Comments /notes on tonight's mission and this interpretation:

- Started interpretation from 08/28/2017 Aircraft 3 infra-red data.
- There was isolated and scattered heat throughout the entire interior of the fire. Most of the activity was around the interior unburned island areas.
- On the following maps the yellow is the 08/27 infra-red heat perimeter and the red line is the current infra-red heat perimeter.
- Most of growth was around the interior islands.
