FIRE WEATHER FORECAST

FORECAST NO: 28

SHIFT DATE: Tuesday, Oct 6th, 2020

PREDICTION FOR: 0600-2000

UNIT: OR- Umpqua NF

TIME AND DATE

FORECAST ISSUED: 2000 hrs. 10/5/20

INCIDENT NAME: Archie Creek/Thielsen

Incident Meteorologist - Dan Byrd

SIGNED: Dan Byrd

<u>WEATHER DISCUSSION:</u> Temperatures will be on the rise and Rh's will be lower once again Today and Wednesday, as high pressure strengthens over the region. The ridge will begin to weaken on Thursday, with isolated showers possible on Friday, out ahead of a strong Pacific storm system that will move into the region over the weekend. This storm system will produce widespread rainfall into Sunday.

SKY/WEATHER TODAY): Sunny and a little warmer. Patchy morning fog.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

2000 FT: (Archie Creek) 78 to 86 degrees (Up 2-4) / 23 to 33 (Down 6-8%) **5000 FT: (Thielsen)** 75 to 83 degrees (Up 1-3) / 15 to 25 (Down 2-3%))

EYE LEVEL WINDS:

Slope/Valley: Down slope/drainage 5 mph, becoming upslope from the south 5-10 mph late morning,

then generally from the west and up drainage 5-10 G15 mph in the afternoon.

Ridges: Southwest 4 to 8 G12 mph.

Transport Wind: SW-W 10 mph.

LAL: 1. Chc of Wetting Rain (> or = to 0.25"): 0%

Inversion: Weak at 3,000ft MSL early.

Afternoon Mixing Height: 5,000ft MSL.

SKY/WEATHER TONIGHT: Clear skies. Patchy areas of fog possible in Canyons/Valleys.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

2000 FT: (Archie Creek) 52 to 58 degrees (Up 3-4) / 70 to 80% (Steady) **5000 FT: (Thielsen)** 43 to 48 degrees (Up 3-4) / 60 to 70% (Steady)

EYE LEVEL WINDS:

Slope/Valley: Up slope and up drainage 4-7 mph early evening, becoming downslope and down

drainage 4-8 mph overnight.

Ridges: Southwest 4 to 8 mph.

LAL: 1. Che of Wetting Rain (> OR = to 0.25"): 0%

Inversion: Strong at 3000ft MSL.

2-5 Day Outlook, Wed-Sat (2000 Feet): * Pattern change late in the week, with increasing chances for showers*

Wednesday: Partly Cloudy. **High Temp:** 72-82. **Min RH:** 22. **Wind:** Slope Driven. **Thursday**: Partly Cloudy. **High Temp:** 64-74. **Min RH:** 38. **Wind:** Slope Driven.

Friday: Mostly Cloudy with a slight chance of showers. High Temp: 61-71 Min RH: 43. Wind: SW 10 G15.

Saturday: Cloudy with rainshowers. High Temp: 50-60 Min RH: 55. Wind: SW 10 G20.

Observations from midnight through 1800 PDT Monday, 10/5/20:

North Bank (1913ft): Temps 50F/70F, RH: 100%/60%, Pk Wind: NW 10 G14 mph.

Little River IRAWS (2100ft): Temps 50F/76F, RH: 86%/45%, Pk Wind: SW 8 G12 mph.

Grandad (2900ft): Temps: 51F/86F, RH: 74%/19%, Pk Wind: SW 5 G9 mph.

Lookout Mtn PRAWS (4739ft): Temps: 51F/75F, 69%/23%, Pk Wind: NNE 1 G3 mph.

Cinnamon (4834ft): Temps: 37F/82F, 84%/16%, Pk Wind: SE 4 G11 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 26	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek / Thielsen	OPERATIONAL PERIOD: Oct. 6, 2020
DATE ISSUED: October 5, 2020	TIME ISSUED: 2000 Hours
UNIT: Umpqua NF	SIGNED:Don Strand
	Typed/printed:

INPUTS

WEATHER SUMMARY:

See attached forecast

Archie Creek: Temps 78-86, Min RH's 23-33%, Winds light and variable (Diurnal winds). Thielsen: Temps 73-83, Min RH's 15-25%, Winds light and variable (Diurnal winds).

OUTPUTS

FIRE BEHAVIOR

GENERAL: Over the next couple of day, fuels will slowly continue to dry. So, 1-hour and 10-hour fuels will remain receptive to ignition.

Archie Creek: During the afternoon, 1-hour fuel moistures minimums will be near 5% unshaded and 10-hour fuels will be near 6%. 1000- hour fuel moistures will continue to be near 14%. ERC-G values will continue to be near 51 today.

Thielsen: In the afternoon, 1-hour fuels moistures will be near 5%, 10-hour fuels moistures will approach 5%, 1000-hour fuel moistures will remain near 16%. ERC-G values will continue to be near 43 today.

Fire behavior will be minimal today. Expect limited smoldering and creeping. Some open flame may be present in larger down logs, old stumps, snags and in recent needle cast. As a result of slightly lower RH's, areas of dirty burn likely to experience creeping fire behavior with some open flame at times. In the event the fire has positioned itself below-down slope of heat-treated ladder fuels, slight chance for flare ups exist.

If fire starts outside containment lines, expect moderate rates of spread with potential for isolated torching.

Rate of spread and flame lengths are model outputs based on maximum values for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	9 chains/hour 10 feet/min	3 feet
Mature Timber (TU2 & TL5)	5 chains/hour 6 feet/min	2 feet

In one hour, a spot fire would be approximately 1.6 acres in timber and 5 acres in grass/shrub. Probability of Ignition = 60%

AIR OPERATIONS: Morning marine layer may affect early flights. Otherwise slight hazy conditions.

SAFETY

Local Thresholds for Elevated Fire Behavior – Watch Outs - 20-foot winds> 13 mph, RH under 25%, Temperature over 85°, 1000-hour fuel moisture < 12%.

- Today on Archie Creek, temperature and RH thresholds will be met in some locations.
- On Thielsen, RH thresholds will be met.

Continue to watch for fire weakened trees and snags burning through and falling.

On steeper slopes, watch for rollouts.

With the days becoming shorter (losing 3 minutes/day), there still potential in the right conditions for an increase of fire activity during the afternoon.

Safety Message

6 October 2020

INCIDENT: Archie Creek/Thielsen OPERATIONAL PERIOD: 0700-1900

TOPICS:

TRANSFER OF COMMAND

NW12 has assumed command of the incident. Transition of Overhead and personnel will continue through the duration of the incident. Transition is a time that can be marred by extreme success or failure. Ensure positive relationship building and open lines of communications. Take a few extra minutes to get to know new personnel and provide a good briefing of actions taken up to the transition. A big thank you to the Southern Area Red Team for all their work!

DRIVING/TRANSPORTATION

With todays mission being the gathering of situational awareness, one of the higher risks faced will be driving. Practice defensive driving skills and maintain time and distance from other vehicles and visual obstructions such as curves and blind spots. Keep your speeds low and take your time.

SLOW IS SMOOTH, SMOOTH IS FAST... THIS IS A MARATHON

Do not react, be proactive, deliberate and solution oriented.

"Don't forget your COVID protocols and mitigations"

Deliberate Risk Assessment-Hazard Summary 6 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and hydration (24 hour supply of hydration each day supplied with breakfast)	Low
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas.	Moderate
Snags	Use avoidance to limit exposure time. Snag to avoid exposure. Use qualified fallers and machinery as needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 22).	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed.	High
Aircraft	Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment.	High

6. Control Operations/Work Assignments:

Task: Continue to secure lines, mop up and patrol to the extent necessary to ensure fire stays within established control features. Continue suppression repair per repair plan standards.

Purpose: Protection of timber resources and improvements.

End State: To eliminate the threat to improvements and timber values.

7. Special Instructions:

- Identity IA resources.
- · All REAFs will check in and out of Division with DIVS.
- During falling operations, ensure flaggers are in place when working on major roads.
- Ensure all invasive species protocols for water handling are followed.
- Logging operations and hauling off private is continuing.

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.).

AVIATION SAFETY IS A TEAM EFFORT

AIR OPERATIONS INTENT

ALL MISSIONS WILL BE ANALYZED IN TERMS OF HAZARDS AND RISKS

- THE RISK ASSESSMENT IS AN OPEN PROCESS WELCOMING INPUT.
- HAZARDS WILL BE MITIGATED, RISK WILL BE REDUCED.
- RISK MANAGEMENT PROCESS WILL BE DOCUMENTED AND DISPLAYED.

 IF A MISSION FEELS UNSAFE, IDENTIFY SAFE ALTERNATIVES

4. READY ALERT AIRCRAFT:

Suppression Repair 101 Constructing Effective Waterbars

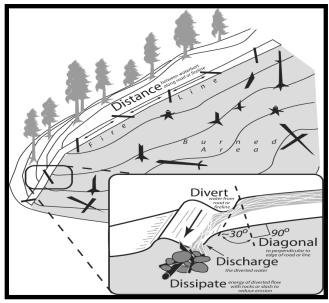

Who doesn't love Suppression Repair? Admittedly, it might not be as exciting as initial attack, but the reality is it is extremely important – our actions during the repair stage set the areas impacted by suppression efforts on a trajectory to heal more quickly than if left alone. Sure, nature is pretty good at healing from all sorts of disturbance, but our actions act like a catalyst....we can help speed up the recovery.

One of the most crucial things we do during Suppression Repair is construct waterbars on firelines. The purpose of a water bar is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce rilling, excessive erosion, and mitigate sediment transfer to streams and rivers.

There are two types of waterbars; effective and ineffective. An effective waterbar has 5 main characteristics (see Figure 1);

- Distance distance between waterbars is adequate for the slope not to close, and not to far apart.
- Divert the waterbar is effectively anchored into the uphill side so that water is funneled into the waterbar, and not over the top of the waterbar berm.
- Diagonal the waterbar angle does not exceed 45 degrees waterbars exceeding 45 degrees will not slow the water down.
- Discharge the waterbar is deep enough to ensure there are no barriers, and the water is effectively delivered to the green filter at the end of the waterbar.
- Dissipate the water is dissipated, or filtered, through the green filter at the end of the waterbar. This slows the runoff down and reduces erosion resulting from the energy flow of moving water.

Figure 1. The Five-D System for Effective Fireline Waterbars. Furniss (undated) PNW

Human Resource Message – Archie Creek/Thielsen Fire October 6, 2020

Hello and Welcome everyone! My name is Susie and I am the Human Resource Specialist assigned to this incident. My office is located at the ICP in Glide, Oregon. You may reach me by calling or texting my cell phone at 602-571-9327, or by email at smanezes@blm.gov.

This Pacific northwest Team 12 looks forward to working with you on the Archie Creek and Thielsen Fires. As we transition from the Southern Area Red Team to our Pacific northwest team, we ask everyone to be patient and know that we are getting everything into place as quickly as possible. If you need anything, please let us know.

We again wish to thank the Southern Area Red Team for their professionalism, hard work, and dedication, while on this fire assignment. Thank you for a job well done!

Please be careful in your work environment and do what you can to help alleviate other's concern regarding the pandemic. We ask for everyone to social distance, wear a mask, (as appropriate to your situation), use hand sanitizer and wash your hands. We are distancing ourselves for the safety of the team and for the safety of all fire personnel. We must all take care and expect the same of all personnel assigned to these fires.

As a reminder, there is a zero tolerance for any type of inappropriate behavior while assigned to this or any fire. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. The same goes for the illegal use of drugs and alcohol. Known or reported acts will be dealt with appropriately!

We too endorse and support an attitude of mutual respect for all incident personnel and the public we serve. We are short time guests in this community and what we say and do will leave a lasting impression. Let us leave a good impression. This community is dealing with a tremendous loss and our hearts go out to everyone.

Please be safe in your work today and should you have any issues or concerns or simply want to talk, please do not hesitate to contact me at 602-571-9327 or email me at smanezes@blm.gov.

THOUGHT FOR THE DAY

Unless you try to do something beyond what you have already mastered, you will never grow.

Ralph Waldo Emerson

Susie Manezes, Human Resource Specialist PNW Team 12 – Contact: 602-571-9327 Located at the Incident Command Post (ICP) Glide, Oregon

Archie Creek Fire & Thielsen Fire Training Message

Message to Trainers/Evaluators:

- If you are leaving the incident before your assigned trainee...
 - Or, your trainee is reassigned...

Complete a performance evaluation for the period the trainee was assigned!

Contact the Incident Training Specialist

Erika L. Davis (850) 841-0038, <u>Erika.Davis@USDA.GOV</u>, MS Teams, FaceTime, or WhatsApp

TRAINING REGISTRATION

https://tinyurl.com/yxs7x4bm

- Initiate registration via QR code
- Send Red Card and PTB cover
- Receive confirmation email w/forms

TRAINING CLOSE-OUT

https://tinyurl.com/y54ufg3v

- Initiate Close-out via QR code
- Send completed Performance Evaluation(s), Evaluation Record(s), Final Evaluators Verification (if necessary)

LOGISTICS INFORMATION

Archie Creek Kitchen Breakfast: 0600-0830 Dinner: 1830-2130

Archie Creek Showers

Opens: 0500 Closed: 1200-1400 Closed: 2200

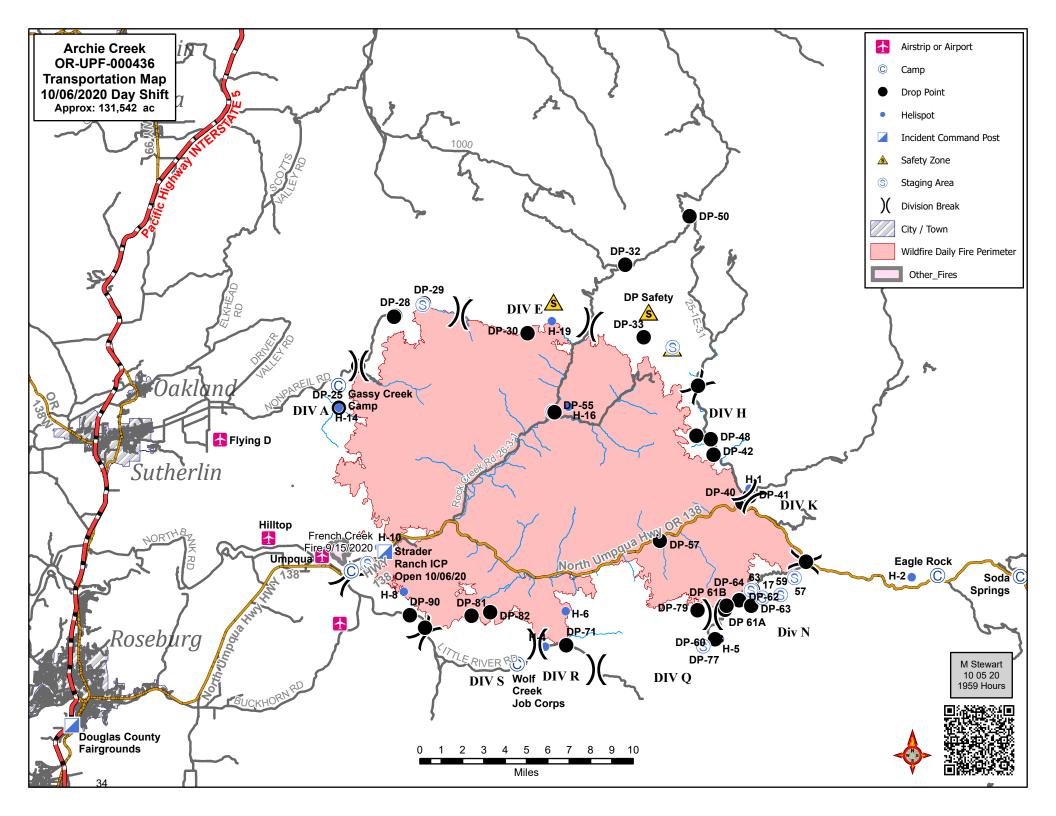

Thielsen Spike

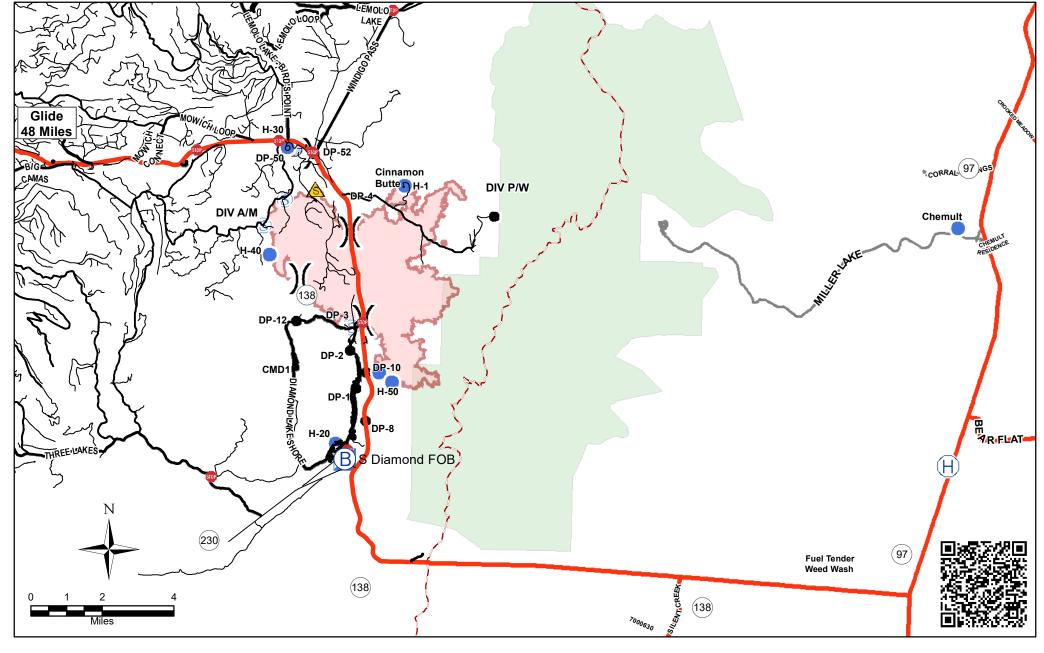

Breakfast: 0530-0900 May change to 0600 Dinner: 1800-2100

For COVID mitigation, please reduce the numbers of individuals coming to the kitchen window. Send representatives to collect meals for groups.

Weed Wash:

The access road to Buck Eye Cinder Pit is on the north side of HWY 138 approximately 1.25 miles west from the Junction with HWY 97. The road is signed in orange as "Staging Area."

To access the weed wash, traffic travelling north will proceed to the Buck Eye cinder pit to turn around. They will then travel south and enter the weed wash on the right side of the road.

The exit is the same pit access road back to HWY 138.

IAP Transportation Map
10/06/2020 Day Shift

Incident Maps

Maps are not included in the IAP document due to size and page count. For detailed Operations, Transportation and other maps, scan the QR code (or click the link below it) for your fire:

Archie Creek (click to open)

Thielsen (click to open)

Send Map Updates

Send map updates by email to the Situation Unit email address for your fire:

Archie Creek: 2020.archiecreek.situation@firenet.gov

Thielsen: 2020.thielsen.situation@firenet.gov

Alternately, text/call the Situation Unit at 360-584-3373. Make sure to include your name, position and explanation of the update you send.

How to correctly send data from Avenza:

- 1. Open the map in Avenza.
- 2. Click the pin with three lines near the lower-right corner.
- 3. *iPhone:* In the lower right, click the square with up arrow. From the pop-up menu, choose Export to Others.

Android: In the lower right, click the circle with three lines. Click the pop-up circle with up arrow.

- 4. Set these options:
 - a. Filename leave alone
 - Export Format choose SHP, GPX or KML

- c. Data all features
- d. Image size no image
- 5. Click the Export button in the upperright corner.
- 6. When the export is ready, choose your Mail application.
- 7. Send the email to the address for your fire.
- 8. Your email needs to include your name and position
- Your email needs to include an explanation of the data you are sending.

REQUIRED BY ALL PERSONNEL: COVID-19 DAILY CHECKLIST

Supervisors are required to go over this list each morning with assigned resources. Please make a notation in the remarks section on your daily Crew Time Report documenting your daily health assessment check.

Self-Awareness / Screening

- □ Notify supervisor if you or others experience:
 - Fever or chills
 - Cough
 - Shortness of breath or difficulty breathing
 - Fatigue
 - Muscle or body aches

- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea
- Have you had close contact within the last 14-days with someone who is currently sick with confirmed COVID-19? (Note: Close contact is defined as within 6 feet for more than 15 minutes per CDC Guidelines)
- □ Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel: Contact line EMT or COVID Module personnel for next steps.

Covid-19 Prevention and Mitigation Measures

□ Properly wash or sanitize your hands often, especially before and after eating or
entering a public place, and after coughing or sneezing.
□ Avoid handshakes and communal use items.
□ Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed

- resupply.

 □ Disinfect high touch surfaces often: Radios, phones, doors, pumps, fuel cans, etc.
- □ Camps will work off a "restricted camp" principle. Once you are checked into the incident, your ability to restock personal items may be limited.

Social Distancing and Protective Equipment
□ Initiate, practice, and remind others of social distancing.
□ Conduct briefings and conversations outdoors and at least 6 feet apart.
□ Remain 6 feet apart while waiting in line for meals or showers
□ Utilize face coverings indoors at all times and outdoors when you are less than 6 feet
apart from others.
□ Clean or replace dirty face coverings, equipment, and PPE.

Communications

□ Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

COVID-19 MITIGATIONS FOR ARCHIE CREEK FIRE

- Masks must be worn at all times in base camp, spike camp and ICP.
- Modules (e.g. crews, engines) should send representatives to pick up meals for the entire group: 1 person for engine crews,
 3-4 people for 20 person crews.
- Join morning briefing via phone (number provided in IAP)
- Observe 6-foot social distancing during briefings and while standing in line for meals, and any other time you are near people outside of your module.
- Limit contact between firefighters and the public as much as possible, use crew representatives to pick up supplies, fuel, etc.

WEAR YOUR MASK WASH YOUR HANDS WATCH YOUR DISTANCE

EMERGENCY PLAN

INCIDENT WITHIN AN INCIDENT

ON SCENE SUPERVISOR

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment and Transportation.

- Conduct size-up of the incident (nature of accident, number type of resources involved, latitude and longitude location); notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency; coordinate with incident communications and air attack for air medical transportation needs
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED.
