by drinking plenty of fluids before, during and after work shifts. Avoid caffeinated drinks such as coffee and soda which often have the opposite effects of hydration. **DO NOT** drink energy drinks.

## Watch Out Situation of the Day

RUTA DE ESCAPE, ZONA DE SEGURIDAD

**Ash pits** are an inherent and hidden risk to wildland firefighters that can cause severe burns and injuries. Ash pits are created when organic combustibles consume underground and empty space is created that is imperceptible from the surface.

Environmental factors that increase the risk of ash pit formation after a wildfire:

- Extensive root systems of trees and shrubs.
- Deep duff or peat, the organic layer covering mineral soil.
- Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards or decking areas.
- Small rodent holes that have become filled with decadent combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
- White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
- With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground
- Ash pits often give off the smell of incomplete combustion or of creosote burning.

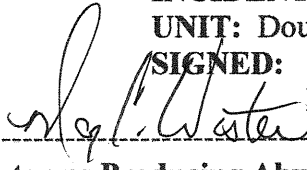

Mitigation measures to consider:

- Identification of high risk landscape.
- Identify and flag all hazardous discovered ash pits.

## Fire Weather Forecast

**FORECAST NO:** 13  
**PREDICTION FOR:** Day Shift  
**SHIFT DATE:** Wednesday 9/6/2017  
**TIME AND DATE ISSUED:** 9/5/17 2100hrs

**INCIDENT:** Horse Prairie Fire  
**UNIT:** Douglas Forest Protection Association  
**SIGNED:** Mary Wister 240-778-5303 (cell)  
Incident Meteorologist (IMET)

### Red Flag Warning for Thunderstorms Producing Abundant Lightning Wed-Thur

A low pressure system off the California coast is tracking northeast and will be heading toward southwest Oregon tonight and Thursday—a little slower than previously anticipated. There will be scattered showers and thunderstorms this afternoon and tonight over Southwest Oregon ahead of the system, and additional showers and thunderstorms on Thursday when the system tracks across the region. The best probability for Horse Prairie Fire and fire camp to receive precipitation will be tonight through Thursday morning. There will remain areas of smoke, but watch for sudden wind gusts and instability if smoke suddenly clears as the inversion breaks.

### WEATHER FORECAST for Today:

**SKY/WEATHER:** Increasing Clouds. A slight chance of showers and thunderstorms in the morning. A chance of showers and thunderstorms in the afternoon. Smoky.

**Max Temperature:** 80-85.

**RH:** 38-45 percent.

**WINDS: -20 foot- GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS**  
Northwest-North 2-6 mph with the strongest winds in the late afternoon.

#### **-Ridgetop-**

Northwest-North 4-8 mph with the strongest winds in the late afternoon .

**HAINES INDEX:** 4 (Low).

**Transport Winds:** Southeast around 30 mph.

**CWR (>0.25")**.....20% during the day.

### Tonight:

**SKY/WEATHER:** Mostly Cloudy. A Chance of Showers and Thunderstorms. Thunderstorms may bring heavy rain, gusty winds, and hail.

**Minimum Temperature:** 60-68.

**Maximum RH:** 70-80 percent.

**WINDS: -20-foot- GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS**  
Northwest-North 2-6 mph.

#### **-Ridgetop-**

Northwest-North 4-8 mph.

**HAINES INDEX:** 4 (Low)

**CWR (> 0.25"):** 40 percent

**LAL:** 3

### Thursday:

**SKY/WEATHER:** Mostly Cloudy. A Chance of Showers and Thunderstorms. Some storms may bring heavy rain, hail, and gusty winds.

**Max Temperature:** 74-79.

**RH:** 38-43 percent.

**WINDS: -20 foot- GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS-**  
North-Northeast 2-5 mph...becoming Northwest 4-6 mph in the afternoon.

#### **-Ridgetop-**

North-Northeast 2-5 mph...becoming Northwest 4-8 mph in the afternoon.

**HAINES INDEX:** 3 (Very Low)

**Transport Winds:** Southeast around 30 mph.

**CWR (> 0.25"):** 40 percent

**LAL:** 3

### Extended Outlook:

**FRIDAY-SUNDAY...**Partly to Mostly Cloudy. A slight chance of showers or Thunderstorms Friday. Highs in the 70s to around 80 Friday-Saturday and 78-88 Sunday. Lows in the 50s.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 09	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Horse Prairie	<b>OPERATIONAL PERIOD:</b> Sept. 6, Day Shift
<b>DATE ISSUED:</b> Sept. 5, 2017	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> DFPA, Central Unit	<b>SIGNED:</b> <u>Mike Haasken</u> <b>Typed/printed:</b> Mike Haasken

### INPUTS

**WEATHER SUMMARY:** .DISCUSSION... A low pressure system off the California coast is tracking northeast and will be heading toward southwest Oregon tonight and Thursday. There will be scattered showers and thunderstorms this afternoon and tonight over Southwest Oregon ahead of the system, and additional showers and thunderstorms on Thursday when the system tracks across the region. The best probability for Horse Prairie Fire and fire camp to receive precipitation will be tonight through Thursday morning. There will remain areas of smoke, but watch for sudden wind gusts and instability if smoke suddenly clears as the inversion breaks.

**TOPOGRAPHY:** Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the southeast end of the fire to 2,600'.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** Fuels are timber with a brush and litter understory and grass and brush fields. Fire Behavior has been extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds. The burn period has been 24 hours. Most burned areas have full consumption of fuels and are good safety zones if there are no snags.

#### Forecasted Indices: (Silver Butte RAWs)

**1 hour fuel moisture:** 8% (+1); **10 hour fuel moisture:** 8% (+1); **100 hour fuel moisture:** 8% (+2); **1000 hour fuel moisture:** 9% (same); **Live Woody fuel moisture:** 70 (same)

**Energy Release Component:** 64 (-4); **Probability of Ignition:** Shaded due to smoke/clouds: 30%  
Unshaded: 40%.

**Expected Fire Behavior:** Expect moderate rates of spread and flame lengths and spotting up to ½ mile. With the unstable air, **firewhirls are possible.**

Timber Understory (TU 5): 8-10' flame length and Rate of spread of 10-15 ch/hr on a 40% slope (5 mph wind)

Shrub (SH 2): 6' flame length and Rate of spread 10-15 ch/hr on a 40% slope (5 mph wind)

**SPECIFIC:** Divisions P,M,A,Y,Q & T north: During mop up, watch for tree, stump and root tunnel burnout and ash pits.

Division T South: Monitor the active burning along Cow Creek road.

Division S: Active fire from main fire and from burnout last 2 nights. Monitor the green for spots.

**AIR OPERATIONS:** Air operations may again be hampered by heavy smoke. Myrtle Creek Sunrise is 6:45 AM; Sunset is 7:41 PM.

**SAFETY:** Probability of Ignition (POI or PIG): The chance that a firebrand will cause an ignition when it lands on receptive fuels. 0% is impossible, 100% is inevitable. POI of 0-30 is Low, 40-60 is Moderate and 70-100 is High. 70% and higher indicates a high probability of mass ignitions which has been implicated in numerous fatality fire "blowups" such as 30 Mile, Esparanza, Dude, and others.

# HORSE PRAIRIE FIRE

## MOP UP STANDARDS

September 5<sup>th</sup>, 2017

Objective: The Horse Prairie Fire is to be mopped-up to a standard which the likelihood of the fire escaping the containment lines unlikely. The standards below can be flexible and should be applied based on physical conditions present, considerations for firefighter safety, and the expertise of the Incident Management Team (IMT) as long as the objective is achieved. These standards apply to all lands within the fire perimeter.

- Grid the green out to 300 feet from the fire perimeter for two burning periods
- Mop up 100% into hard black a minimum of 200 feet
- Mop up 100% all spot fires, in addition, a route to them will be flagged and the perimeter mapped in GIS
- Line unburned islands and drainages within 500 feet of the perimeter if they are not within the designated mop up area
- Mop up to 500 feet into hard black any dirty burn areas and areas of higher fuel concentrations. The decision to mop up this far into the fire will be based on the expertise of the IMT which is to consider fuels, aspect, wind exposure and firefighter safety
- Heat detecting equipment will be used to detect for hot spots within 200 feet of the perimeter including spot fires
- Complete felling of all snags and fire damaged trees that have been identified as a safety concern, have the potential to cause spotting outside control lines or is within 300 feet of major travel corridors, structures or railroad infrastructure.

## Resource Protection on BLM Lands Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.

## Working Around Inmates

Since 1951 The Oregon Department of Forestry (ODF) has utilized inmate labor to support wildland fire suppression efforts statewide. Standards have been established to protect the public and maintain order within the inmate work program. There is an expectation that security standards will not be compromised. This expectation extends to contractors, volunteers, and other agency and non-agency staff working on ODF managed fires.

You will recognize inmates by the orange stenciling on their clothing with the words "inmate" and the name of the institution that they came from. Inmates are rigorously screened before they are eligible for the work program. Violent crimes, sexual crimes, arson, and murder will keep an inmate from qualifying. Inmates working for ODF are typically highly motivated, trained, and look forward to learning new skills and giving back to local communities. They will not be left unsupervised or unaccounted for more than 30 minutes while on the fire line. While in fire camp, inmates are continuously supervised by DOC and ODF staff. It is ok to be friendly and speak with inmate workers, but here are some things you need to know:

- Inmates are not authorized to possess anything not provided by the Oregon Department of Forestry or Department of Corrections that is required for their work activity or sustenance. **Any items not issued by ODF or DOC is considered contraband.** Examples of contraband are cigarettes, chew, drugs, alcohol, firearms, non-stenciled clothing items, matches, lighters, sticks, animals, money, cell phones, or other people's items. Providing contraband to an inmate can in some cases result in a Class C, B, or A felony.
- Inmates should not be allowed access to computers, tablets, phones, fax machines, non-issued mobile radios, vehicle keys, facility keys etc.
- Enjoy light conversation with inmates but avoid sharing deeply personal information. Also do not engage in trying to solve an inmate's personal problems. Trained correctional counselors and security staff are hired to help inmates solve their problems. Feel free to express gratitude for the hard work that they do.
- Staff, contractors, and volunteers should not provide any type of gift or do any type of favor for an inmate. This includes making phone calls, mailing letters, post cards, emails, text messages or posting Facebook messages/pictures for inmates. Remember: **NO GIFTS, NO FAVORS.**
- Be aware of the Federal Prison Rape Elimination Act (PREA). It is a violation of Federal and State law to expose yourself to an inmate, engage in voyeurism, or have any sexual contact with an inmate. Professional boundaries are expected at all times. Sexual topics of discussion or jokes around inmates is inappropriate. Dress and act appropriately around inmates.
- Reporting- when you see an inmate acting strangely or doing/saying something that is clearly inappropriate do not hesitate to speak with the nearest Corrections Officer, or Forestry Crew boss.
- If an inmate is injured during the course of his duties, respond as you would for any other person and communicate with DOC security staff immediately thereafter.

When Inmates are working for the Oregon Department of Forestry they are learning technical skills, work ethic, problem solving skills and social skills that can help them become productive citizens when they are released. Please help us maintain a secure and positive inmate program by adhering to these policies and laws.
