

RAMSEY CANYON FIRE

Incident Action Plan

"STEWARDSHIP IN FORESTRY"

Night Shift
Friday, August 24, 2018
1800-0600

Incident Order Number
OR-711S-325-19

Incident Fire Number
711325-19

ICS-202 INCIDENT OBJECTIVES

1. Incident Name Ramsey Canyon Fire	2. Date Prepared 8/24/2018	3. Time Prepared 1400
4. Operational Period NIGHT SHIFT FRIDAY	8/24/18-8/25/18 1800-0600	

5. General Control Objectives for the Incident (include alternatives)

Incident Objectives

- Provide for the safety of firefighters and the public through deliberate risk management, implementation of appropriate mitigations and clear understanding of assignments.
- Protect private lands, communities, timber, infrastructure and other values at risk by minimizing the size of the fire.
- Protect structures within delegated areas by preposition and use of conflagration resources. Re-evaluate, triage, and perform structure protection as appropriate.
- Provide initial attack within the designated response area and support local IA efforts.
- Develop and deliver accurate and timely fire information to landowners, the public, and cooperators, through the use of personal contacts, social media, public meetings, and web-sites as needed.
- Be fiscally responsible by continuing to evaluate incident needs and make appropriate adjustments.
- Treat all personnel, landowners, cooperators and the public with dignity and respect. Promote a positive and harassment free work environment.

Operational Objectives

- Utilize strategies and tactics that will minimize acres burned, and keep the fire:
 - o East of East Evans Creek/West Evans Creek Road
 - o North of Elkhorn Butte
 - o West of Meadows Road
 - o South of Evans Creek
- Implement suppression tactics in coordination with Resource Advisors on BLM lands to minimize impacts to resource values, threatened and endangered species, and cultural sites.

6. Weather Forecast for Period

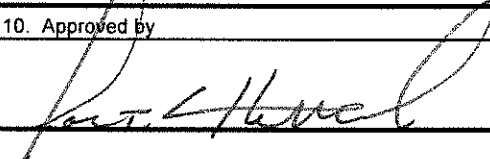

See attached weather forecast.

7. General Safety Message

See attached safety message.

Ramsey Canyon Night Shift

National Weather Service Medford

2018-08-24 11:06 AM PDT

Spot Forecast for Ramsey Canyon...ODF

National Weather Service Medford OR

1105 AM PDT Fri Aug 24 2018

Forecast is based on forecast start time of 1200 PDT on August 24.
If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...Today will be relatively cool, but warmer and drier conditions are expected Saturday. Recoveries tonight will be good. Winds will peak in the afternoon and evening and will be from the northwest to north at the ridge tops. Valley winds may differ depending on the orientation of the valley. Winds will be a bit gusty today, but slightly lower tomorrow.

.REST OF TODAY...

Sky/weather.....Sunny. Areas of smoke.
Max temperature.....74-76.
Min humidity.....27-31 percent.
Eye level winds....Variable 0-2 mph becoming northwest to north 3-5 mph gusting to 8 mph in the afternoon.
Wind (20 ft).....Variable to 5 mph becoming northwest to north 10-12 mph gusting to 15 mph in the afternoon.
CWR.....0 percent.
LAL.....1.

.TONIGHT...

Sky/weather.....Clear. Areas of smoke.
Min temperature.....49-51.
Max humidity.....78-82 percent.
Eye level winds....Northwest to north 3-5 mph gusting to 8 mph becoming variable 0-2 mph.
Wind (20 ft).....Northwest to north 10-12 mph gusting to 15 mph becoming variable to 5 mph.
CWR.....0 percent.
LAL.....1.

.SATURDAY...

Sky/weather.....Sunny. Areas of smoke.
Max temperature.....79-81.
Min humidity.....22-26 percent.
Eye level winds....Variable 0-2 mph becoming northwest to north 3-4 mph in the afternoon.
Wind (20 ft).....Variable to 5 mph becoming northwest to north 10 mph in the afternoon.
CWR.....0 percent.
LAL.....1.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER:	TYPE OF FIRE: Wildland Fire
FIRE NAME: Ramsey Canyon Fire	OPERATIONAL PERIOD: 08/24/2018
DATE ISSUED: 08/24/2018	TIME ISSUED: 1600
UNIT: OR-MED	SIGNED: 
Typed/printed: Brandon Ferguson, (FBAN-t)	

INPUTS

WEATHER SUMMARY:

Tonight:

This afternoon will remain relatively cooler than yesterday, but warmer and drier conditions are expected to continue through Tuesday. Humidity recoveries tonight will be good (78-82%). Winds will peak in the afternoon and evening, becoming light after 2200. Winds will be from the Northwest to north at the ridge tops. Valley winds may differ depending on slope and wind alignment. Winds will remain gusty later this afternoon, but slightly lower tomorrow.

EXTENDED:

SATURDAY.....Sunny. Areas of smoke. Highs 79-81. Winds variable and becoming Northwest 3-4 mph
 SATURDAY NIGHT...Partly cloudy. Areas of smoke. Lows 50 to 55. North winds 5 to 8 mph.
 SUNDAY...Partly cloudy in the morning then clearing. Areas of smoke. Highs 70 to 80. North winds 5 to 8 mph.
 MONDAY...Mostly clear. Areas of smoke. Lows 50 to 55. Highs 70 to 80. North winds 5 to 8 mph.
 TUESDAY...Clear. Areas of smoke. Lows 50 to 55. Highs 75 to 85. North winds 5 to 8 mph.
 WEDNESDAY...Mostly clear. Areas of smoke. Lows 50 to 55. Highs 75 to 85.
 THURSDAY...Mostly clear. Areas of smoke. Lows 50 to 55. Highs 70 to 80.

Fuels & Moisture:

-Mixed Age Douglas-fir and brush in the lower elevations.
 Fine Fuels 6-8%, based on shading. 100hr (1"-3") 8%, 1000hr (3"+) 8%

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Tonight:

Higher RH recoveries, light winds and smoke inversion will limit fire behavior after 2200. Expect backing and flanking fire behavior until the inversion settles. If wind gusts are sustained and when fuels in drainages and winds align, expect more active fire movement. Short runs, torching and spotting remain a possibility under some conditions.

Saturday:

Moderate to active fire behavior are expected with slope and wind alignment. Expect faster rates of spread and greater flame lengths in brush and grass fuels. Pay attention to changes in fuel models capable of carrying sustained runs. Torching is possible near ridgetops and/or exposed slopes.

Fire Behavior based on worst case daytime predicted weather.

Fuel Type	Low Elevation ROS	Low-Elevation FL	Spotting Distance	Ridgetop ROS	Ridgetop FL
Grass/Shrub (GS2)	15-25 Ft/Minute	4-6 Feet	0.3-0.5 Miles	40-45 Ft/Min.	6-8 ft.
Timber w/Understory (TU5)	5-7 Ft/Minute	7-9 Feet	0.3-0.5 Miles	10-15 Ft/Min.	8-10 ft.
Brush (FM5)	20-30 Ft/Minute	7-9 Feet	0.3-0.5 Miles	30-45 Ft/Min.	7-9 ft.

Probability of Ignition (PIG): 40 – 60% during the peak of the daytime burning period.

SPECIFIC:

South Side: Expect Nighttime Fire behavior to be similar to the previous night. Terrain and wind alignment will provide for the most active areas of fire spread. Main fire spread will continue to be Southeast. Expect spread to continue to move towards Chimney Rock Butte. Expect increased rates of spread in saddles between Neil Rock – Chimney Rock Butte, and Neil Rock – Turtle Rock if the fire progresses that far. Winds will be aligned with Ramsey Canyon and downslope/down canyon fire spread can occur.

The fire is currently sheltered from Northwest winds by Hull Mountain. If the fire spreads to the Southeast into meadows, expect prevailing/gusty winds to help push the fire towards Cinnabar Mountain.

North Side: The fire will continue to back down Hull Mountain to the North and East. Expect rollout to be a problem, and uphill runs are possible where fuels and slopes align.

AIR OPERATIONS: Valley Inversion smoke will be observed in the morning. Air Operations may be hindered due to smoke until the smoke mixes and clears at around 1200.

SAFETY

Standard Firefighting Orders

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.
4. Identify escape routes and safety zones and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

8. MEDICAL EMERGENCY PROCEDURES

1. LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on command channel
- Medical Unit will:
 - Dispatch ground ambulance to nearest drop-point for ground transport only.
 - Or after patient pickup, dispatch ambulance to Helibase for Medical AIR EVAC Flight if needed
 - Notify receiving hospital of injury status.

1. CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor

7. INCIDENT COMMUNICATIONS:

- Command: Channel 9 & 10
- Air to Ground: Channel 7

INJURY REPORTING PROCEDURES

2. EMERGENCY IC _____

IS AN EMT WITH PATIENT: YES ____ NO ____

IS A PARAMEDIC WITH PATIENT: YES ____ NO ____

3. NATURE OF INJURY _____

AGE ____ WEIGHT ____ SEX: MALE ____ FEMALE ____

CONSCIOUS? YES ____ NO ____ BREATHING? YES ____ NO ____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO

4. ____ RED-URGENT ____ YELLOW-PRIORITY ____ GREEN-ROUTINE

5. TRANSPORTATION REQUESTED BY: AIR ____ GROUND ____

6. ADDITIONAL NEEDS _____

8. LOCATION OF PATIENT _____

Division, closest DP

POINT OF PICKUP _____

LAT _____ LONG _____

9. CONTINGENCY _____

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Ramsey Canyon Fire

DATE: 8/24/2018 to 8/25/2018 Oper. Period: Night

Major Hazards and Risks:

- **Transportation – Narrow Roads**
- **Steep Terrain – Footing and Rolling Materials**
- **Large amount of snags in and around fires**
- **Public in the Area of the Fire**
- **Area of urban interface**
- **Powerline through Fire Area**

Fire Order of the Day – Obtain current information on fire status

Narrative:

- Have clear contact and communications with all air resources within your area.
- Make sure you are in good communication with all resources and with ICP.
- Drive Slow and have headlights on at all times.
- Be aware of working distance and position when working around equipment.
- Make sure LCES is in place at all times.
- Know where the Escape Routes and Safety Zones are and communicate and mark clearly.
- Say Hydrated. 4 Waters to 1 Gatorade
- Poison Oak & Snakes in Area
- Thick Smoke

Watch Out Situation of the Day

Wildland/Urban Interface Watchouts:

- Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
- Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
- Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
- Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or “chimneys” on slopes of 30% or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control

Incident Safety Officer: Scott West – ODF

Darren Bucich - OSFM Green Team

Safety Analysis of Tactical Actions (215A)

Incident Name: Ramsey Canyon Fire				Date and Time Prepared: 8/24/18 - 0900				Operational Period: Night August 24 - 25, 2018: 1800-0600				
TACTICAL HAZARDS											LCES MITIGATION	
	A	D	H	K	N							
Indirect Fireline	X	X										Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Downhill Fireline												Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide 2018. Establish LCES.
Underslung Fireline												Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.
Mid-Slope Fireline												Insure that lookouts can see ALL area of mid slope line as well as areas upstope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.
Frontal Assault												Identify thresholds for reassessment. Establish LCES.
No Anchor Points												Find/construct safe, effective anchor before engaging. Establish LCES.
Extreme Conditions (Spotting, Wind)												High potential given because of low live fuel moisture and high probability of ignition. Anticipate. Identify thresholds for reassessment, monitor weather. Establish LCES.
Heavy Equipment	X	X			X	X						Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.
Air Operations Multi Aircraft	X	X	X		X	X						Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.
Hazard Trees/Snags	X	X	X		X	X						Assess, identify, Communicate, isolate, Mitigate. Establish LCES.
Hazardous Materials	X	X	X									Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.
Unburned Area Unknown Fires	X	X	X		X	X						High potential for re-burn in brush and corners preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.
Transportation	X	X	X		X	X						Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to downhill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.
Communication												Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Steep Terrain Gravity Hazards	X	X				X						Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.
Environmental Hazards	X	X	X		X	X						Bees, and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals, warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate, communicate
Structures	X	X	X									Follow page(s) 13-16 of Incident Pocket Response Guide 2018. Establish LCES.
Transfer of Command												Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.
Span of Control												Adhere to Span of Control Guidelines-5:1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times.
Falling Operations												Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.
Power Lines	X	X	X			X						Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.
I.A. / Staging	X	X	X		X	X						Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!
Public	X	X	X		X	X						Identify, Establish communication with public, Notify Supervisor, Mitigate risk to Public.

Operations Section Chiefs: John Pellissier/Chris Barney	Date / Time: 08/24/18 - 0900	Safety Officers: Scott West/Darren Bucich	Date / Time: 08/24/18 - 0900
--	---------------------------------	--	---------------------------------

Incident Management Team: Incident Within An Incident Plan

The primary goal of this Plan is to allow incident personnel the guidelines necessary to *Locate, Triage, Extricate, Treat and Transport* all accident patients in as quick and safe a manner as possible. **The Division/Group Supervisor will initially oversee the emergency and activation of the Plan.** Radio communication will be on the "Command Frequency" and will take priority over all other radio traffic. **All Command and General Staff will be notified by the Safety Officer of what level (Green, Yellow or Red) the Incident is.**

G	Y	R	INCIDENT COMMANDER
			Ensures the Incident Within an Incident Plan is implemented
			Notifies Agency Administrator(s), Geographic Coordination Center, Salem Coordination Center, Salem Safety.
			Orders Investigator or Investigation Team
G	Y	R	OPERATIONS SECTION CHIEF
			Coordinate and support the Safety Officer's investigation and involved Law Enforcement agencies.
			Coordinate with Safety for ground ambulance transport, medical supplies and other medical needs.
G	Y	R	AVIATION EMERGENCIES:
			Air Attack, Air Operations Branch Director coordinate, as appropriate. OSC and IMT provide Support.
			Implement ODF Aviation Mishap Response Guide and Checklist & Heli-Base Emergency Plan, as appropriate.
			Coordinate with Air Operations Branch Director for notification to appropriate agencies.
G	Y	R	DIVISION/GROUP SUPERVISOR
			Will respond directly to the accident/incident scene and assume command until relieved, or clearly designate another capable person to be responsible, on your behalf.
			Remain aware of surroundings. Delegate Division/Group oversight to other qualified personnel, as needed.
			Size-up the Incident (Nature of Accident, Number/Type of Resources, Location, Safety for Incoming Personnel)
			Coordinate "Line EMT" response to the accident (Utilize Closest EMT's).
			Identify Location and Lat/Long coordinates of site.
			Identify Medical treatment and transportation needs.
			Begin "TRIAGE" (PINK pages of the Incident Response Pocket Guide – IRPG)
			Determine and initiate treatment and transportation needs.
			Evaluate special needs (Law Enforcement, Heavy Rescue, Haz Mat, fire protection or suppression)
			Coordinate with Air Attack for Air-Medical transportation needs
			Notify OSC and SOF of all accidents/incidents.
			Preserve the scene for accident investigation and begin documentation.
G	Y	R	SAFETY OFFICER
			Maintain Overall Incident Safety. Provide coordination between the incident and other IMT sections and units.
			Implement the Incident Within an Incident Plan for all incidents, providing coordination between the on-scene Division/Group and other IMT sections and units.
			Ensure appropriate incident organization.
			Coordinate and oversees line EMT& Paramedic response to the accident site.
			Provide for immediate extrication and medical triage, treatment and transportation.
			Request a Size-up of the situation. Number of people involved and their medical condition (Triage). Nature of the incident (auto/aircraft accident, burn over, etc.) and number of crews, vehicles or aircraft involved.
			Coordinate with Air Operations Branch Director for Air-Medical transportation needs.
			Ensure air/ground ambulances coordinate patient transportation locations with the Medical Unit Leader
			Identify special needs, i.e. Law Enforcement, Heavy Rescue, and Haz Mat response.
			Evaluate safety issues at all accident/incident sites and work with Division/Group Supervisor in charge to mitigate them.
			Initiate the investigation of the emergency and coordinate with the IC to request the appropriate investigation resources/teams.
			Secure witness names, initial statements and all evidence relating to the accident.
			Coordinate with the Logistics Section for on scene support and location of receiving hospitals for patients.
			Coordinate investigation with comps/claims unit.
			Obtain sketches and photos of emergency scene.
			Assist Medical Unit Leader with communications with the hospital and ambulance service.

G	Y	R	LIAISON
			Assist the Medical Unit Leader as needed
			Insure coordination with investigating entities
			Assist other positions as needed
			Coordinate with cooperators and key stakeholders
G	Y	R	INFORMATION OFFICER
			Collect pertinent emergency information.
			Coordinate information release with Incident Commander and Agency Public Affairs Officer.
			Assign Information Officer(s) to field media inquiries at accident scene, med-evac area and hospital.
			Coordinate with Liaison and Safety Officer regarding roadblocks, evacuations and emergency medical information needs.
			No personal information shall be released until approved by Incident Commander. Coordinate with local Agency.
			Coordinate with employee's home unit.
G	Y	R	PLANNING SECTION CHIEF
			Complete the 209 and coordinate with IIO to include accident information and status in the daily morning fire update report sent to Salem Coordination Center.
			Coordinate Critical Incident Stress Debriefing for effected personnel.
			Provide and coordinate a Family Liaison with supporting agencies, (Home Unit, Red Cross, 100 Club, Chaplin)
			Provide Briefing at ICP for Incident Personnel
			Ensure all communications regarding the accident and actions are well-documented.
G	Y	R	LOGISTICS SECTION CHIEF
			Assume command and implement Incident Within Incident Plan for incidents within the ICP or Camp in absence of SOF
			Ensure maintenance of accurate radio logs, use the Injury Communications Protocol Form (Logistics Manual Appendix I – 10) until the emergency has terminated. Ensure Safety Officer receives copies in a timely manner.
			Establish emergency radio communications, on a different frequency, if requested by scene IC.
			Provide ground or air transportation, depending upon need. Coordinate with Air Operations Branch Director.
			Order needed resources for the emergency
			Monitor support functions and assess additional needs.
			Coordinate removal of damaged vehicles.
			Coordinate Security with Team Liaison and Operations Section Chief as necessary.
			Locate and secure personal effects of injured personnel.
G	Y	R	FINANCE SECTION CHIEF
			Coordinate with Agency Administrative Officer(s) and Agency Risk Manager.
			Coordinate Compensation/Claims Unit response (Risk Management Forms).
			Notify Home Unit or Office of injured person(s). (Agency or Contractor)

BURN INJURY PLAN

Oregon Department of Forestry employees deserve the highest standard of burn care management when injured in the performance of their duties.

Burns will be classified as either Minor or Serious. Treatment, transportation, and follow-up specialty care will be based upon the severity of the burn classification. Burns will be classified by the established Medical Unit on project fires. Unit Supervisors will classify burns received in any other situation. Do not delay medical treatment for Medical Unit or Unit Supervisor classification in emergency situations.

Minor Burns

Superficial (first degree) burns involving less than 10% of body surface area that **does not** involve face, hands, feet, genitalia, joint areas, chemical burns, or burns with potential of respiratory complication.

The injured person in conjunction with the Medical Unit or Unit Supervisor will make treatment and transportation decisions for Minor Burns. Minor Burns requiring medical attention will be evaluated at a qualified hospital offering full service emergency care. Urgent care facilities and clinics are not an acceptable source for evaluation and treatment of burn injuries.

NOTE: All burns resulting from fire entrapments, direct flame contact, or superheated gases will be treated as a Serious Burn.

Serious Burns

Burns involving more than 10% of body surface area or burns of the face, hands, feet, genitalia, joint areas, chemical burns, or burns with potential of respiratory complication.

All serious burns will be transported to the closest appropriate medical facility for initial evaluation and stabilization. After stabilization, patients with serious burns will be transported to a qualified regional burn center as soon as possible for evaluation, treatment, and follow-up.

The Incident Commander, Unit Supervisor or designee has the discretion to request that burn injuries, regardless of their apparent severity, be evaluated at a qualified regional burn center. The Incident Commander, Unit Supervisor or designee will assign a representative to maintain contact with the injured employee throughout their care.

REGIONAL BURN CENTERS

OREGON, Portland
Oregon Burn Center
Legacy Emanuel Hospital
2801 N. Gantenbein Ave
Portland, OR 97227
(503) 413-4232

MEDICAL EMERGENCY PROCEDURES

1. LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on command channel
- Medical Unit will:
 1. Dispatch ground ambulance to nearest drop-point for ground transport only.
 2. Or after patient pickup, dispatch ambulance to Heli-base for Medical AIR EVAC Flight if needed
 3. Notify receiving hospital of injury status.

INJURY REPORTING PROCEDURES

2. EMERGENCY IC _____

IS AN EMT WITH PATIENT: YES ____ NO ____

IS A PARAMEDIC WITH PATIENT: YES ____ NO ____

3. NATURE OF INJURY _____

AGE ____ WEIGHT _____ SEX: MALE ____ FEMALE ____

CONSCIOUS? YES ____ NO ____ BREATHING? YES ____ NO ____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO

4.

RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is **IMMEDIATE**

Ex: Unconscious, difficulty breathing, bleeding severely, 2o – 3o burns more than 4 palm sizes, heat stroke, disoriented.

YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be **DELAYED** if necessary.

Ex: Significant trauma, unable to walk, 2o – 3o burns not more than 1-3 palm sizes.

GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport

Ex: Sprains, strains, minor heat-related illness.

5. TRANSPORTATION REQUESTED BY: AIR ____ GROUND ____

6. ADDITIONAL NEEDS _____

7. INCIDENT COMMUNICATIONS:

- Command: Channel 9 & 10
- Air to Ground: Channel 7

8. LOCATION OF PATIENT _____

Division, closest DP

POINT OF PICKUP _____

LAT _____ LONG _____

9. CONTINGENCY _____
