Comments /notes on tonight's mission and this interpretation: I started infra-red heat perimeter from 08/17/2018. New growth – 297 acres. Yellow is 8/17/2018's IR heat perimeter. Red line is current IR heat perimeter. <ul style="list-style-type: none"> • Columbus: 9,841 acres – 27 acres growth. There was some growth on the east side of the fire just north of Cow Horn Arch. Also on the east side in section 24 along Squaw Creek and south at Donegan Creek. 			

INFRARED INTERPRETER'S DAILY LOG

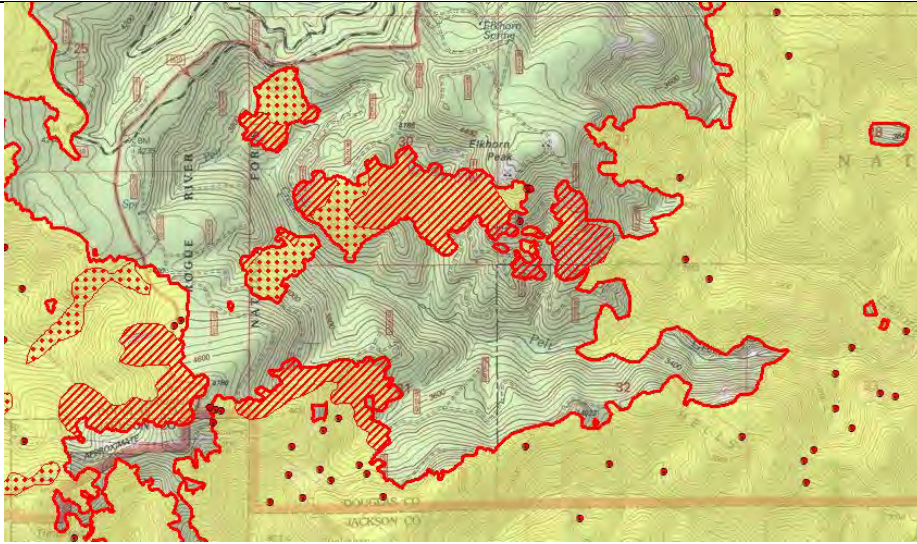

Light isolated and scattered heat mainly on the east side of the fire.

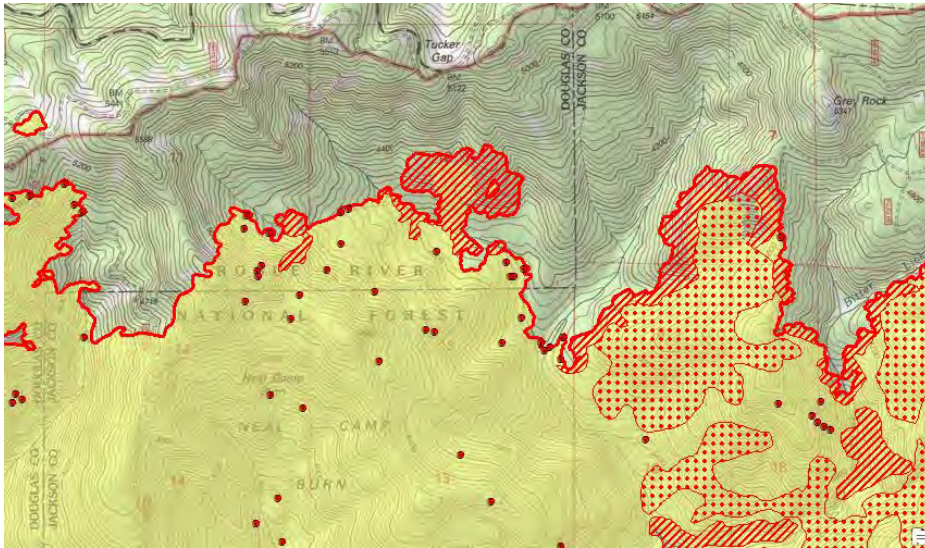

- **Miles:** 33,204 acres – 270 acres growth. Growth was mainly on the north side of the fire and also some of the interior unburned islands closed up. Again there was growth and intense heat in the Elkhorn Peak area.

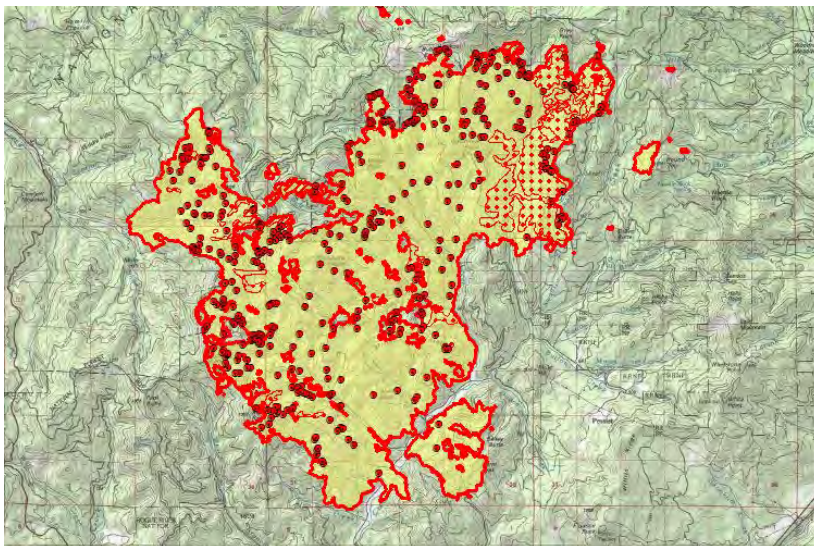

INFRARED INTERPRETER'S DAILY LOG

Also on the north side of the fire just south of Tucker Gap and Grey Rock.

Scattered and isolated heat throughout the interior of the heat perimeter.

INFRARED INTERPRETER'S DAILY LOG

- **Round Top:** 154.4 acres. No growth.
