**INCIDENT MANAGEMENT TEAM**

<b>Incident Objectives</b>	1. Incident Name <b>Horse Prairie</b>	2. Date Prepared 9/6/2017	3. Time Prepared 2300
----------------------------	--	------------------------------	--------------------------

4. Operational Period (Date and Time)  
 9/7/2017      0600 - 1800      **Day Shift**

5. General Control Objectives for the Incident (include Alternatives)

- a. Fight fire aggressively and safely; maintain LCES at all times.
- b. Minimize fire size primarily through the use of direct tactics and a staffed night shift where possible.
- c. Keep fire South of Olalla Creek, West of Doe Creek, North of Middle Creek, East of Union Creek
- d. Maintain and build positive relationships with impacted landowners, public, and cooperating agencies.
- e. Maintain strict financial records and fiscal and equipment accountability.
- f. Act in a respectful and professional manner around the community.
- g. Protect tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors.
- h. Provide for initial attack and assistance as requested on new and emerging incidents.

6. Weather Forecast for Period

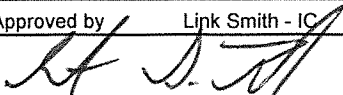

See attached weather forecast

7. General Safety Message

- \*Anticipate and look for changes in weather and fire behavior
- \*Initiate all actions based on current and expected fire behavior
- \*Communicate hazards and mitigation measures to all personnel
- \*Stay hydrated

## Nomex Clothing Exposed to Poison Oak/Ivy/Sumac

### RESEARCH

At the request of the National Support Cache Refurb Committee, MTDC researched the practicality of laundering Nomex firefighting clothing that has been contaminated with urushiol oil (the allergen to which the body reacts) from poison oak/ivy/sumac exposure. Current cache practices range from normal washing procedures to disposal of shirts and pants that have known urushiol contamination.

A search of on-line sources didn't produce any special care instructions beyond normal laundering. Some examples:

- "All clothing should be laundered, and everything else that may be contaminated with urushiol should be washed thoroughly." American Academy of Dermatology, [http://www.aad.org/public/publications/pamphlets/skin\\_poison.html](http://www.aad.org/public/publications/pamphlets/skin_poison.html)
- "...be sure to wash your clothing promptly with detergent..." MayoClinic, <http://www.mayoclinic.com/health/poison-ivy/DS00774/DSECTION=prevention>
- "Washing clothes with ordinary laundry soap will remove urushiol." Missouri Department of Conservation, <http://mdc.mo.gov/conmag/2005/03/50.htm>

A phone conversation with Daniel Boelman, RN, BSN, the Customer Service Manager with Zanfel Laboratories, Inc. also indicated no special treatment beyond normal laundering (Zanfel produces a commercially available poison oak/ivy cream). Mr. Boelman recommended using vinyl gloves when handling contaminated clothing.

On 11/17/2008 the Forest Service filed a SAFENET Supplemental Corrective Action concerning poison oak reactions experienced by firefighters during the 2008 fire season in California. <http://safenet.nifc.gov/safenet.nsf/3e5de74de3df7e0087256c00000dbf79/BB5CAA2EF216986687257505000C39B1?OpenDocument>

In that posting, it is recommended that "All clothing and equipment should be laundered immediately ...A degreaser was recommended for helping to remove urushiol from clothing and equipment."

### RECOMMENDATION

MTDC recommends that fire clothing contaminated with urushiol oil be cleaned following normal Nomex laundering procedures. Extra care should be exercised when handling the contaminated clothing. Clearly labeled plastic bags should be used to separate contaminated clothing from other returned clothing. Commercial laundry personnel should wear long sleeves and vinyl gloves when handling contaminated clothing and dispose of any bags used for transporting the clothes to the laundering facility. As an extra precaution, supply cache and laundry workers could apply an over-the-counter skin-barrier product that contains bentoquatam (such as Ivy Block or Stokoguard) before handling contaminated clothing. Bentoquatam helps prevent urushiol from penetrating the skin. After exposure, workers' clothes should be washed and gloves disposed of.

## Safety Analysis of Tactical Actions (215A)

Incident Name: Horse Prairie			Date and Time Prepared: 9/6/2017										Operational Period: Day 9/7/2017									
TACTICAL HAZARDS	A/M		P	Q	S	T	Y														LCES MITIGATION	
Indirect Fireline				X	X	X																Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Downhill Fireline				X	X	X																Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide. Establish LCES.
Underslung Fireline				X	X	X																Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.
Mid-Slope Fireline				X	X	X																Insure that lookouts can see ALL area of mid slope line as well as areas upslope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.
Frontal Assault				X	X	X																Identify thresholds for reassessment. Establish LCES.
No Anchor Points				X	X	X																Find/construct safe, effective anchor before engaging. Establish LCES.
Extreme Conditions (Spotting, Wind)	X		X	X	X	X	X															High potential given because of low live fuel moisture and high probability of ignition. Anticipate. Identify thresholds for reassessment, monitor weather. Establish LCES.
Heavy Equipment	X			X	X	X																Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.
Air Ops: Multi Aircraft	X		X	X	X	X	X															Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.
Hazard Trees/Snags	X		X	X	X	X	X															Assess, Identify, Communicate, Isolate, Mitigate. Establish LCES.
Hazardous Materials																						Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.
Unburned Area Unknown Fires	X		X	X	X	X	X															High potential for re-burn in brush and conifers preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.
Transportation	X		X	X	X	X	X															Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to uphill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.
Communication	X		X	X	X	X	X															Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Steep Terrain Gravity Hazards	X		X	X	X	X	X															Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.
Environmental Hazards	X		X	X	X	X	X															Bees, Snakes, Bears and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals. warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate
Structures						X	X															Follow page(s) 12 - 16 of Incident Pocket Response Guide. Establish LCES.
Transfer of Command																						Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.
Span of Control				X	X	X																Adhere to Span of Control Guidelines-5.1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times.
Falling Operations	X		X	X	X	X	X															Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.
Power Lines					X	X																Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.
I.A.	X		X	X	X	X	X															Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!
Operations Section Chiefs: Howard, McCarty (1)			Date / Time: 9/6/2017 1830 Hours										Safety Officers: Carlsen					Date / Time: 9/6/2017 1830 hours				

# HEALTH AND SAFETY MESSAGE

**SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Horse Prairie

DATE: September 7, 2017

Operation period: Day

## Major Hazards and Risks:

**Thunderstorm Safety**

**Shifting Winds**

**Cell Phones**

Fire Order of the Day – Keep informed on Fire weather conditions and forecasts

### Narrative:

Approaching thunderstorms

Be noted by sudden reverse of wind direction, noticeable rise in wind speed, and sharp drop in temperature. Rain, hail, and lightning occur only in mature stage of a thunderstorm.

30/30 rule:

-If you see lighting and hear thunderclaps within 30 seconds take storm counter measures-below.

-Do not resume work in exposed areas until 30 minutes after storm activity has passed.

## Watch Out Situation of the Day

15. WIND INCREASES AND/OR CHANGES DIRECTION

## Thunderstorm Counter-Measures

- Take shelter in a vehicle.
- Find a low spot away from tall trees, utility lines.
- Move to area of shorter trees/plantation/clearcut
- Crouch low to ground, use pack to seat on, never lay on the ground.
- Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Try to avoid ridgetops, wide open areas, ledges, rocky outcrops.
- Keep from standing near or operating machinery (pumps, water tenders)
- Do not handle flammable materials.
- Use of handheld radios and cell phones are ok.

Remain alert to unexpected weather changes.

**Cell Phones:** House Bill 2597 clarifies that anything a driver could think of doing with a cell phone while driving is illegal. If a police officer sees the white glow of the screen illuminating a driver's face, even if the officer didn't see the driver talking or fingering the keys, the officer has witnessed a violation.

Incident: Horse Prairie

Thunderstorm Safety Plan

September 6, 2017

In the event of a significant thunderstorm event affecting the Horse Prairie Incident, the following actions will be implemented:

1. The Safety Officer will address the safety concern at shift briefings, through safety messages, and informational sharing with Section Chiefs.
2. Thunderstorm safety guidelines from the IRPG page 21 and information from 6 Minutes for Safety Thunderstorm Safety handouts will be provided in camp and on the fire line.

**The 30/30 rule will be observed: If you see lightning, and hear the thunderclaps follow in less than 30 seconds, take the following storm precautions seriously.**

- A) **Take shelter in a vehicle. No suitable buildings/yerts are located at the ICP.**
  - B) **Do not group together.**
  - C) **Avoid seeking shelter beneath a tree.**
  - D) **Do not resume work in exposed areas until 30 minutes after storm activity has passed.**
3. The IMET will monitor the development of significant thunderstorm activity in the vicinity of the incident and the ICP.
  4. The IMET will request incident communications to make a radio announcement to fire line DIVS when the thunderstorm is approximately 30-60 minutes away from the incident or the ICP.

Section Chiefs at the ICP will be responsible for insuring this information is communicated to their subordinates and assigned resources.

Kellie Carlsen – Safety Officer Oregon Department of Forestry Incident Management Team 3

## Fire Weather Forecast

**FORECAST NO:** 15

**PREDICTION FOR:** Day Shift

**SHIFT DATE:** Thursday 9/7/2017

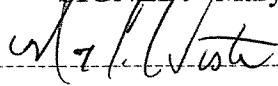

**TIME AND DATE ISSUED:** 9/6/17 2100hrs

**INCIDENT:** Horse Prairie Fire

**UNIT:** Douglas Forest Protection Association

**SIGNED:** Mary Wister 240-778-5303 (cell)

Incident Meteorologist (IMET)

---

**Red Flag Warning for Thunderstorms Producing Abundant Lightning Until 11 PM Thursday**  
**Flash Flood Watch in Effect for the Burn Scar Areas of Southwest Oregon Today**

Although rain amounts were less than 0.10" last night, some storms yesterday produced up to 0.50" in southern Oregon. The main low pressure system off the California coast will send additional surges of moisture and energy across the region today. These could develop thunderstorms capable of frequent lightning, heavy downpours, hail, and gusty outflow winds. For Horse Prairie and ICP, the thunderstorm threat will mainly occur between 1200-2000. Precipitation will taper off tonight. It will be cool with high RHs today.

---

**WEATHER FORECAST for Today:**

**SKY/WEATHER:** Mostly Cloudy. Scattered showers and thunderstorms. Some storms may bring heavy rain, hail, and gusty/erratic winds

**Max Temperature:** 73-78.

**RH:** 55-60 percent.

**WINDS:** -20 foot- **GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS**

North-Northeast 3-7 mph...becoming Northwest 3-7 mph in the afternoon.

**-Ridgetop-**

North-Northeast 4-8 mph...becoming Northwest 4-8 mph in the afternoon.

**HAINES INDEX:** 3 (Very Low).

**Transport Winds:** Southeast around 30 mph.

**CWR (>0.25"):** 50%.

**LAL:** 3...possibly 4

**Tonight:**

**SKY/WEATHER:** Mostly Cloudy. A Chance of Showers and Thunderstorms in the evening.

**Minimum Temperature:** 60-68.

**Maximum RH:** 75-85 percent.

**WINDS:** -20-foot- **GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS**

Northwest 2-6 mph.

**-Ridgetop-**

Northwest 3-7 mph.

**HAINES INDEX:** 3 (Very Low)

**CWR (> 0.25"):** 20 percent

**LAL:** 3

**Friday:**

**SKY/WEATHER:** Mostly Cloudy. A Slight Chance of Showers.

**Max Temperature:** 70-75.

**RH:** 55-60 percent.

**WINDS:** -20 foot-

North-Northeast 2-5 mph...becoming Northwest 3-7 mph in the afternoon.

**-Ridgetop-**

North-Northeast 2-5 mph...becoming Northwest 5-10 mph in the afternoon.

**HAINES INDEX:** 3 (Very Low)

**Transport Winds:** South around 25 mph.

**CWR (> 0.25"):** 10 percent

**LAL:** 1

---

**Extended Outlook:**

**SATURDAY-MONDAY...**Partly Cloudy Saturday. Mostly Clear Sunday-Monday. Highs in the 80. Lows in the 50s. Northwest wind 5-10 mph with ridgetop gusts to 15 mph Sat-Sun. Northwest-North 5-10 mph Monday.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 11	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Horse Prairie	<b>OPERATIONAL PERIOD:</b> Sept. 7, Day Shift
<b>DATE ISSUED:</b> Sept. 6, 2017	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> DFPA, Central Unit	<b>SIGNED:</b> <u>Mike Haasken</u> 
<b>Typed/printed:</b> Mike Haasken	

### INPUTS

**WEATHER SUMMARY:** .DISCUSSION... Although rain amounts were less than 0.10" last night, some storms yesterday produced up to 0.50" in southern Oregon. The main low pressure system off the California coast will send additional surges of moisture and energy across the region today. These could develop thunderstorms capable of frequent lightning, heavy downpours, hail, and gusty outflow winds. For Horse Prairie and ICP, the thunderstorm threat will mainly occur between 1200-2000. Precipitation will taper off tonight. It will be cool with high RHs today.

**TOPOGRAPHY:** Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the southeast end of the fire to 2,900'.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** Fuels are timber ranging in age from new plantings to old growth with a brush and litter understory and grass and brush fields. Fire Behavior during the first several days was extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds. The last few days had widespread smoke layer over the fire providing opportunities for burnout with moderate fire behavior generally. The burn period has been 24 hours. Most burned areas have full consumption of fuels and are good safety zones if there are no snags.

**Forecasted Indices: (Silver Butte RAWs, about 5 miles southeast of fire)**

**1 hour fuel moisture:** 12% (+4); **10 hour fuel moisture:** 12% (+4); **100 hour fuel moisture:** 11% (+4);

**1000 hour fuel moisture:** 10% (+1); **Live Woody fuel moisture:** 70 (same)

**Energy Release Component:** 53 (-12); **Probability of Ignition:** Shaded due to smoke/clouds: 20%.  
Unshaded: 30%.

**Expected Fire Behavior:** Expect minimal to moderate rates of spread and flame lengths with isolated torching depending on rainfall.

Timber Understory (TU 5): 8-10' FL & ROS of 10-15 ch/hr on a 40% slope (5 mph wind)

Shrub (SH 2): 6' FL & ROS 10-15 ch/hr on a 40% slope (5 mph wind)

Grass/Shrub(GS 1-Young reprod. less than 20 yrs. old): 5' FL with extensive torching & ROS: 30 ch/hr.

**SPECIFIC:** Divisions P,M,A,Y,Q & T north: During mop up, watch for tree, stump and root tunnel burnout and ash pits.

Division T South: Monitor the active burning along Cow Creek road.

Division S: Active fire from main fire and from burnout last 2 nights. Monitor the green for spots.

**AIR OPERATIONS:** Air operations may have cleaner air today. Myrtle Creek Sunrise is 6:46 AM; Sunset is 7:39 PM.

**SAFETY:** Watch your footing when working with water on slopes where the fire has burned through the surface fuels. Mixed conifer stands can have very slippery footing when water is being used to mop up in 'slicked off' burn areas.

# HORSE PRAIRIE FIRE

## MOP UP STANDARDS

September 5<sup>th</sup>, 2017

Objective: The Horse Prairie Fire is to be mopped-up to a standard which the likelihood of the fire escaping the containment lines unlikely. The standards below can be flexible and should be applied based on physical conditions present, considerations for firefighter safety, and the expertise of the Incident Management Team (IMT) as long as the objective is achieved. These standards apply to all lands within the fire perimeter.

- Grid the green out to 300 feet from the fire perimeter for two burning periods
- Mop up 100% into hard black a minimum of 200 feet
- Mop up 100% all spot fires, in addition, a route to them will be flagged and the perimeter mapped in GIS
- Line unburned islands and drainages within 500 feet of the perimeter if they are not within the designated mop up area
- Mop up to 500 feet into hard black any dirty burn areas and areas of higher fuel concentrations. The decision to mop up this far into the fire will be based on the expertise of the IMT which is to consider fuels, aspect, wind exposure and firefighter safety
- Heat detecting equipment will be used to detect for hot spots within 200 feet of the perimeter including spot fires
- Complete felling of all snags and fire damaged trees that have been identified as a safety concern, have the potential to cause spotting outside control lines or is within 300 feet of major travel corridors, structures or railroad infrastructure.

## Resource Protection on BLM Lands Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.

## Working Around Inmates

Since 1951 The Oregon Department of Forestry (ODF) has utilized inmate labor to support wildland fire suppression efforts statewide. Standards have been established to protect the public and maintain order within the inmate work program. There is an expectation that security standards will not be compromised. This expectation extends to contractors, volunteers, and other agency and non-agency staff working on ODF managed fires.

You will recognize inmates by the orange stenciling on their clothing with the words "inmate" and the name of the institution that they came from. Inmates are rigorously screened before they are eligible for the work program. Violent crimes, sexual crimes, arson, and murder will keep an inmate from qualifying. Inmates working for ODF are typically highly motivated, trained, and look forward to learning new skills and giving back to local communities. They will not be left unsupervised or unaccounted for more than 30 minutes while on the fire line. While in fire camp, inmates are continuously supervised by DOC and ODF staff. It is ok to be friendly and speak with inmate workers, but here are some things you need to know:

- Inmates are not authorized to possess anything not provided by the Oregon Department of Forestry or Department of Corrections that is required for their work activity or sustenance. **Any items not issued by ODF or DOC is considered contraband.** Examples of contraband are cigarettes, chew, drugs, alcohol, firearms, non-stenciled clothing items, matches, lighters, sticks, animals, money, cell phones, or other people's items. Providing contraband to an inmate can in some cases result in a Class C, B, or A felony.
- Inmates should not be allowed access to computers, tablets, phones, fax machines, non-issued mobile radios, vehicle keys, facility keys etc.
- Enjoy light conversation with inmates but avoid sharing deeply personal information. Also do not engage in trying to solve an inmate's personal problems. Trained correctional counselors and security staff are hired to help inmates solve their problems. Feel free to express gratitude for the hard work that they do.
- Staff, contractors, and volunteers should not provide any type of gift or do any type of favor for an inmate. This includes making phone calls, mailing letters, post cards, emails, text messages or posting Facebook messages/pictures for inmates. Remember: **NO GIFTS, NO FAVORS.**
- Be aware of the Federal Prison Rape Elimination Act (PREA). It is a violation of Federal and State law to expose yourself to an inmate, engage in voyeurism, or have any sexual contact with an inmate. Professional boundaries are expected at all times. Sexual topics of discussion or jokes around inmates is inappropriate. Dress and act appropriately around inmates.
- Reporting- when you see an inmate acting strangely or doing/saying something that is clearly inappropriate do not hesitate to speak with the nearest Corrections Officer, or Forestry Crew boss.
- If an inmate is injured during the course of his duties, respond as you would for any other person and communicate with DOC security staff immediately thereafter.

When inmates are working for the Oregon Department of Forestry they are learning technical skills, work ethic, problem solving skills and social skills that can help them become productive citizens when they are released. Please help us maintain a secure and positive inmate program by adhering to these policies and laws.
