

1) Coordinate with Agency Administrators to develop a plan that meets their leader's intent. 2) Identify, locate, and prep additional contingency lines. 3) Evaluate, document, and prep structures as needed in Sunstar and Takilma areas.

Implement contingency plans by firing burn blocks from DP 25 south to DP 28. The burn blocks are contained by roads, dozer line, and hose-lays. The Oak Fire (2017) is directly to the south of the Baldy Peak Lookout and DP 28.

1) Initiate contact with evac support personnel, consider 10 hour minimum requirement to safely evacuate Highway 48 corridor and Happy Camp residents. Air resources considered to check fire, identify point suppression strategies.
